Course Description

This course discusses the processes, methods, techniques and tools that organizations use to manage their information systems projects. The course covers a systematic methodology for initiating, planning, executing, controlling, and closing projects. This course assumes that project management in the modern organization is a complex team-based activity, where various types of technologies (including project management software as well as software to support group collaboration) are an inherent part of the project management process. This course also acknowledges that project management involves both the use of resources from within the firm, as well as contracted from outside the organization.

The syllabus/schedule are subject to change.

Student Learning Outcomes: Upon completion of the course, student should be able to

1. Students will be able to demonstrate Knowledge of project management concepts from project conception to successful execution
2. Students will be able to demonstrate an understanding of project management concepts and techniques by providing objective evidence through completing project scope and project tasks
3. Students will be able to demonstrate understanding of technical execution of program management including identifying project constraints, project risks, life cycle management, earned value (EV) and schedule management.

COURSE REQUIREMENTS

Minimal Technical Skills Needed

Using the learning management system and using Microsoft Excel and PowerPoint.

Student Responsibilities

The University expects regular attendance by students in each course (whether in class or web based). Class attendance/participation is useful to the student as a means of acquiring knowledge and clarification. Frequent access to the course content and material is expected (both online and face/face classes). The instructor has access to login metrics for each student. Class participation is the active engagement in questions and answers, taking part in analyses of business situations, and contribution to material addressed in class. Additionally, students should check their official university email daily for information and guidance that may be provided by the course instructor.

GRADING

Final grades in this course will be based on the following scale:

A = 90%-100%

B = 80%-89%

C = 70%-79%

D = 60%-69%

F = 59% or Below

Assessments

The final grade is based on the following criteria.

Assignments/ Tests	Percentage
Individual Class Project	30%
Exams (2@10%)	20%

The syllabus/schedule are subject to change.

Mis Term	20%
Final exam	30%

Chapter questions will be reviewed at the end of each topic discussion/lecture. These questions will form the bases for the exam questions. There are two exams, each worth 50% of the 20% for the exam weighting distribution. There is a midterm exam worth 20% and final exam worth 30% for each respective grade weighting distribution. Exams will consist of multiple-choice format but may include short answer or fill-in-the blank questions. Exams are always timed so preparation and familiarity with the material is important. The focus of the questions is on the course material but may include material from lectures, discussions, and chapter review questions.

Additionally, there is a class application project that uses material discussed in class in meeting all project requirements. The class project is worth 30% of the grade weighting distribution. Class projects are individual projects. **Using someone else's words or ideas as if they were your own is plagiarism and fall within the academic integrity guidelines as noted below.** All class projects submitted will be evaluated for authorship.

Late projects are highly discouraged. A penalty of 15% per day (including weekends) will be assessed on late projects. Under NO circumstances will projects more than two days late be accepted.

Of note: All project deadlines and exam times are US Central Time Zone. Please note that D2L will have a due date and end date noted for the class project and exam. The due date in D2L is when the project is due as noted within the document and the end date in D2L is when the project closes and the student will not be allowed to submit.

TECHNOLOGY REQUIREMENTS

Browser support

D2L is committed to performing key application testing when new browser versions are released. New and updated functionality is also tested against the latest version of supported browsers. However, due to the frequency of some browser releases, D2L cannot guarantee that each browser version will perform as expected. If you encounter any issues with any of the browser versions listed in the tables below, contact D2L Support, who will determine the best course of action for resolution. Reported issues are prioritized by supported browsers and then maintenance browsers.

Supported browsers are the latest or most recent browser versions that are tested against new versions of D2L products. Customers can report problems and receive support for issues. For an optimal experience, D2L recommends using supported browsers with D2L products.

Maintenance browsers are older browser versions that are not tested extensively against new versions of D2L products. Customers can still report problems and receive

The University's Pandemic Response

The syllabus/schedule are subject to change.

A&M-Commerce requires the use of face-coverings in all instructional and research classrooms/laboratories. Exceptions may be made by faculty where warranted. Faculty have management over their classrooms. Students not using face-coverings can be required to leave class. Repetitive refusal to comply can be reported to the Office of Students' Rights and Responsibilities as a violation of the student Code of Conduct. "Students should not attend class when ill or after exposure to anyone with a communicable illness. Communicate such instances directly with your instructor. Faculty will work to support the student getting access to missed content or completing missed assignments.

The syllabus/schedule are subject to change.
