

# ASTR 1304-01W: Solar System

**COURSE SYLLABUS: SPRING 2020** 

#### INSTRUCTOR INFORMATION

Instructor: Dr. Matt A. Wood, Professor of Physics and Astronomy

Office Location: Room 340, McFarland Science Building

Office Hours: Tues, Wed, Thurs 1:30-2:30 p.m., or by appointment, but usually it will be

fine if you stop by my office for a quick question!

Office Phone: (903) 886-5486

University Email Address: Matt.Wood@tamuc.edu

Preferred Form of Communication: email or office visit

Communication Response Time: Before the end of the following business day

Preferred Pronouns: He/his

### **COURSE INFORMATION**

## Materials - Textbooks, Readings, Supplementary Readings

## Textbook(s) Required

21st Century Astronomy, 6th Edition with Smartwork5 Access by Kay, Palen & Blumenthal

Publisher website: <a href="https://wwnorton.com/books/9780393675498">https://wwnorton.com/books/9780393675498</a>

## **Software Required**

Subscription to Smartwork5

### **Optional Texts and/or Materials**

Headphones for listening to online videos

*Important:* You WILL need access to Smartwork5. New textbooks or ebooks come with Smartwork5 access. Used or rented books usually do NOT include access to Smartwork5. As of January 2020, Smartwork5 is available as a stand-alone purchase of \$35+tax for 360 day access.

## **Course Description**

### Hours: 3

A descriptive survey of the solar system specifically including the sun, planets and their satellites, comets, and other members of the solar system. The course will also examine the history of astronomy and the development of scientific tools for understanding the nature of the solar system.

Astronomy is an ancient science with records dating back to the dawn of civilization. Despite this long history, it remains an exciting and vibrant area of ongoing study. In the coming years, astronomers may discover Earth-sized planets around other stars, see the first stars emerging from the cosmic dawn, and explore new physics in realms and laboratories that Earth-bound scientists can only dream of.

In this course, we will focus on the Sun and its accompanying collection of planets, comets, asteroids, and other debris. We'll begin by studying the night sky and the history of astronomy. From the insights we gain in these topics, we will step out and study our Solar System. Along the way we will find ice volcanoes, temperatures ranging from near absolute zero to hot enough to melt lead, and potential places for life.

This course will not cover stars, cosmology, planetary systems around other stars, or extraterrestrial life. Stars and cosmology are covered in ASTR 1303; other planetary systems and life is covered in ASTR 120.

## **Student Learning Outcomes**

- 1. You will be able to explain how astronomers determined the true size, layout, and forces at play in our Solar System.
- You will be able to compare the properties of different objects in our Solar System.
- 3. You will be able to restate hypotheses concerning the origins of our Solar System.
- 4. You will be able to identify major bodies in the Solar System from pictures.

### **COURSE REQUIREMENTS**

#### **Minimal Technical Skills Needed**

You will need to be able to access myLEO Online, the new learning management system, and be able to learn how to use it. You should also be able to read PDF documents. You should be able to create either Microsoft Word documents (.docx) or plain text files. You must be familiar with Internet usage and safe browsing. You need to be able to watch YouTube videos on a computer.

### **How To Get Started**

## myLEO Online Access Information

This course uses myLEO Online, the new learning management system at A&M-Commerce. All materials, assignments, and resources will be made available through this system. To access this course, go to: <a href="http://myleoonline.tamuc.edu">http://myleoonline.tamuc.edu</a>. Log in with your myLEO account and password. Then click on the link to Fall 2019 – Solar System to get to our course.

## **How This Course Is Organized**

This course is organized into five Units, each of which includes two-to-three chapters in the text. At the end of each unit, there will be an exam on that material. In general, assignments will be due Sunday night at 11:59 p.m. For success DO start the work early in the week – if you're consistently waiting until the last minute, you will not get it done.

#### What Should You Do First?

After reading this syllabus, look around in the course site in myLeo Online and familiarize yourself with the resources and layout. Next, order the course materials if you haven't yet. Finally, begin complete the activities and assignments under Unit 1. Due dates are specified on myLeo Online (and will generally be Sundays at 11:59 p.m.).

#### **Instructional Methods**

This is an online course, and you can complete it without interacting with me directly at all if you choose, but I hope that's not what you choose. You will want to read the chapter material between Monday morning and Wednesday afternoon most weeks, and we'll have a YouSeeU Virtual Classroom session ("Class Live" for short) on Wednesdays at 7 p.m. During the class-live sessions, I'll talk through the week's material in PowerPoint decks, etc. These sessions will let us get together as a class (or at least as close as we can come to that), and for you to ask questions and discuss with your classmates and me what is going on. These sessions will be recorded, so if you miss one you can watch it later, but of course you won't be able to ask questions in the moment. I will also post the PowerPoint decks after the lectures.

You are responsible for completing all assignments on time, even if you have something come up in your personal life (another reason to get the work done well ahead of the Sunday 11:59 p.m. deadline) Note that I drop the lowest grade from most categories, so your reason for requesting an extension must be extraordinary (e.g., a death in your immediate family) – "I just forgot, can I have more time" results in that missed assignment being a zero that gets dropped. If you do that more than once, then you'll have a hard zero in the gradebook.

This course should not be terribly difficult if you put the time in. How much time is that? Well if this was a face-to-face course, you'd be in lecture for 3 hours a week, and you'd

probably spend another 3-6 hours a week studying and working on assignments. That's 6-9 hours a week. If you are self-disciplined and spend a minimum of 6 hours a week on this course, you can almost certainly earn a course grade of A. If you do everything at the last minute, then it will be difficult to learn the material well enough to earn a good grade. A significant fraction of students who take online classes fail them because they don't have good time management skills. Don't be that student!

My advice (and you really should implement it): Put a one-hour block on your calendar every day (e.g., Monday-Saturday 1-2 p.m.). During that hour you only work on this course: Reading, Homework, googling for things that the text wasn't clear enough about or that you just want to know more about, etc. During that hour every day, you don't check your social media, you don't answer texts (best to just put the phone on silent and hide it from yourself), you are working in a quiet room without distractions. When it is the end of your session, you're done for the day! Time to work on other classes, go to the gym, or go hang with your friends.

Two books I highly recommend that will make you a better student and more successful in life:

- Teach Students How to Learn by Saundra McGuire (amazon link) (\$20)
- Getting Things Done: The Art of Stress-Free Productivity by David Allen (<a href="mailto:amazon\_link">amazon\_link</a>) (\$13)

The first book will help you the most in being successful at school. Chances are you don't really know how to study such that you're learning (I didn't either as an undergraduate). You read books and PowerPoint slides, but it doesn't really sink in. McGuire's book will help you change your approach so you will actually learn and retain the information (the key is to study the material as if you're going to be the one teaching it).

The second book has sold over 1.5 million copies, and is so well known that if you read it and it really does help you improve your work flow and output, be sure to mention it during your job interview when you're moving out to the real world. If the person interviewing you knows of the book, they'll be impressed. Even if they don't, it shows that you're going the extra mile to be productive, and that's what companies want.

## **Exams**

Short exams will be given roughly every two or three week during the semester. These exams will focus on material covered since the previous exam. Your lowest exam grade will be weighted at 0.5 during grade calculations, but not dropped completely, and your highest exam will be weighted at 1.5 [example: you get 100's on all exams but miss one because you went to a sportsball event out of town. (100\*1.5 + 100 + 100 + 0\*0.5 = 450 out of 500, which is 90% or the bottom of the A range]. There will also be a cumulative final exam during the scheduled final exam slot; the final exam cannot be

dropped.

Exams for this online course will be open for 48 hours over a weekend (Saturday 12:00 a.m. to Sunday 11:59 p.m.). You must take the exam during this window – no exceptions. Once you start an exam, you must finish. You are allowed to use your notes and other class resources but should not use Chegg or Yahoo! Answers. Note that typically you'll be given about 2 minutes per question, so you really don't have time to look everything up if you come in to the exam not understanding the material.

