### COURSE INFORMATION

## Textbook(s) Required

SQL Queries for Mere Mortals: A Hands-On Guide to Data Manipulation in SQL (4th Edition)

by Viescas, Hernandez ISBN: 978-0134858333

# Software Required

*MySQL* will be utilized <u>and is required</u> as the database tool in this course. MySQL is a free open source software product. More information is provided in the D2L course content folder.

# **Course Description**

This course introduces students to core concepts in data and information management. The focus is on identifying organizational information requirements, modeling them using conceptual data modeling techniques, converting the conceptual data models into relational data models and implementing and utilizing a relational database.

# Student Learning Outcomes

1. Students will understand the process of translating data into information using logical analysis and creating a database model which will implement a desired result

- 2. Students will use SQL in implementing database prototypes in a database management system such as MySQL for manipulating data in deriving information
- 3. Students will be able to use SQL to retrieve data and perform simple data analysis in solving organizational requirements in assisting management to make better decisions.

### **COURSE REQUIREMENTS**

### Minimal Technical Skills Needed

Using the Learning Management System, Microsoft Office Tools, and MySQL.

### Instructional Methods

This course uses lecture/discussion videos (see technical section below), Microsoft Power Point (lecture and tutorial slides), outside learning sources, MySQL assignments, and learning management system (see technical section below) including virtual sessions for course content, lab support, and office hours. Supplemental videos and documents will be provided to help reinforce course content.

## Student Responsibilities

The University expects regular attendance by students in each course (whether in class or web based). Class attendance/participation is useful to the student as a means of acquiring knowledge and clarification. Frequent access to the course content and material is expected (both online and face/face classes). The instructor has access to login metrics for each student. Class participation is the active engagement in questions and answers, taking part in analyses of business situations, and contribution to material addressed in class. Additionally, students should check their official university email daily for information and guidance that may be provided by the course instructor.

# **GRADING**

Final grades in this course will be based on the following scale:

A = 90%-100%

B = 80% - 89%

C = 70%-79%

D = 60% - 69%

F = 59% or Below

The four criteria used to determine the grades earned for the course are as follows:

Assignments/Tests	Percentage
Assignments	35%
Exam 1	20%
Exam 2	20%
Final Exam	25%
	100%

### **Assessments**

There are 8 assignments <u>planned</u> which include both material assignments directly relating to the content material in the course and application assignments which provide the student an opportunity to apply data to information translation exercises using MySQL. Each assignment is 12.5% of the 35% for the assignments weighting distribution. Descriptions of the assignments will be posted as they are assigned. All assignments are individual assignments and are to be the result of the student's own work. **Using someone else's words/code or ideas as if they were your own is plagiarism and fall within the academic integrity guidelines as noted below. All SQL files submitted will be evaluated for authorship. Each student will have at least one week to complete each assignment. These assignments give the student an opportunity to apply what they have learned in each chapter module. Note: Compliant with COB Student Learning Objective 5: Students will be analytical problem solvers in business environments.** 

Late assignments are highly discouraged. A penalty of 15% per day (including weekends) will be assessed on late assignments. Under NO circumstances will assignments more than two days late be accepted. No extra credit assignments are available.

Of note: All assignment due dates, project deadlines, and exam times are US Central Time Zone. Please note that D2L will have a due date and end date noted for each assignment and exam. The due date in D2L is when the assignment is due as noted within the document and the end date in D2L is when the assignment closes and the student will not be allowed to submit.

There are two exams, each worth 20% for the exam weighting distribution. And there is a final exam worth 25% for the weighting distribution. Exams will consist of multiple-choice format but may include short answer or fill-in-the blank questions. Exams are always timed so preparation and familiarity with the material is important. The focus of the questions is on the course material but may include material from lectures, discussions, and assignments not covered by the textbook references.

### TECHNOLOGY REQUIREMENTS

### **LMS**

All course sections offered by Texas A&M University-Commerce have a corresponding course shell in the myLeo Online Learning Management System (LMS). Below are technical requirements

### LMS Requirements:
