RECOMMENDED!

You will be expected to start to develop your own resource list in your research area. You should also include articles and resources that include ethical issues concerning research with your population/question under study. The reference list at the end of this syllabus may also provide some resources for your study.

Course Description

This course provides students with information on advanced techniques of practice and program assessment. Both qualitative and quantitative research designs are taught. Evaluation research design, instrument selection and development and techniques of data analysis are addressed. Ethical and behavioral issues in evaluation research are presented. Prerequisite: SWK 531 or admission to the Advanced Standing Program.

RELATIONSHIP TO OTHER COURSES:

This course stresses the importance of evidence-based theory and practice methods. Consequently, it supports the practice courses that emphasize the importance of demonstrating effectiveness in professional interventions. This course builds on research knowledge and skills learned in prior research methods courses taken in a student's BSW coursework or in the Foundation sequence. This course draws on materials from practice and HBSE to illustrate social work research principles and it develops a professional model that utilizes practice evaluation to formulate a continuous improvement cycle in professional practice. The course prepares students to develop an advance generalist model that is ultimately autonomous and self-correcting.

PROGRAM GOALS:

1. Prepare MSW graduates for professional advanced generalist practice that reflects application and integration of critical thinking, theoretical frameworks, and differential interventions.
2. Enable MSW graduates to apply ethical reasoning to advance equality, justice, and social change.
3. Promote leadership and service that is relevant to individual contexts of practice and enhances well-being and quality of life.

CORE COMPETENCIES

Council on Social Work Education (CSWE) requires a competency-based approach to identify and assess what students demonstrate in practice. In social work, this approach involves assessing students' ability to demonstrate the competencies identified in the educational policy. Students achieve programmatic goals listed above through demonstration of the following competencies for Advanced Generalist Practice (AGP). *Students achieve programmatic goals listed above through demonstration of the following **bolded competencies** for Advanced Generalist Practice (AGP).*

Competency AGP 2.1.1 Exemplify professional social work behavior and standards

Competency AGP 2.1.2 Apply social work ethical principles to resolve dilemmas and create positive change

Competency AGP 2.1.3 Critically analyze practice solutions and Communicate judgments and reasoning through decision-making processes

Competency AGP 2.1.4 Demonstrate the ability to build strengths based on mutual engagement with diverse populations

Competency AGP 2.1.5 Demonstrate commitment to strategies that address discrimination, reduce disparities, and promote social and economic justice

Competency AGP 2.1.6 Contribute to evidence-based best practice approaches to assess and improve effectiveness

Competency AGP 2.1.7 Differentially apply theories and frameworks of HBSE

Competency AGP 2.1.8 Promote social policies to improve service delivery systems

Competency AGP 2.1.9 Use leadership skills to respond, influence, and shape changing contexts

Competency AGP 2.1.10 Demonstrate autonomy in dynamic practice situations that involve:

2.1.10.1 Relationship-building at all levels of systems

2.1.10.2 Evidence-based assessment tools and intervention approaches

2.1.10.3 Effective intervention with complex problems and prevention strategies

2.1.10.4 Response to the feedback process from interventions

Competency AGP 2.1.11: Develop leadership skills as advanced generalist practitioners to enhance organizations and communities

Competency AGP 2.1.12: Demonstrate innovative problem-solving in social and organizational systems

Student Learning Outcomes (Practice Behaviors)

Each competency (outlined above) describes the knowledge, values, skills and cognitive and affective processes that comprise competency at the Advanced Generalist Practice (AGP) level. While content and activities of each course in the MSW curriculum covertly or overtly addresses each of the nine competencies, identified within each course is a set of specific practice behaviors representing observable components of one for more competencies. Content and Assessment in this course reflect the following practice behaviors:

AGP 1.6a Uses research and evaluation to assess intervention, efficacy and effectiveness

AGP 1.6b Develops and shares data to enhance best practices and professional knowledge

AGP1.6c Uses evidence-based research findings to improve practice

AGP 1.10j. Assesses, intervenes, and evaluates complex problems with all systems.

COURSE REQUIREMENTS

Minimal Technical Skills Needed

In this class students will utilize the learning management system (LMS) D2L for class engagement, accessing course resources and posting assignments, therefore students need to have basic understanding of the LMS tools. Additionally, students need basic knowledge in using Microsoft Word for creating and formatting assignments. Excel spreadsheet and Power Point software for assignment completion.

Instructional Methods

Course instruction is provided through both synchronous and asynchronous methods, with students having the opportunity to engage in weekly interactive, live class sessions with the instructor and peers; request one to one instruction as appropriate, along with discussion activities. Students will have access to pre-recorded lectures and assignment instructions each week.

Student Responsibilities or Tips for Success in the Course

Students are responsible for engaging in active learning. This means to be successful, students should take advantage of the live engagement opportunities (which include bi-weekly live class interactions; seeking guidance from instructor during live office hours each seek; and accessing course content, watching pre-recorded lectures and reading assigned content. Additionally, students should be proactive in completing assignments so as not to fall behind. Best practice is to log into D2L to read course announcements and feedback a minimum of 2-3 times a week; check university email daily, and actively interact with peers and the instructor. Each student is responsible for seeking guidance from the instructor when needed and notifying the instructor when challenges arise, and additional assistance may be needed.

GRADING

Final grades in this course will be based on the following scale:

- A = 90%-100%
- B = 80%-89%
- C = 70%-79%
- D = 60%-69%
- F = 59% or Below

Assessments

SWK 590 Assignments

1. **Single System Design Project** – Students will identify a problem area, implement an intervention, collect data and write up analysis on a classmate. This will include a 2-3 page review of relevant literature, written in APA format to support the chosen intervention. (100 pts)
 - a. Students are paired up and given time to explore an area for the SSD – **9/20**
 - b. Students must submit a statement of the problem, proposed intervention, chosen design and data collection method, and dates of implementation
 - c. Students must collect data over a period of at least 4 weeks -
 - d. Final report due on **11/15**

2. **Group Research Design:** Students will be placed into groups and given a topic. They will design an electronic survey using Google Survey and each student will send

out to family and friends. Data will be reviewed at the next class. (this will be for points) (50 pts)

3. Formal Project Plan: students will be given a topic and can choose to work in groups of no more than 3 or individually to develop a project plan that falls into the category of program/practice evaluation (group design – survey method) or community needs assessment and develop a formal plan to implement and carryout the investigation in a real-world setting. Students will implement and collect data that will be analyzed in SWK 595 and the final result will be a completed report suitable as an executive summary; report to stakeholders, and/or a research brief. (100 pts)

- a. Students must turn in a working outline for the literature review (supporting evidence and sources no later than: **10/18**)
- b. Students must turn in a working draft of the proposed method no later than: **11/08**
- c. Students must turn in draft documents of informed consent and data collection tools no later than: **11/22** – will be further refined and developed during an in class workshop, with mandatory attendance.

4. Worksheets: Students will be given worksheets throughout the semester to be completed for points. The possible points and number of worksheets will be determined as the semester progresses.

Policy on Due Date

(1) NO assignments will be accepted past the due date. If an assignment is not submitted by the specified due data and time, a 0 will be awarded. In the event of extenuating circumstances, (i.e. medical issues) and proper supporting documentation is provided, an arrangement between the instructor and student will be made for submission of assignments.

(2). ALL written assignments will be submitted in the correct drop box, online in Bright Space D2L by the due date and time. DO NOT email an assignment to me. In the hordes of email I receive daily, many get lost. It is your responsibility to know how and if your computer software is compatible with Bright Space D2L for uploading assignments.

TECHNOLOGY REQUIREMENTS

LMS

All course sections offered by Texas A&M University-Commerce have a corresponding course shell in the myLeo Online Learning Management System (LMS). Below are technical requirements

Pursuant to PC 46.035, the open carrying of handguns is prohibited on all A&M-Commerce campuses. Report violations to the University Police Department at 903-886-5868 or 9-1-1.

Department or Accrediting Agency Required Content

Engagement Policy

Final Evaluation and Grade Depends on both Classroom attendance and Participation

Inadequate participation or lack of required time commitment in each class significantly affects students' grades. No matter the course venue, students must engage in a comparable amount of time. Expectations of both Face-to-Face classes and those with Online components include time spent reading and studying course material.

To earn a level of competency within a specific course, students must demonstrate both mastery of content and active engagement.

Mastery of content areas is evidenced by successful completion of course assignments such as written papers, group project deliverables, tests/quizzes and other tangible products designed by instructors to evaluate knowledge and skills.

Additionally, the Social Work Profession is built upon human interactions and building human relationships – which is defined as engagement. Engagement is defined as meaningful involvement in interactions with instructor, peers, outside stakeholders as appropriate (such as contacting a social worker to interview for a required assignment). Within the classroom setting, whether virtual or F2F, students must actively participate in 80% of engagement activities as outlined by individual instructors. These activities can include participation in a live, synchronous virtual classes, attending a Face to Face course when appropriate, interacting with peers in posted discussions and collaborating in group interactive projects.

Students must meet standards for content mastery on tangible assignments and meet the threshold of active engagement 80% of the time during a semester. Instructors are experts in each course content area and set the standards for students to meet for successful completion of the course.

As we enter the Fall semester, we are all working under stresses and strains related to the COVID-19 pandemic. It is imperative we communicate consistently and frequently. If, for any reason, you are not able to complete assignments or actively engage in the course, you **MUST** reach out to your instructor and let him or her know.

Student Conduct

Students preparing to become professional social workers must adhere to the *University Code of Conduct*, *Department Code of Conduct* and *National Association of Social Workers' (NASW) Code of Ethics*.

University Code of Conduct located in the *Student Guide Book* at

<http://www.tamuc.edu/campuslife/documents/studentGuidebook.pdf> (pp 34- 66). On the University Website under Campus Life Documents

To become aware of University policies related to student academic and behavioral expectations for students refer to the Guidebook.

Department Code of Conduct

"Faculty have the authority to request students who exhibit inappropriate behavior to leave the class/lab/internship practicum or to block access to online courses and may refer offenses to the [Academic and Professional Issues Committee (API)] or to the Department Head. More serious offences by be referred to the University Police Department and/or the Judicial Affairs Office for disciplinary action" (Student Guidebook p 35)

Social Work students conduct themselves in an ethical and professional manner.

Closely linked with professional recognition is the social worker's compliance with the profession's ethical standards. It is imperative for professional social workers to be competent and ethical in practice if the profession is to maintain the public trust. It is essential that each social work student gain a thorough understanding of the ethical principles that guide practice and actively demonstrate in behavior, both in and out of the classroom. Student conduct is to reflect the tenets of *NASW Code of Ethics*

(located at <https://www.socialworkers.org/pubs/code/code.asp>) on the NASW website:
