## COURSE REQUIREMENTS

### Minimal Technical Skills Needed

Knowledge of data structures and programming concepts

### Instructional Methods

This is a web based course which will require you to have a PC and access to the internet. You can also access this course in any computer lab on campus.

## Student Responsibilities or Tips for Success in the Course

### Instructor Availability:

To communicate with me about this course you are to use the email address on this syllabus. Please include the course number/name in the beginning of the subject field for every email message (**see the top of the first page of this syllabus for more information**). **Email messages that are missing this information are likely to be automatically redirected to a folder the instructor will seldom check, or will possibly be deleted.** During the week, you can generally expect a response to your emails within a day, though sometimes it may take longer. I do not normally log on over the weekends. If you email me a question on Friday afternoon, I may not read that email until Monday morning. You can also call me at my office (prefer an email) or stop by my office during office hours.

**Unless otherwise specified**, all assignments are individual assignments, and thus must be completely the original work of the student submitting them.

### Sharing Your Work

All work produced by students may be shared by the instructor with the class for purposes of example and training. Such work will be as anonymous as possible. Finally, the instructor may share your work anonymously with future classes or in his own writing and research.

*The syllabus/schedule are subject to change.*

### Submitting Assignments:

Unless special instructions are provided, assignments are **NOT** to be posted on any discussion board. Your completed work must be placed in the appropriate **Dropbox** in D2L Online. **DO NOT EMAIL ME ANY ASSIGNMENTS AS THEY WILL BE DELETED.** Please follow the rules for naming and posting assignments.

**Exams:** You will have a midterm exam during this course. Material over which the exam will be tested will be available on line. The Exam will be online. ***The exam is not a team assignment and there will be no make-up for this exam.*** It is the student's responsibility to arrange for an ***excused absence before*** the exam. A grade of zero will be assigned for an exam missed without an excused absence. If an emergency arises the week of the midterm exam, contact the instructor immediately.

### Late Work:

All assignments are due at the time specified. **Please keep in mind that no late work will be accepted without penalty.** If an assignment is turned in after the due date, **20%** of the grade will be forfeited. **No assignment will be graded if submitted 7 or more days after it is due.** ***An assignment must be submitted within 6 days of the due date if you want it graded.*** If you have a problem submitting an assignment on time you should contact me before the due date. **For some weeks, it may be possible to work ahead and submit the assignment before it is due.**

### Cheating on Exams and assignments

Students who share information about answers on the exams and assignments or receive assistance from external sources during the exam or for an assignment will receive a zero grade for the exam/assignment. **If the final project is essential the same as another student's project the grade will be zero for the project.**

## GRADING

Final grades in this course will be based on the following scale:

A = 90%-100%

B = 80%-89%

C = 70%-79%

D = 60%-69%

F = 59% or Below

*The syllabus/schedule are subject to change.*

## Assessments

Your Final Grade Distribution is as follows:

Assessment	Percent of Final Grade
Chapter Assignments	20%
Web Project 1	15%
Web Project 2	15%
Web Project 3	25%
Midterm Exam	25%
Total	100%

There will be chapter assignments, exams and web projects. These methods will be used to assess learning objectives (LO) and related level of learning.
