COURSE OUTLINE AND EXPECTATIONS

DESIGN OF THE CLASS

This class is designed on constructivist principles. This means that the instructor creates an environment for learning by providing focus and guidance to the content. Assignments are designed to be learning experiences for students, and it is presumed and expected that students actively participate in the class through the construction of their own learning. As a graduate level course, the instructor expects quality work from each student supported by adequate preparation and involvement.

CLASS PARTICIPATION

Given the constructivist design of the class, this course will be interactive. It is my expectation that all students participate fully for all activities and assignments in order to maximize their learning experience. This web-based course will be made up of several learning activities including (but not limited to) lecture notes and clarification, reflection activities, individual learning activities, written papers. Students must be prepared to lead and/or enter discussions, to ask relevant questions, and to share the results of their study and reflection. This means that each student should be (1) conscious of the class schedule and the requirements for each class (knowing what to be prepared for), (2) self-disciplined (spending time to be fully prepared), and (3) eager to share with your classmates (participating actively by sharing what you have prepared).

ONLINE CLASS ENVIRONMENT

Please practice courtesy, respect the opinions of others, be positive in speech and effort, encourage your classmates, respect confidentiality, and support each other's learning.