#### Homework, aka Smartwork5

Smartwork5 is an online astronomy homework and tutoring tool. Its advantages are that Smartwork5 will give you instant feedback on whether you got a question right or wrong and provide you with hints and tools to better learn the material.

I call Smartwork5 assignments "homework;" each unit in a course will have its own Smartwork5 assignment. This means you should expect to see roughly one Smartwork5 assignments each week. If you do the homework and find you still don't understand something, you definitely want to ask me about that topic in an email or during a Class Live session.

The grading policy for each Smartwork5 assignment is shown in each assignment. You may get multiple attempts to answer a question correctly; however, submitting an incorrect answer will cost you some credit. Late homework is penalized 10% per day up to 7 days beyond the due date. After 7 days, you will receive a zero on the assignment. Any work not completed by the start of the finals week will also receive a zero.

The following are considered cheating and will not be tolerated: Directly copying text from a website or other printed source, obtaining copies of solutions to homework questions (whether from past students or other sources), directly copying another student's work, etc. See the section on "Academic Integrity" below for full details.

#### Extra Credit: (Maximum 3% course total)

The *only* extra credit available in this course are the three options below. If you fully complete an option, you will earn 1% extra credit on your total calculated grade. You may earn extra credit for each activity only once. There are <u>no other options</u> for extra credit. All extra credit must be completed and turned in by 11:59pm on Friday, November 29.

Visit me at my office or take a selfie outside my office: My office is Science Building 340. Come visit me if I'm there (knock on the door) or, if I'm not there, take a selfie that includes the sign outside my door and email me that. This encourages you to know where my office is so you're more likely to stop by for office hours, and also helps me to put a face to your name!

Visit a planetarium show: The A&M-Commerce Planetarium exhibits several

different shows every Friday night at 7pm and 8pm. Tickets are \$4 for children and university students (with ID), \$4.50 for senior citizens, and \$5 for adults. <a href="http://www.tamuc.edu/planetarium/">http://www.tamuc.edu/planetarium/</a> has a current listing of shows. Family of any age is welcome to the planetarium shows; be sure to check on the age-appropriateness of shows (all are rated appropriate for all audiences, but typically the 7pm show is aimed at children and the 8pm show at teens and adults).

If you attend a show, tell the staff that you are a member of this class. The staff will have class rosters; you are responsible for making sure the staff mark down that you attended.

Visit the Commerce Observatory: You will have two opportunities for a visit to the Commerce Observatory (about 5 miles south of Commerce). On two evenings (dates to be announced), we will have telescopes set up to look at planets and other interesting objects in the night sky. At each session, there will be an activity you must complete in order to earn extra credit. One visit is sufficient. Times and transportation options will be announced closer to the event.

## Student Responsibilities and Tips for Success in the Course

Students who do well in this course share most of the following common habits:

- Working on the course a little bit every day.
- Attending Class Live sessions and asking questions
- · Checking myLeo often for announcements and assignments
- Completing all assignments on time
- Asking for help and advice early in the semester
- Taking responsibility for their own grade.

#### GRADING

Final grades in this course will be based on the following scale:

A = 90%-100%

B = 80% - 89.99%

C = 70% - 79.99%

D = 60%-69.99%

F = 59.99% or Below

Grading is on an absolute scale with no competition. If you all earn an A, you all get an A. I may "curve" grades for specific assignments at my discretion; your percentage earned will never go down if I apply such a curve. Your current grades are available through the gradebook on myLEO Online – look for "Total Calculated Grade." The gradebook on Smartwork5 is <u>not</u> official.

Grades are based on a weighted system. The categories and weights are:

**Exams: 70%** 

Five Unit Exams: 10% each (50% total)

Final Exam: 20%

**Homework Assignments: 30%** 

### **TECHNOLOGY REQUIREMENTS**

#### **LMS**

All course sections offered by Texas A&M University-Commerce have a corresponding course shell in the myLeo Online Learning Management System (LMS). Below are technical requirements

## LMS Requirements:

https://community.brightspace.com/s/article/Brightspace-Platform-Requirements

## LMS Browser Support:

https://documentation.brightspace.com/EN/brightspace/requirements/all/browser\_support.htm

YouSeeU Virtual Classroom Requirements:

https://support.youseeu.com/hc/en-us/articles/115007031107-Basic-System-Requirements

#### **ACCESS AND NAVIGATION**

You will need your campus-wide ID (CWID) and password to log into the course. If you do not know your CWID or have forgotten your password, contact the Center for IT Excellence (CITE) at 903.468.6000 or <a href="https://example.com/helpdesk@tamuc.edu">helpdesk@tamuc.edu</a>.

**Note:** Personal computer and internet connection problems do not excuse the requirement to complete all course work in a timely and satisfactory manner. Each student needs to have a backup method to deal with these inevitable problems. These methods might include the availability of a backup PC at home or work, the temporary use of a computer at a friend's home, the local library, office service companies, Starbucks, a TAMUC campus open computer lab, etc.

#### COMMUNICATION AND SUPPORT

If you have any questions or are having difficulties with the course material, please contact your Instructor.

## **Technical Support**

If you are having technical difficulty with any part of Brightspace, please contact Brightspace Technical Support at 1-877-325-7778. Other support options can be found here:

https://community.brightspace.com/support/s/contactsupport

#### Interaction with Instructor Statement

#### Email:

I can be reached by email at <a href="Matt.Wood@tamuc.edu">Matt.Wood@tamuc.edu</a>. Please put "Solar System" in your email subject header. It may take me up to 24 hours to send you a response (and maybe next business day if a weekend or holiday). If you don't hear back from me in that time, please send another email or give me a call.

**Office Hours:** Office hours are available in both real-world and virtual formats (at the end of Class Live sessions). Office hours are times that I set aside when I promise to be in my office so that you can come by and talk to me. During real-world office hours, you can ask questions about the course material, ask about homework, see your current grade, or ask other questions about the class or astronomy in general.

It's important to realize that office hours are *not* just for students who are having problems in the course. If you are uncertain about <u>anything</u>, please visit, email, phone or drop into virtual hours before your small problems grow into big ones. If you are worried about what might be on the test, stop in. If you are curious about astronomy jobs and research opportunities, come by.

Office hours work best if you have your textbook, notes, and homework sets with you.

If you want to talk but cannot come during office hours, please contact me by email in order to set up an individual appointment. By setting an appointment, you both guarantee that I will be in my office (or online) and that I will have plenty of time to talk with you. You may feel free to stop by my office any time my door is open, but if you do not have an appointment and if it is not my scheduled office hours, please understand if I'm not free to talk at that instant.

### COURSE AND UNIVERSITY PROCEDURES/POLICIES

## **Course Specific Procedures/Policies**

#### **Academic integrity**

A major goal of this and most every university course is for you to learn and appreciate subject material. Academic dishonesty ("cheating") actively prevents you from achieving this goal. Academic dishonesty is taken seriously by the University and by me, and *will not be tolerated*. (See the TAMU-C Code of Student Conduct and the

TAMU-C Procedures A 13.04, 13.12, 13.31, and 13.32.)

This conduct is not only considered wrong in this course and at this University, but also in the real world. Engaging in these activities will get you fired from a job and prevent you from getting another job.

Unethical student conduct includes:

