COURSE INFORMATION

Textbook(s) Required: *Calculus*, Stewart, 8th Edition.

Course Description

Limits and continuity; the Fundamental Theorem of Calculus; definition of the derivative of a function and techniques of differentiation; applications of the derivative to maximizing or minimizing a function; the chain rule, mean value theorem, and rate of change problems; curve sketching; definite and indefinite integration of algebraic, trigonometric, and transcendental functions, with an application to calculation of areas. Prerequisites: MATH 2312 Pre-Calculus with grade of "C" or higher.

Student Learning Outcomes

1. Develop solutions for tangent and area problems using the concepts of limits, derivatives, and integrals.
2. Draw graphs of algebraic and transcendental functions considering limits, continuity, and differentiability at a point.
3. Determine whether a function is continuous and/or differentiable at a point using limits.
4. Use differentiation rules to differentiate algebraic and transcendental functions.

The syllabus and schedule are subject to change.

5. Identify appropriate calculus concepts and techniques to provide mathematical models of real-world situations and determine solutions to applied problems.
6. Evaluate definite integrals using the Fundamental Theorem of Calculus.
7. Articulate the relationship between derivatives and integrals using the Fundamental Theorem of Calculus.

GRADING

Final grades in this course will be based on the following scale:

A = 90%-100%

B = 80%-89%

C = 70%-79%

D = 60%-69%

F = 59% or Below

Grading: on a standard 100% scale:

- HW: 15%
- EXAMS: 4 @ 15% each
- FINAL: 25%

Disputed grades will only be changed if graded assignments are produced which indicate the recorded grade is erroneous.

Exams: There are 4 exams and a cumulative final. There will be no makeup exams. With proper documentation of a valid excuse for missing an exam, the % of your grade due to that exam will be rolled over into the cumulative final; absent such documentation a missed exam counts as a zero. If you know beforehand that you will be missing an exam, speak to me and we can arrange for you to take the exam **BEFOREHAND**.

Exam schedule:

- **Exams #1-#4** will be given on Mondays of the indicated weeks
- **Final** --- Monday, May 4th 10:30-12:30

Homework: will be assigned in class and is due as indicated, unless announced otherwise. No late homework will be accepted. You are free (encouraged, in fact) to work with others; however, each student must submit his/her own set of solutions. Occasionally, in-class projects/quizzes will be assigned and will count as a HW grade. I will drop the two lowest grades before computing your average.

The syllabus and schedule are subject to change.
