COURSE INFORMATION

Materials – Textbooks, Readings, Supplementary Readings:

There is no mandatory text. Supplementary readings may be assigned throughout the semester.

Materials: Students are required to supply Black and White Gelatin Silver printing paper, art paper for printing alternative process, as well as varying supplies as are required for the completion of assignments.

Course Description

Alternative Print Making is an intensive 15-week class, which exposes the student to Alternative photographic processes and printing.

This course examines non-traditional photographic techniques, including use of film and digital photography in non-silver processes. Alternative processes such as Cyanotype, Van Dyke, Gum Oil, Lumen Printing, Platinum, and Palladium will be explored. The student will learn varying processing and printing techniques and how they relate to

perception and content in alternative photographic processes. Beginning March 16, 2020, the course will be online and will concentrate on the history and practitioners of alternative processes. Students will be making photographs and submitting for review online.

Student Learning Outcomes

At the conclusion of this course students should be able to demonstrate the following:

- A basic understanding of basic historic camera design and construction.
- A basic understanding of tools and techniques used in a black and white wet darkroom.
- A working knowledge of several historic processes.
- A working knowledge of digital and analogue film production and processing.
- Effective critique techniques by participation in critical evaluation regarding your own work and the work of others.
- Have an understanding of professional presentation.

What's Expected of You, Generally:

Energy and enthusiasm in this class are vitally important, as is attendance. Please be prepared to share your experiences and ideas. Influences for discussion can come from anywhere: music, nature, writing, philosophy, personal experiences, etc. Class discussion and peer review are very important for everyone as artists, and this class should function in such a way for you to get the most from your classmates. This should be a fun and rewarding learning experience for all of us, please work and participate actively and steadily.

COURSE REQUIREMENTS

Minimal Technical Skills Needed

An understanding of basic camera exposure.

Instructional Methods

Instruction will consist of class lectures, demonstrations, and outside research. Guest speakers or visiting artists may also provide instruction. Instruction will also take place online and in video conferencing.

Student Responsibilities or Tips for Success in the Course

The syllabus/schedule are subject to change.

Completion of all assignments on time is key for success. Going beyond what is asked in class will result in both improved learning and improved satisfaction with the work. I cannot emphasize attendance enough. There will be demonstrations and instruction that if missed will make success difficult.

GRADING

Final grades in this course will be based on the following scale:

Critique 1: 25%

Critique 2: 25%

Research and essays as assigned: 25%

Final Portfolio review (online): 15%

Class Participation and attendance: 10%

You will develop a portfolio based on your weekly projects to be submitted. These will be submitted and critiqued using online resources after March 16.

There will be a final critique showcasing your best work of the semester. (15% of your grade)

Your final grade will also be based on class participation, attendance, and how well you complete the assignments.

Due Dates: All assignments and exercises are due on the date and time given by the instructor. Work that is late will result in a grade reduction by 10 percent. All work handed in after critique will be considered late, including partially completed assignments. It is your responsibility to inform the instructor of any problems that might make a project late well before the due date not five minutes before class begins.

Assessments

Photography projects, blogs, websites and final portfolios are graded based on a number of criteria. Is the work turned in on time? Does it solve the problem posed by the instructor? Is the work well-crafted (are there spots or dust on the prints, are the borders even? Is the print contrast correct?) Remember, neatness counts!

In addition to craft, excellent work is content driven; that is, the print goes beyond being pretty and well crafted. Excellent work is about something!

The syllabus/schedule are subject to change.

The “A” student will have attended all classes and participated (in a meaningful and relevant way) in the class discussions. They will turn projects in on time, and those projects will be clearly superior to the majority of those presented. Often the excellent student will do more than asked and may raise questions that challenge not only the students but also the instructor. Please understand that just by attending all classes and turning in all work does not guarantee you an “A”.

The “C” student will attend most of the classes and turn in a significant number of assignments on time. The work from the average student will look pretty much like the majority of work turned in; in other words it will look average. Average students contribute to class discussions, but may not do so consistently and/or with the same insight as the excellent student.

Please remember that the grade you receive is the grade you earn, not the grade that the instructor “gives” you.
