Text and references: Introduction to Real Analysis, 4th Edition, by R. Bartle and D. Sherbert. Portions of Chapters 1-6 in the textbook will be discussed.

Course Description: Sequences; limits; functions; continuity; differentiation; integration. Prerequisite: Math 332.

Learning Outcomes: Upon successful completion of this course, all students will be able to:

1. Define and explain some basic concepts of convergence, the limit, continuity, differentiation and integrations.
2. Use ϵ - δ language and the basic principles to explain examples concerning the convergence, the limit, continuity, differentiability and integrability.
3. Understand and use examples to explain or prove some important theorems in the theory of the limit, convergence, continuity, differentiation and integrations of functions of one variable.

Instruction: Instruction will include lectures, discussions, and some group work projects, based on time available.

Computer & supplies: Using of Mathematica (a computer algebra system available in computers in Math Lab located in 328 Binnon Hall) is helpful but not required for this course.

Attendance: Attendance will be checked and it is your responsibility to sign the daily roll sheet. It is your benefit to attend the class.

Tests: There will be two midterm and a final exams for the course. The tentative schedules for the exams are:

Final exam: The comprehensive final exam is scheduled on
Dec. 11, Tuesday 4:00pm-6:00pm.

No makeup exam will be given unless you have verifiable evidence showing an acceptable reason to have to miss a test and, in that case, you must notify the instructor before the test or in the earliest possible time.

Homework & Quizzes: Homework have been assigned in the last page of this syllabus. You are strongly recommended to work out homework assignments on a regular basis since **No one can learn mathematics without doing it!** The assigned homework problems will be collected to grade at the beginning of every Thursday's class. **No late homework will be accepted.** Some homework problems or their similar forms will be used as test questions. Pop quizzes are expected from time to time.

Course grades: The course grade consists of
Homework & Projects: 20%
Two Tests : 50%
Final exam: 30%.

The letter grades will be assigned using the following scale:

A: 90-100% B: 80-89% C: 70-79% D: 60-69% F: 0-59%

Withdrawal Policy: Concerning the deadlines and consequences of withdrawals please check on:

- Possession or access to test items before the test is given.
- Deception in getting an excused absence to obtain the undeserved opportunity to make-up work.
- Use of cell phones or text messaging technology during exams or quizzes. You may not use the calculator on your cell phones.

- Improper citations in written works, or using another person's ideas and words as your own without giving proper credit.
- **Any** method, no matter how well rationalized or accepted, which improves a person's grade by any means other than study and skillful performances on exams and/or other assignments.
