**Class meetings and room:** TR 4:00pm -5:15pm, BA 244.

**Text and references:** Abstract Algebra, 3<sup>rd</sup> Edition, by D. Dummit and R. Foote.

**Course Description:** Groups, Subgroups, quotient Groups and Homomorphisms, Group Actions. Prerequisite: Math 334.

**Learning Outcomes:** Upon successful completion of this course, the students will be able to:

1. Define, and interpret basic concepts, fundamental properties and the algebraic structures of groups, subgroups, quotient groups, group homomorphisms and group actions.
2. Verify and prove some important theorems in group theory including Lagrange's Theorem, Cayley's Theorem, isomorphism theorems, and the classification of finite groups with small number of elements.
3. Define and explain the basic concepts, properties and examples of subgroups, cyclic groups, symmetric groups, and dihedral groups.
4. Define, explain and analyze basic concepts and properties and examples concerning cosets, normal subgroups, and quotient groups.

**Instruction:** Instruction will include lectures, discussions, and some group work projects, based on time available.

**Computer & supplies:** Using of Mathematica (a computer algebra system available in computers in Math Lab located in 328 Binnon Hall) is helpful but not required for this course.

**Attendance:** Attendance will be checked and it is your responsibility to sign the daily roll sheet. It is your benefit to attend the class.

**Tests:** There will be two midterm and a final exams for the course. The tentative schedules for the exams are:

Test 1: Oct. 2, Thursday 4:30pm-5:15pm.

Test 2: Nov. 13, Thursday 4:30pm-5:15pm.

**Final exam:** The comprehensive final exam is scheduled on  
**Dec 11, 4:30pm-6:30pm.**

**No makeup** exam will be given unless you have verifiable evidence showing an acceptable reason to have to miss a test and, in that case, you must notify the instructor before the test or in the earliest possible time.

**Homework & Quizzes:** Homework assignments are attached to this syllabus. You are strongly recommended to work out homework assignments on a regular basis since **No one can learn mathematics without doing it!** The assigned homework will be collected for grading on Sept. 25, Nov. 06, and Dec. 4. Some homework problems or their similar forms will be used as test questions. Pop quizzes are expected from time to time.

**Course grades:** The course grade consists of

Homework & Quizzes:	15%
Two Tests :	50%
Final exam:	35%.

The letter grades will be assigned using the following scale:

A: 90-100%   B: 80-89%   C: 70-79%   D: 60-69%   F: 0-59%

**Withdrawal Policy:** Concerning the deadlines and consequences of withdrawals please check on:

**Students with Disabilities:** The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:
