### **Course Description**

COUN 514. *School Counseling and Development*. Three semester hours.

As the foundation course for those planning to enter the school counseling profession, this course covers history and development; models of programs, P-12 career development, and collaboration and consultation; advocacy for counseling roles; mental health and behavioral disorders; legal and ethical considerations; and use of data to inform and advocate for programs and students as they specifically relate to school counseling. The course is recommended for non-counselor educational professionals as well.

### **Prerequisites**

COUN 501 & 510 or consent of instructor

### **General Course Information**

This course is required for all students seeking master's degrees with the school counseling focus and all students seeking school counselor certification in Texas. It is designed to support professional school counseling students in transferring theory into practice. In this course, students will learn specific skills that can be applied to facilitating and coordinating a developmental, comprehensive professional school counseling program. A comprehensive, developmental school counseling program includes the following counselor-related tasks and responsibilities: (a) use of technology; (b) appropriate employment of assessment; (c) the provision of structured counseling groups, psychoeducational groups, crisis interventions, consultation services, and peer mediation; (d) availability of ethical and legal counseling services to all students (e.g., child abuse/neglect, substance abuse related issues, behavioral disorders, discipline issues, counseling with special populations, etc.); (e) community collaboration/partnership; and (f) advocacy for systemic and social change. Students will gain experience in designing materials for both counseling and psychoeducational (classroom guidance) groups and special programs. Additionally, students will develop an understanding of the broad range of services that need to be provided by professional school counselors. A primary purpose of COUN 514 is to broaden students' perspective of the professional school counselor's role to include activities beyond individual and group counseling and the traditional "Comprehensive School Counseling Program" model. This course is designed to provide students with practical skills and knowledge that can be applied to PK-12 school settings. Focus will be on the school counselor's role in promoting students' academic, career, along with social and emotional development; working with social, school, and organizational systems; and designing and implementing preventive, interventional, and treatment programs for all students.

## COURSE REQUIREMENTS

### Minimal Technical Skills Needed

In this class, you will utilize the Learning Management System (LMS) entitled D2L for portions of instructional and learning methods, submitting assignments, participating in online discussions, and completing quizzes. You will need to utilize other technologies such as Microsoft Word, PowerPoint, etc. If you have issues with this system, it is your responsibility to contact the help desk immediately.

### Instructional Methods

This is an online class - it is important to schedule your time wisely. It is expected that the completion of this course will take the same amount of time as if it were being taken face-to-face. However, how you spend that time will be different from student to student. You will be expected to participate and complete all online tasks via D2L.

### Student Responsibilities or Tips for Success in the Course

As a student in this course, you are responsible for the active learning process. Expectations of this course include the following:
