John W. Santrock (2019) Lifespan Development (18th ed.) McGraw Hill. ISBN: 9781260245844

***Course Description***

Understanding Human Development is a developmental psychology course that examines the changes, both growth and decline, across the human lifespan from conception to death. It includes physical, cognitive, and socioemotional changes that help to shape our lives. Topics include the importance of the prenatal environment on development, formation of language, self-esteem and identity, romantic relationships, retirement, and dying. What you will find is that our journey through life is incredible –from learning to walk to compensating for physical declines in later life.

Throughout the course, you should keep several major questions in mind:

1. What is development, and how can it be measured?
2. What are guiding theories, themes, and principles in the field of developmental psychology?
3. How are these principles applied in extant research?
4. How do social and biological factors jointly influence development?
5. What key theoretical and methodological issues need to be taken into account when designing developmental studies?

***Student Learning Outcomes***

Students will be able to discuss:

1. Theories of individual development and transitions across the life-span (including cognitive, emotional, social, physical, and moral)
2. Theories of family development and transitions across the life-span
3. Theories of learning and personality development

4. Human behavior including an understanding of developmental crises, disability, exceptional behavior, addictive behavior, psychopathology, and situational and environmental factors that affect both normal and abnormal behavior
5. Strategies for facilitating optimum development over the life-span
6. Ethical and legal considerations related to human growth and development.

## **COURSE REQUIREMENTS**

### ***Minimal Technical Skills Needed***

This course will use D2L.

### ***Instructional Methods***

Video and textual lecture summaries and other supplemental course materials will be posted in D2L. Students will use these materials with the assigned reading to prepare for course assessments. Assessments will include quizzes, exams, and participation in online discussions. This online course contains the same content you'd expect in a traditional 15-week face-to-face version. You should plan on spending approximately 6-10 hours per week reading, viewing course content, completing course assignments, and participating in discussions.

### ***Student Responsibilities or Tips for Success in the Course***

Read the textbook. View the online materials. Complete all quizzes, exams, and discussion posts. Start your assignments early and edit them before submission. Check your LeoMail and log into D2L EVERY DAY. Important class announcements will be made via email and posted on D2L.

**Broken Link Policy:** Online content is checked in advance, but in rare cases a link may stop working mid-week. If a link is no longer working, notify the instructor immediately and no later than 24 hours prior to the chapter due date. Any broken links will be remedied and announced in D2L, and therefore no adjustments will be made to student grades if this occurs.

## **GRADING**

Final grades in this course will be based on the following scale: A = 90%-100%

B = 80%-89%

C = 70%-79%

D = 60%-69%

F = 59% or Below

### **QUIZZES (2% each)**

It is helpful for you to read the assigned chapters in the textbook before class. To “encourage” that behavior, you will be required to complete online quizzes. These will be available on D2L and will cover the *readings assigned for that week*. There will be a total of 14 quizzes.

**All quizzes are due at 11:30 pm CT on the due date (see topic schedule).**

### ***Exams (8% each)***

There will be six non-cumulative exams. Each worth 8% of your overall grade in the course, for a total of 48% of your overall grade. Exams will consist of multiple-choice questions over the text book and assigned readings.

***All Exams are due at 11:30 pm CT on the due date (see topic schedule).***

***Discussion Posts (6% each)***

There will be 6 discussion posts. The two posts with the lowest score will be dropped. Each of the remaining 4 discussion posts will add up to 24% of your overall grade in the course.

Discussion posts will be submitted under “Discussions” in D2L. This means you will be able to read and comment on other students’ essays, but you are not *required* to comment on them. Posts should include insightful ideas and comments that are complete and well explained as well as defended by specific evidence. Note that such defense does not require direct quotation from sources – use your own ideas and words.

Posts must demonstrate that the student has reviewed, understood, and contemplated the material from the chapter and other assigned readings. You may include information from other chapters and outside knowledge but it must be cited appropriately. However, if you **ONLY** cite outside sources, then I will assume that you have not read the required readings for the course. In short, outside info is encouraged but not required. You must show me what you learned in **THIS** course too. If the discussion post contains multiple parts, be sure to address each.

**All Discussion posts are due at 11:30 pm CT on the due date (see topic schedule).**

Essays will be graded using the following rubric:

5 = Excellent: well written with lots of good ideas that are all well-defended by references to the course content.

4 = Good/complete: essays with some good ideas and references to the course content. Note that this is a passing grade and not one you should be upset about. However, it means that I think you can take your essay to the “next level” if you add more content and dig deeper into your ideas. You will receive feedback on this and typically some examples or pointers to how you could accomplish this.

1-3 = Insufficient: essays with incorrect or insufficient information. Missing or minimal references to the course content. Note that this a failing grade and beneath the expectations of a graduate student. You will receive feedback on why your essay did not meet the course standards.

0 = Missing: you did not complete the assignment by the due date.

Grades in between these categories (e.g., 4.5) may also be used if warranted.

## **TECHNOLOGY REQUIREMENTS**

### **Browser support**

D2L is committed to performing key application testing when new browser versions are released. New and updated functionality is also tested against the latest version of supported browsers.

However, due to the frequency of some browser releases, D2L cannot guarantee that each browser version will perform as expected. If you encounter any issues with any of the browser versions listed in the tables below, contact D2L Support, who will determine the best course of action for resolution. Reported issues are prioritized by supported browsers and then maintenance browsers.

Supported browsers are the latest or most recent browser versions that are tested against new versions of D2L products. Customers can report problems and receive support for issues. For an optimal experience, D2L recommends using supported browsers with D2L products.

Maintenance browsers are older browser versions that are not tested extensively against new versions of D2L products. Customers can still report problems and receive support for critical issues; however, D2L does not guarantee all issues will be addressed. A maintenance browser becomes officially unsupported after one year.

Note the following:

- Ensure that your browser has JavaScript and Cookies enabled.
- For desktop systems, you must have Adobe Flash Player 10.1 or greater.
- The Brightspace Support features are now optimized for production environments when using the Google Chrome browser, Apple Safari browser, Microsoft Edge browser, Microsoft Internet Explorer browser, and Mozilla Firefox browsers.
