### Optional Texts and/or Materials

**All MSW** students need to purchase the following set of study materials to prepare for the Graduate Comprehensive Exam that they will take in their final semester. You must pass the exam to receive your degree. It is never too early to begin studying for the exam.

**Comprehensive Study Guide (Masters, Clinical, Adv. Generalist) Version 9.0. Social Work Examination Services.** [www.https://swes.net/study-materials/comprehensive-study-guide-lmsw/](https://swes.net/study-materials/comprehensive-study-guide-lmsw/)

### Course Description

The scientific method in social work practice is presented. The methods of empirical research for knowledge building, the role of research in theory construction, research designs and data analysis, and methods of practice and program evaluation are introduced. Students learn to apply qualitative and quantitative research methods to the problems of social work practice.

Prerequisites students must have been admitted to the MSW Program and be in good standing.

### Relationship to Other Courses:

**Student Learning Outcomes** (Should be measurable; observable; use action verbs)

Council on Social Work Education (CSWE) requires a competency-based approach to identify and assess what students demonstrate in practice. In social work, this approach involves assessing students' ability to demonstrate the competencies identified in the educational policy. Listed below are the competencies and associated knowledge, skills, values and/or cognitive and affective processes that comprise the expected outcomes for this course.

**Competency 4:** Engage in Practice Informed Research and Research Informed Practice

With successful completion of this course, student will be able to...

- Use practical experience and theory to inform scientific inquiry and research as *evidenced by completion of review of the literature (cognitive and affective process); article analysis (cognitive and affective process)*
- Apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings as *evidenced by completion of The Ethics Reaction Paper (Values, skills, and cognitive and affective process)*
- Use and translate research evidence to inform and improve practice, policy, and service delivery as *evidenced by completion of review of the literature (cognitive and effective process)*

**Competency 9:** Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

With successful completion of this course students will be able to...

- Select and use appropriate methods for evaluation of outcomes as *evidenced by completion of unit exams (Knowledge)*
- Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes as *evidenced by unit exams (Knowledge)*
- Critically analyze, monitor, and evaluate intervention and program processes and outcomes as *evidence by completion of article analysis (knowledge, skills)*
- Apply evaluation findings to improve practice effectiveness at the micro, mezzo and macro levels as *evidenced by completion of The Ethics Reaction Paper and Review of Literature (Knowledge, skills, and cognitive and affective process)*

## **COURSE REQUIREMENTS**

### **Minimal Technical Skills Needed**

In this class you will utilize the Learning Management Systems (LMS) D2L for instructional and learning opportunities, submitting your assignments, participating in online synchronous and asynchronous discussions, accessing resources, and completing quizzes/tests. Additionally, knowledge and skills in using Microsoft Word PowerPoint and Outlook Email, if you have any issues with using the various systems or software, it is your responsibility to contact support services and to notify the instructor of the problem.

## **Instructional Methods**

This course will be delivered via synchronous and asynchronous sessions via D2L and will consist of live class sessions, pre-recorded lectures, group engagement activities, various assignments with some including experiential learning and practical application of the content areas. In addition, small lectures, discussion activities and workshops may be utilized to provide instruction during this course.

## **Student Responsibilities or Tips for Success in the Course**

As a student in this course, you are responsible to engage in active learning and reaching out to the instructor if there are problems or challenges that is interfering in optimal learning. Communication is key when engaged in a fully online, virtual environment.

Expectations for success include:

1. Always demonstrate professional behavior, including demonstrating respect for instructor and peers; being open to feedback and guidance throughout this class and in the program.
2. Adhered to the School of Social Work and University student code of conduct, along with NASW Code of Ethics.
3. Begin reading the assigned text and supplemental readings as soon as possible, with a focus on completing all readings prior to engagement with instructor or peers.
4. Prepare to engage in live class sessions, discussions, and other activities so you can be a contributor as well as receiver of knowledge and skills.
5. Actively participate in engagement activities which will include live virtual class sessions, online discussions, and interactive learning opportunities -as this is vital for learning and success in both this course and the program.
6. Work ahead when possible, completing assignments ahead of due date so you are prepared to submit on the due date.
7. Sign into the D2L course multiple times during the week to access updated announcements or posted resources.
8. Check your university email daily. This is the official method of communication by the university, department, and instructor.

9. Be open and focused on the “process” and not the “product” as earning this degree requires time, effort, work and ultimately growth in knowledge, skills, abilities along with personal and professional attributes.

## GRADING

Final grades in this course will be based on the following scale:

A = 90%-100% of total points

B = 80%-89%

C = 70%-79%

D = 60%-69%

F = 59% or Below

### Assessment Weights:

Worksheets = 15% of final grade

Exams = 35 % of final grade

Core Assignments = 50% of final grade

### Assessments

**Ethics Reaction Paper** (core assignment) *each student will watch the movie: The Pregnancy Project, which will be scheduled in class and write a reaction paper using an outline provided by the instructor (50 pts)* [Instructions and Grading Rubric found in Appendix A](#)

**Weekly Unit Worksheets** *provided throughout the semester, students will complete worksheets that introduce them to research terms, concepts, and the basics of descriptive and inferential statistics (10 pts each)* Grading Rubric Appendix A

**Article Analysis** (core assignment) *each student will complete an analysis of a quantitative, qualitative and single-system design empirical study. Instructions and outline can be found on eCollege. (3 article analysis @ 25 pts each = 75 pts)* [Instructions and Grading Rubrics Found in Appendix A](#)

**Review of Literature** (core assignment) *each student will complete a 5-page review of relevant literature and information on an assigned topic. The paper must include at least 20 creditable sources to support information in the paper and follow APA guidelines for formatting and referencing. (100 pts)* [Grading Rubric Found in Appendix A](#)

**Exam #1** will cover the concepts and information presented in weeks 1-5 (50 pts)

**Exam #2** will cover the concepts and information presented in weeks 6 -10 (50 pts)

**Exam #3** will cover the concepts and information presented in weeks 11–13 (50 pts)

## **Course Engagement**

### *Final Evaluation and Grade Depends on both Classroom attendance and Participation*

Inadequate participation or lack of required time commitment in each class significantly affects students' grades. No matter the course venue, students must engage in a comparable amount of time. Expectations of both Face-to-Face classes and those with Online components include time spent reading and studying course material.

To earn a level of competency within a specific course, students must demonstrate both mastery of content and active engagement.

Mastery of content areas is evidenced by successful completion of course assignments such as written papers, group project deliverables, tests/quizzes and other tangible products designed by instructors to evaluate knowledge and skills.

Additionally, the Social Work Profession is built upon human interactions and building human relationships – which is defined as engagement. Engagement is defined as meaningful involvement in interactions with instructor, peers, outside stakeholders as appropriate (such as contacting a social worker to interview for a required assignment). Within the classroom setting, whether virtual or F2F, students must actively participate in 80% of engagement activities as outlined by individual instructors. These activities may include, but are not limited to participation in live, synchronous virtual classes, attending a Face-to-Face course when appropriate, interacting with peers in posted discussions and collaborating in group interactive projects.

Students must meet standards for content mastery on tangible assignments and meet the threshold of active engagement of the time set during a semester by the instructor.

Instructors are experts in each course content area and set the standards for students to meet for successful completion of the course.

## **Student Conduct**

Students preparing to become professional social workers must adhere to the *University Code of Conduct*, *Department Code of Conduct* and *National Association of Social Workers' (NASW) Code of Ethics*.

## **Department Code of Conduct**

*"Faculty have the authority to request students who exhibit inappropriate behavior to leave the class/lab/internship practicum or to block access to online courses and may refer offenses to the [Academic and Professional Issues Committee (API)] or to the Department Head. More serious offences by be referred to the University Police Department and/or the Judicial Affairs Office for disciplinary action" (Student Guidebook p 35)*

Social Work students conduct themselves in an ethical and professional manner. Closely linked with professional recognition is the social worker's compliance with the profession's ethical standards. It is imperative for professional social workers to be competent and ethical in practice if the profession is to maintain the public trust. It is essential that each social work student gain a thorough understanding of the ethical principles that guide practice and actively demonstrate in behavior, both in and out of the classroom. Student conduct is to reflect the tenets of *NASW Code of Ethics* (located at <https://www.socialworkers.org/pubs/code/code.asp> ) on the NASW website: <https://www.socialworkers.org>

