PSY 681.01W: Intermediate Statistics (Summer II 2014)

<u>Instructor</u>: Maria A. Carlson, Ph.D., <u>maria.carlson@tamuc.edu</u>

Office Hours: Due to the online nature of this course, it would be best to email me questions or post them in the discussion sections of eCollege.

<u>Textbook</u>: *Discovering Statistics Using IBM SPSS Statistics*, 4th edition, by Andy Field (ISBN: 9781446249178)

CATALOG DESCRIPTION OF THE COURSE:

This course, a Level III research tools course, will emphasize the understanding of intermediate level statistical concepts and their application to the social sciences and education. Content will include one-way, factorial, and repeated measures analysis of variance, simple analysis of covariance, and advanced correlational methods, bivariate regression and an introduction to multiple regression, selected nonparametric methods, and introduction to multivariate analysis of variance. Prerequisites: Level I and Level II research tools or equivalent or permission of the instructor. Note: Students will be required to use computational software to assist in the analysis and interruption of data.

GENERAL INFORMATION:

This is an online course, which is <u>not</u> to be interpreted as self-paced. Rather, you are required to log on regularly (preferably every day) in order to succeed. You may consume the material at a more rapid pace than set by the below schedule, but assignments and exams will still take place according to the schedule. Exams will be open for 1-2 days, and if you are unable to complete the exam in this timeframe, you must contact me <u>ahead of time</u> to re-schedule.

The time and effort required for this course is equivalent for any upper-level graduate statistics course that you could take face-to-face. A high level of both will be necessary to succeed.

REQUIRED MATERIALS:

- 1) The textbook mentioned above.
- 2) A calculator or knowledge of using formulas in Excel.
- 3) Access to either the new version of SPSS (called PASW) or an older version of SPSS. One of these is available in Henderson 214 (Psychology department computer lab) and another version is available on library computers (and many academic libraries and computer labs have some version of SPSS). Do keep in mind that many versions of SPSS are not backward-compatible, so you must be very careful when saving/exporting your work. For data files, just save as the default .sav file, which should be accessible in any version of SPSS. However, for output files, the story is different. You must <u>always</u> export these files rather than simply saving them. If necessary, early in the term I will specify the type of file to which to export your work, but it will likely be .rtf or .pdf.

REQUIREMENTS:

There will be three assignments, each worth 10 points, adding up to 30% of your grade. You may work with others in the class on these assignments, but quizzes and exams are to be taken <u>individually</u>.

GRADING:

Assignments add up to 30% of your grade. There are four quizzes, each worth 10%, and there are two exams, each of which is worth 15% of your final grade.

Students with Disabilities:

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:

Office of Student Disability Resources and Services
Texas A&M University-Commerce
Gee Library
Room 132
Phone (903) 886-5150 or (903) 886-5835
Fax (903) 468-8148

StudentDisabilityServices@tamuc.edu

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. (See Student's Guide Handbook, Policies and Procedures, Conduct).

There are 100 points available. You need 90 points or better for an 'A', 80 points or better for a 'B', 70 points or better for a 'C', and 60 points or better for a 'D'. A total below 60 points will result in an 'F'.

Week	Dates	SCHEDULE OF TOPICS AND EXAMS				
		Monday	Tuesday	Wednesday	Thursday	Friday
1	7/7 – 7/11	Course home & Syllabus	Chapter 8: Regression	Chapter 8: Regression	Chapter 11: Analysis of Variance (ANOVA)	Chapter 11: Analysis of Variance (ANOVA)
2	7/14 - 7/18	Quiz 1 Due Homework 1 Due	Chapter 12: Analysis of Covariance	Chapter 12: Analysis of Covariance	Exam 1 Due	Chapter 13: Factorial ANOVA
3	7/21 – 7/25	Chapter 13: Factorial ANOVA	Quiz 2 Due Homework 2 Due	Chapter 14: Repeated Measures ANOVA	Chapter 14: Repeated Measures ANOVA	Chapter 14: Repeated Measures ANOVA
4	7/28 – 8/1	Quiz 3 Due	Chapter 15: Mixed Design ANOVA	Chapter 15: Mixed Design ANOVA	Chapter 15: Mixed design ANOVA	Quiz 4 Due Homework 3 Due
5	8/4 – 8/7	Chapter 18: Categorical Data	Chapter 18: Categorical Data	Chapter 18: Categorical Data	Exam 2 Due	

Though we will try to abide by the following schedule, it is possible that it may change.
