COURSE INFORMATION

Required Text Book: Principles of Biochemistry, 5th edition, Authors: Horton, Moran, et. al., ISBN: 978-0-321-70733-8

Course Description: This is a one-semester biochemistry course that serves as an introduction to the nomenclature and function of the major classes of molecules associated with living organisms. The subject matter is tailored for students interested in pharmacy, dentistry, medicine, and related health science disciplines that need a lecture course in biochemistry with no laboratory. The course topics will be presented along with examples where basic knowledge in the field of biochemistry is relevant for the practice of modern medicinal chemistry and pharmacy.

Course Definition

Structure and function of large and small biomolecules involved in metabolism and information transfer in living organisms. The course treats both chemical and biological processes and their mechanisms. For students majoring in health-related disciplines but not requiring an accompanying laboratory.

Credits: 3 Course Credits

Prerequisites or Co-requisites: Prerequisites: BSC 101 Minimum Grade C or BSC 1406 (Minimum Grade C) and BSC 102 Minimum Grade C or BSC 1407 (Minimum Grade C) and CHEM 212 or CHEM 2323/2123 (Minimum Grade C).

Student Learning Outcomes (SLO): The main objectives of this course are to provide a basic foundation and understanding of the principles of modern biochemistry necessary for further work in the biochemical/biomedical areas. Unlike much earlier chemistry, the material is often conceptually complex and not yet amenable to straightforward mathematical interpretation. Accordingly, the students may find the material more heavily descriptive than in their earlier chemical studies. By the end of this course, the students will have a better understanding of the structure and function of the biological macromolecules its metabolism and biosynthesis.

At the completion of this course students will be able to:

- Identify various biomolecules (amino acids, nucleotides, sugars, fatty acids).
- Understand complex biomolecule structure (proteins, nucleic acids, carbohydrates, lipids).
- Understand the concept of metabolic pathways relative to the synthesis of biomolecules.
- Understand the function of enzymes, their mechanisms and how their importance to the concept of metabolism.
- Comprehension of membrane structure and function.
- Understand key metabolic pathways such as glycolysis, gluconeogenesis and the citric acid cycle.
- Be able to relate the importance of biochemical concepts to other scientific disciplines as well as to its role in daily lives.

COURSE REQUIREMENTS

ATTENDANCE POLICY

All students are expected to attend online classes on a regular basis. According to the TAMU-Commerce Procedure A13.02, if a student has excessive absences, the instructor may drop the student from the course. The instructor will only excuse an absence if the student provides, with appropriate document, an excusable reason allowed by the TAMU-Commerce Procedure A13.02.

Instructional Methods: Online setting. Course structure will involve assessment-using exams at designated dates during the semester.

Student Responsibilities for Success in Course: Students should review notes daily and become familiar with basic concepts of biochemistry as presented to them. Waiting until the day before the exam to study the material covered is not a successful approach.

Exams

For students enrolled in CHEM 314, your final grade will be based on your performance in 3 out of 4 exams (25% each) and the final exam (25%). Your course grade will be based on 3 online exams (0.25 x exam grade) out of 4 representing 75% of your total course grade. The final comprehensive examination will represent 25% of your course grade (0.25 x final exam grade). The exams will contain a mix of objective and subjective question (multiple-choice questions, true-false questions, long (explanation) questions, short (formulas and definitions) questions and graphical/diagrammatic questions. *No make-up exams will be allowed since you will be allowed to drop one of the first 4 exams during the semester.* **Extra credit assignments will NOT be provided during this course. The last day to drop with a Q grade is Friday, March 31.**

GRADING

Final grades in this course will be based on the following scale:

- A = 90%-100%
- B = 80%-89%
- C = 70%-79%
- D = 60%-69%
- F = 59% or below

A = 90-100 points
 B = 80-89 points
 C = 70-79 points
 D = 60-69 points
 F = 59 points or below

ACCESS AND NAVIGATION

You will need your campus-wide ID (CWID) and password to log into the course. If you do not know your CWID or have forgotten your password, contact the Center for IT Excellence (CITE) at 903.468.6000 or helpdesk@tamuc.edu.

Note: Personal computer and internet connection problems do not excuse the requirement to complete all course work in a timely and satisfactory manner. Each student needs to have a backup method to deal with these inevitable problems. These methods might include the availability of a backup PC at home or work, the temporary use of a computer at a friend's home, the local library, office service companies, Starbucks, a TAMUC campus open computer lab, etc.

COMMUNICATION AND SUPPORT

The best way to communicate with the instructor is via e-mail: thomas.west@tamuc.edu.
