Instructional / Methods / Activities Assessments

This course consists of a series of assignments and assessments designed to assist you in achieving the required learner outcomes. Much of our work will occur within cooperative groups of six or less. Please consider the following points:

- A large portion of each class period will be devoted to small group discussions and activities.
- This course, and learning to teach, is not best done as a lecture.
- Your preparation for class is crucial to meaningful participation and is an important aspect of being accountable to other members of the class.
- Small Group Rationale:
 1. Working in small groups gives everyone more opportunity to talk about what they have studied for the week. It is the best way for members to get to know one another.
 2. Working in small groups reduces the possibility that one or two people will dominate the discussion.
 3. Working in small groups sends the message that weekly preparation is expected and essential for fruitful study and discussion. Everyone wins when everyone is prepared; everyone loses when any one individual is not prepared.
 4. Working in small groups keeps everyone involved and reduces the tendency to think preparation is not necessary because others will do the talking.
 5. Working in small groups prevents the class from becoming teacher dominated. You have the responsibility not to put your teacher in that position.
 6. You will strengthen your own understanding through preparation and participation.

The assignments, points allocated for each, and their contribution to your final grade are specified in the following section.

Grading,

Grades will be determined as follows:

A = 90 – 100 % B = 80 - 89 % C = 70 - 79 % D = 60 - 69 % F = 59 % or below
