Instructional / Methods / Activities Assessments

This course utilizes a practicum approach such as observations, small group/whole group instruction, co-teaching, and full-time teaching in the field. Seminars will be held weekly and uses an integrated approach to connect learning and experiences.

The purpose of the (**internship**) within the field-based program is twofold: (1) to demonstrate knowledge about content, pedagogy, technology, classroom management, assessment and evaluation, and the teaching and learning process; and (2) to demonstrate the ability to work with and manage students, plan lessons, and teach students using relevant and meaningful learning experiences in a professional manner. Thus, the assessment and evaluation of residents is also twofold as it addresses performance in both field based and seminar settings.

The primary force in the CPDT is the **instructional leadership team** that is coordinated by the mentor teachers and university liaisons with input from the interns, residents, and principals. Most decisions about the activities and experiences each intern or resident will have are determined by the **ILT** through discussion and

consensus. The ILTs are usually composed of at least two mentor teachers, usually from different grade levels or content areas, an intern, and/or a resident, and university liaison.

The field-based teacher education program has been designed to provide each student with opportunities to learn about students, learning, and teaching in the best possible environment--the real public school classroom and apply the knowledge gained from the resident semester in the residency semester. While the focus in the resident semester is on knowledge and learning, the focus in the residency semester is on demonstration and application of skills. Therefore, the intern's responsibilities should include:

1. understand the physical and cultural environment of the school, faculty, and staff, and students;
2. learn the students' names and their cultural diversity as soon as possible;
3. demonstrate the ability to respond appropriately to diverse group of learners;
4. understand the mentor teacher's yearly curricular and instructional goals;
5. become familiar with the content objectives, essential elements, and curriculum in order to utilize them for planning and instruction;
6. demonstrate a rich knowledge of content areas;
7. demonstrate effective interpersonal communication skills orally and in writing with professionals and students;
8. display the highest standards of professionalism and a commitment to improve the learning environment and the teaching profession;
9. observe the planning process and attend all available planning meetings;
10. assist the mentor teacher in planning, developing, and preparing materials;
11. become familiar with the classroom instructional and discipline management plan;
12. assist the teacher in supervising student performance and working with individual students;
13. observe and reflect upon curricular and instructional practices and research alternate learner-centered methods of instruction;
14. demonstrate a rich knowledge of pedagogy including effective teaching practices and relevant and meaningful learning experiences for students;
15. demonstrate knowledge and use of effective assessment and evaluation strategies to promote student learning;
16. explore and demonstrate knowledge in the use of the technology to enhance instruction and classroom management;