- <u>Plagiarism</u>, or copying the words of others with the intent of making it look like your own. Whether you use someone else's phrase word for word, or whether you try and change a few words, or even if you just borrow someone else's original idea and don't give them credit, that's unethical. Use your own words whenever possible, give credit to wherever you got an idea, and put direct quotes inside quotation marks.
- Cheating involves trying to trick me or others into thinking you did work that you really didn't do, or into thinking you know what you really don't know. This can include stealing exams, changing your answers on a graded exam or assignment and claiming it was graded wrongly, putting your name on someone else's homework, and so on.
- Searching the Internet for homework solutions and entering answers you find is considered cheating. Searching the Internet for help on a topic is okay. For example, suppose a question asks, "Describe the life cycle of a star that has the same mass as the sun." Typing that phrase into Google and cutting and pasting the text in the answer box is considered cheating. Typing "star life cycles" into Google, reading a few web pages, and summarizing the information in your own words is not cheating.
- <u>Borrowing a previous student's homework, exams, or solution sets is considered cheating</u>. "Borrowing" includes looking at someone's submitted homework, screen shots, stealing returned homeworks, and so on.
- Collusion is working with another person to cheat. This can include copying someone else's answers to an exam or assignment, doing work for another student, buying or otherwise obtaining homework/exam solutions from any source online or off-line, or any other instance of multiple people engaging in some form of cheating or dishonesty. Working with other students on an assignment is fine <u>as long as</u> everyone contributes and each student does their own work.
- Any other activity that, to a reasonable person, looks wrong. If you have
  any doubt whatsoever whether a certain action is considered dishonest, please
  ask me before engaging in the activity. There is no need to be embarrassed
  about asking, and I won't penalize you for asking! In this class, if you follow the
  maxim "it's easier to beg forgiveness than to ask permission", don't expect
  forgiveness to be forthcoming.

If you engage in academic dishonesty during any graded activity, you will receive no credit for that activity. More than one instance of dishonesty by a student will result in automatic failure of the course and referral of the student for disciplinary action. For further information, search the A&M-Commerce website for "academic integrity policy".

Smartwork5 and myLEO Online provide me with tools that check for common forms of online cheating and collusion. These include, but aren't limited to: time stamps, location stamps, and automated comparison of essay answers. I will use these tools.

#### **Administrative Withdrawal**

Although I have the right to drop you for excessive absences, I won't do so. You have a right to get an F if you decide to quit working but don't withdraw.

## **Assignment Policy and Due Dates**

Assignments and due dates will be posted in the MyLeo Online course calendar for each assignment. Submission requirements for each assignment will also be given on that page.

## **Dropping the Course**

You may drop this course by logging into your myLEO account and clicking on the hyperlink labeled 'Drop a class' from among the choices found under the myLEO section of the Web page. It is that easy. So if you give up early and bomb the first exam or two, please do drop the course for your own good. Grades of "F" are hard to recover from.

## **Harassment Policy**

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories such as race, national origin, etc. If you or someone you know has been harassed or assaulted, you can find the appropriate resources here:

University Title IX Contact: James Vanbebber, 903-886-5996, mailto:TitleIX@tamuc.edu

## University resource webpages:

University Counseling Center: 903-886-5145,

http://www.tamuc.edu/campusLife/campusServices/counselingCenter/default.aspx

Campus police: mailto:upd@tamuc.edu, call 911 in emergency situations

#### External resources:

Crisis center of NorthEast Texas: http://www.ccnetx.org

Know your IX: <a href="http://knowyourix.org">http://knowyourix.org</a>

End rape on campus: <a href="http://endrapeoncampus.org">http://endrapeoncampus.org</a>

Clery Center for Security on Campus: <a href="http://clerycenter.org">http://clerycenter.org</a>
Not Alone: <a href="http://changingourcampus.org/about-us/not-alone/">http://changingourcampus.org/about-us/not-alone/</a>

### **Incompletes**

I only offer incompletes in extraordinary circumstances. Any student interested in an incomplete should contact me as soon as possible after the situation arises, and should keep in mind that I am not required to give you an incomplete and so may not offer you the opportunity. You should also know that you only have access to a myLEO Online course for two weeks following the final day of term.

#### **Late Work**

Late assignments are penalized 10% for each day late (including weekends). After 7 days, late assignments will receive a zero. Exams may only be taken late by arrangement with the instructor, otherwise missed exams will receive a zero. The instructor has final discretion on whether to give a make-up exam. All work must be finished by the end of the day on the last day of classes.

#### **Technical Issues**

Personal computer problems do not excuse the requirement to complete all course work in a timely and satisfactory manner. Each student needs to have a backup method to deal with these inevitable problems. These methods might include the availability of a backup PC at home or work, the temporary use of a computer at a friend's home, the local library, office service companies, many restaurants, Interstate Rest Areas, etc.

## Syllabus Change Policy

The syllabus is a guide. Circumstances and events, such as student progress, may make it necessary for me to modify the syllabus during the semester.

## **University Specific Procedures**

### **Student Conduct**

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. The Code of Student Conduct is described in detail in the <a href="Student Guidebook">Student Guidebook</a>.
<a href="http://www.tamuc.edu/Admissions/oneStopShop/undergraduateAdmissions/studentGuidebook.as">http://www.tamuc.edu/Admissions/oneStopShop/undergraduateAdmissions/studentGuidebook.as</a>
<a href="px">px</a>

Students should also consult the Rules of Netiquette for more information regarding how to interact with students in an online forum: https://www.britannica.com/topic/netiquette

## **Academic Integrity**

Students at Texas A&M University-Commerce are expected to maintain high standards of integrity and honesty in all of their scholastic work. For more details and the definition of academic dishonesty see the following procedures:

<u>Undergraduate Academic Dishonesty 13.99.99.R0.03</u>

http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/13students/undergraduates/13.99.99.R0.03UndergraduateAcademicDishonesty.pdf

Graduate Student Academic Dishonesty 13.99.99.R0.10

http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/13students/graduate/13.99.99.R0.10GraduateStudentAcademicDishonesty.pdf

### Students with Disabilities-- ADA Statement

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:

## Office of Student Disability Resources and Services

Texas A&M University-Commerce Gee Library- Room 162 Phone (903) 886-5150 or (903) 886-5835 Fax (903) 468-8148

1 ax (303) 400-0140

Email: studentdisabilityservices@tamuc.edu

Website: Office of Student Disability Resources and Services

http://www.tamuc.edu/campusLife/campusServices/studentDisabilityResourcesAndServ

ices/

### **Nondiscrimination Notice**

Texas A&M University-Commerce will comply in the classroom, and in online courses, with all federal and state laws prohibiting discrimination and related retaliation on the basis of race, color, religion, sex, national origin, disability, age, genetic information or veteran status. Further, an environment free from discrimination on the basis of sexual orientation, gender identity, or gender expression will be maintained.

# **Campus Concealed Carry Statement**

Texas Senate Bill - 11 (Government Code 411.2031, et al.) authorizes the carrying of a concealed handgun in Texas A&M University-Commerce buildings only by persons who have been issued and are in possession of a Texas License to Carry a Handgun.

Qualified law enforcement officers or those who are otherwise authorized to carry a concealed handgun in the State of Texas are also permitted to do so. Pursuant to Penal Code (PC) 46.035 and A&M-Commerce Rule 34.06.02.R1, license holders may not carry a concealed handgun in restricted locations.

For a list of locations, please refer to the <u>Carrying Concealed Handguns On Campus</u> document and/or consult your event organizer.

### Web url:

http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/34SafetyOfEmployeesAndStudents/34.06.02.R1.pdf

Pursuant to PC 46.035, the open carrying of handguns is prohibited on all A&M-Commerce campuses. Report violations to the University Police Department at 903-886-5868 or 9-1-1.

## **COURSE OUTLINE / CALENDAR**

The course will cover the topics outlined below. The dates below may change, so pay attention to announcements for final due dates. There is an exam at the end of each Unit.

#### Unit 1:

Week 1: Introductions and Chapter 1: Thinking like an astronomer
 Week 2: Chapter 2: Patterns in the Sky – Motions of the Earth+Moon

Unit 2:

• Week 3 & 4: Chapter 3: Motion of Astronomical Bodies

• Week 5: Chapter 4: Gravity and Orbits

Unit 3:

Week 6: Chapter 6: The Tools of the Astronomer

Week 7: Chapter 7: The Formation of Planetary Systems
 Weeks 8&9: Chapter 8: The Terrestrial Planets and Earth's Moon

Unit 4:

• Weeks 10&11: Chapter 9: Atmospheres of the Terrestrial Planets

• Weeks 12&13: Chapter 10: Worlds of Gas and Liquid – the Giant Planets

Unit 5:

• Week 14: Chapter 11: Planetary Moons and Rings

Week 15: Chapter 12: Dwarf Planets and Small Solar System Bodies
