#### Course Description

Provides a study of research methodologies with appropriate practical application in relevant problem solving. Specific research types, including action research, will be emphasized. The student is required to demonstrate his or her competence in the investigation and formal reporting of a problem.

*The syllabus/schedule are subject to change.*

### Course Learning Outcomes (CLOs)

1. Understand basic concepts (e.g., purpose, literature review, and descriptive analysis) associated with common qualitative, quantitative, and mixed methods research designs;
2. Understand how to use basic concepts in analyzing a given research scenario and associated data, preparing a report of findings, and recommending additional research;
3. Understand how to use the APA style guidelines;
4. Develop autonomy in learning; and
5. Develop group work skills.

### Course Procedures

Students should access the course minimally every 2-3 days in order to check announcements and read the postings of colleagues. Students should check their TAMU-C e-mail daily to ensure timely receipt of messages from the instructor and University.

Submitted assignments should not have been submitted for any previous courses.

Students are expected to submit all assignments no later than their due dates/times. Any assignment submitted past the due date/time (i.e., by the end of the day, TAMU-C time, of the respective due date) will receive a zero without exception unless an extension is approved by the instructor *in advance of the due date/time* (note: a request for an extension in advance of the due date/time does not mean an extension is approved; *explicit approval before the due date/time is required to avoid a zero*). Exigencies will be handled on a case-by-case basis.

The syllabus is a guide. Circumstances and events, such as student progress, may make it necessary for the instructor to modify the syllabus during the semester. Any changes made to the syllabus will be announced in advance.

### Assignment Procedures

1. Students should work approximately 15 hours per week in completing course assignments.
2. Reading rate is approximately 9 minutes per page. Consult the following for study guidance:

Cornell College. (n.d.). *Reading a textbook for true understanding*. Retrieved from <https://www.cornellcollege.edu/academic-support-and-advising/academic-support/study-tips/reading-textbooks.shtml>

Discussion forums will be provided to post any comments or questions with respect to the assigned readings. Although these forums are not graded, students are encouraged to participate in these forums with the instructor (i.e., post, read postings, and reply to postings) in order to facilitate learning via discussion and build a sense of community.

3. Point distribution for graded assignments:

Quiz	40 points
Group PPT	40 points
Evaluation by Group Members	20 points

4. The quiz is an open book, open web exercise using a multiple choice format that will be sent to you via e-mail at or near the beginning of Period 3; thus, you will have essentially the entire period to complete the quiz. You must not work with anyone while completing the quiz (i.e., doing so will be a violation of academic integrity). You may e-mail the instructor requesting further clarification for specific quiz items who may post a response to the entire class in order to help everyone. **The completed quiz must be e-mailed to the instructor by the due date/time.** After the due date, the instructor will provide an answer key after which students should engage in further study to reconcile any conceptual difficulties; if after further study correct answers are still not understood, students should post a question to the instructor. Do not distribute the quiz to anyone outside of this course as it or its parts may be reused in future courses; such a distribution will be a violation of academic integrity.
5. The journal articles assigned for Period 4 will be posted to D2L in this period's content section.
6. Before or near the beginning of Period 5, the instructor will e-mail as well as post to D2L the names of students assigned to each group. In the Period 5 content section, an overview the research assignment and associated tasks will be posted in the document titled *Research Study Assignment* and its associated data in the Excel file titled *Research Scenario – Student Data.xlsx*. Students should follow the tasks as outlined in the Word document. **The PPT report must be e-mailed to the instructor by the due date/time.** The grading rubric for this PPT will be 60% content and 40% APA usage (includes grammar).

7. The group members for each individual will evaluate the individual's contribution to the discussion, analyses, and preparation of the PPT. These evaluations will be averaged in determining the 20-point evaluation grade.

## Technology Requirements

### Browser Support

D2L is committed to performing key application testing when new browser versions are released. New and updated functionality is also tested against the latest version of supported browsers. However, due to the frequency of some browser releases, D2L cannot guarantee that each browser version will perform as expected. If you encounter any issues with any of the browser versions listed in the tables below, contact D2L Support, who will determine the best course of action for resolution. Reported issues are prioritized by supported browsers and then maintenance browsers.

Supported browsers are the latest or most recent browser versions that are tested against new versions of D2L products. Customers can report problems and receive support for issues. For an optimal experience, D2L recommends using supported browsers with D2L products.

Maintenance browsers are older browser versions that are not tested extensively against new versions of D2L products. Customers can still report problems and receive support for critical issues; however, D2L does not guarantee all issues will be addressed. A maintenance browser becomes officially unsupported after one year.
