Case Discussions

For this class we will be using **Zoom** at times during the summer semester to discuss the chapters and case assignments, however we will mostly be having a weekly or bi-weekly case discussion via the Discussion tab of each unit so everyone has the ability to respond to the question/topic being covered in that unit. Participation in the case discussion for each chapter (unit) is **mandatory** and everyone is expected to provide insightful comments and recommendations as well as respond to at **least one other student's response**. This does NOT mean simply responding "I agree or disagree" but providing an explanation/ reasoning as to your answer. Please watch for **announcements** in D2L and in emails for reminders relating to the discussions and class live sessions and any other requirements. **All discussion postings need to be posted at the latest 2 days before the due date in order to give everyone a chance to post a response to other students' comments.**

Article Discussion Postings

You will be required to read a few articles related to the topics discussed in some of the chapters. A list of articles will be assigned at the beginning of the semester and will be available for you in the course content section of the course. You will need to respond to the question(s) asked related to these readings in the discussion tab that is created for each chapter. Please note that NOT all chapters have assigned readings. I will be sending out reminders regarding these assignments.

Examinations:

Two exams will be given during the semester. The exams will cover specific chapters as we cover the material during the semester. The exams will be similar to the homework and cases discussed in class. There are **no** make-ups for the two exams. If you plan to miss an exam due to extenuating circumstances, you must notify the professor **prior** to the exam to set up a time to take the exam.

Research Paper:

Each student will be required to write a research paper on an ethical dilemma. The purpose of the research paper is to engage students in ethical issues pertinent to business and the accounting profession. You may choose the topic you wish to write about however please refrain from using Enron, WorldCom, Lehman Brothers, Freddie Mac, Fannie Mae and Waste Management as these cases are already widely discussed today. You will need to get approval from the Professor on your choice of topic. The paper should discuss the ethical

dilemma, the effect and consequences of the ethical act and the outcome of the case. You must use at least two of the ethical theories discussed in class to explain the reason and circumstances the individuals involved were able to commit the unethical acts that took place. In addition, you should provide recommendations on how to reduce the likelihood of the unethical scenarios occurring in the future. Sample research papers will be provided in D2L so you are aware of the expectations of the paper. **There will be a 10 point penalty for all research papers submitted late.**

Undergraduate students will prepare a 8 to 12 page paper including references. The document should use a font size of 12 and one-inch margins and be double spaced. It should include an Abstract and Conclusion section within the paper. Graduate students are expected to use proper grammar and English language. If English is not your first language, please make sure to have it proof-read. You have the option of sending a draft for me to review and provide feedback before you submit the final research paper at the end of the semester.

Students are expected to use electronic means such as databases and journal articles to research their relevant topic. Several theories will also be explained throughout the semester so students are expected to use these theories to support their reasoning and arguments related to the ethical dilemma being researched. The paper must demonstrate a mastery of the basic writing mechanics, be free of grammatical errors and supported by proper references. Please follow APA guidelines when writing the research paper. Wikipedia and Investopedia are not proper academic sources therefore academic research articles should be your main source of research support. All papers will be submitted through Turnitin in D2L via the drop box. Papers in excess of 15% of originality will not be accepted.
