Dr. Stephen Starnes  
Email: Stephen.Starnes@tamuc.edu

Office: Science 339  
Phone: 903-886-5389

**Course Time Zone:** Central Time USA

**Online Office Hours:** I will schedule 1 hour a week during which you can ask questions live via the video conferencing service Zoom. For Summer 2022. If you are on campus, you can schedule a time to come by my office for help if needed.

**Course Materials**

Text: same as lecture *Organic Chemistry, 8<sup>th</sup> Ed.*, L. G. Wade, Jr. ISBN-13: 978-0321768414  
\*\* The newest edition is the 9<sup>th</sup> edition but I am fine with you using an older edition of the text to reduce your textbook cost, 9<sup>th</sup> edition: ISBN-13: 978-0321971371

A molecular model set is recommended. I suggest the Molecular Visions Organic Model Kit by Darling Models, Inc. which can be found used for ~ \$20.00 (I have this set and find it very useful and convenient to use). Note that models may also be used during exams.

The details of the course structure are given below. Any changes will be communicated via email and announcement on MyLeo Online. Your TAMUC email account will be used at all times, and it will be your responsibility to check it regularly (at least once every 24 hours).

**Grading**

Your course grade will be based on your completion and submission of all worksheets and assignments posted to D2L. You can work in a group so that you can work together on the worksheets. Once you have completed your worksheet, scan and upload it to the D2L assignments folder. Each worksheet will be due 48 hours after it has been released for you to work on.

You will be able to make multiple submissions of your daily worksheet but only the most recent submission will be graded. After everyone submits their worksheet, I will e-mail out a key to a worksheet.

**There will be absolutely no make-ups for missed class assignments. You must work diligently to complete the lesson for each day.**

The last drop date for the course is *June 30, 2022*. Incomplete grades may be given only if the student has a current average  $\geq 70\%$  and is precluded from completion of the course by a documented illness or family crisis.

## Learning Outcomes / Course Objectives

The intent of the course is for you to work in small groups to complete the lesson for that day. You are encouraged to work together as a team to answer the questions posed in the lesson. Thus, you are highly encouraged to discuss, with your group members, the lesson and the answers to the questions posed. The instructor for the course is not present to answer the questions for you. Rather, the instructor is present to guide you in your learning efforts. Learning outcomes for the course include:

1. Students completing the course will be better equipped to work in a team environment to solve scientific problems. The teamwork in this course will improve:
  - A. communication skills and leadership skills
  - B. problem solving abilities
  - C. problem solving strategies.
2. Students completing the course will better understand the course content of Chemistry 2323, which should significantly improve student performance in Chemistry 2323.