**University Code of Conduct** *located in the Student Guidebook at*

*<http://www.tamuc.edu/campuslife/documents/studentGuidebook.pdf> (pp 34- 66). On the University Website under Campus Life Documents*

To become aware of university policies related to student academic and behavioral expectations for students refer to the Guidebook

## Instructions and Grading Rubric for Assignments SWK 531

### The Pregnancy Project Ethical Review

**Due: 09/11/2022 @ 11:59 p.m.**

In social work research and social work practice we often the line between participant/client autonomy and implementing what "we as professionals" believe is "best". As practitioners and researchers, we must always check our values and be sure, we are respecting clients/participants. This movie provides an excellent example of a valuable study wrought with ethical dilemmas for a social work practitioner/researcher.

### Assignment

**Pop some popcorn, fix some snacks, grab a notepad and settle in to watch an interesting and thought-provoking social study:**

[The Pregnancy Project](#)

Watch the movie through the "eyes of a social work researcher". This means do NOT get caught up in the "topic" of stereotypes and prejudices of teen pregnancy, while an important topic, this assignment is about the "research project". The same approach could be implemented for a variety of social problems: racial profiling, drug addiction etc, for purposes of this assignment the "topic" is only important in relation to the Focus on the methods, implementation and outcomes related to the research.

Write a two-page reaction paper that addresses the three overriding ethical principles outlined in the Belmont Report using the outline below:

- Identify the participants in this experiment?
- Provide you thoughts regarding the experiment and how it met and/or violated the following ethical principles. (Do not write in 1<sup>st</sup> person – write as if you are explaining the criteria in the context of the movie to an audience).

#### *1. Respect for Persons*

People should be treated as autonomous individuals, capable of making informed decisions when provided the information to do so. This principle also recognizes that, due to some circumstances such as age or disability, some persons have diminished autonomy and therefore require additional protection in research. The extent of his protection should depend on the risk of harm and the likelihood of benefit.

#### *2. Beneficence*

The principle of beneficence is reflected in two general rules: (1) do no harm and (2) maximize benefits while minimizing risks. Researchers

need to weigh the potential risks and the benefits of the research, including the benefits extended directly to participants. Participants should not be asked to subject themselves to potential harm when they are unlikely to receive any direct benefit from their participation.

### 3. *Justice*

It is unfair to expect one group to take most of the risk when a different group will likely realize the benefit. For instance, in the [Tuskegee Study](#), the burden of the research fell to poor, rural, African families, whereas the disease knew no boundaries, including geography, color or income. In this study, one group assumed all the risk, whereas the entire society would benefit from any knowledge about the disease that emerged from the study.

- *Ethical Dilemma*: Is Gaby and her instructor(s) justified in subjecting the participants to the psychological and emotional discomfort incurred? Did the outcome justify the means?

***Always include a cover sheet that has your name and assignment identified for each of your assignments.***

#### Grading Rubric

# QUANTITATIVE ARTICLE ANALYSIS

SWK 531: RESEARCH FOR PRACTICE  
(Due 09.25 @ 11:59 p.m.)

Finding existing evidence (existing literature) is necessary in the preparation for professional social work research and practice. In addition to developing skills to locate relevant information, you must learn to evaluate the evidence you locate to decide the most relevant, useful, and valid evidence to meet your research and or practice needs. To help you begin developing critical appraisal skills in the process of systematically assessing and interpreting existing evidence complete the assignment.

\* Locate a published journal article that reports the results of a quantitative study. Select from peer reviewed journals.

\* Read the article, format your paper according to the instructions and answer the questions.

---

(A). Include a cover sheet with your name

(B). Write an APA style reference for the article and include it at the top of the page. No need for in text citations of the article. If you use other references you need to include in text citations and a reference page.

(C). Number and write the questions in the same order below, responding to each in complete sentences, paragraph style.

1. What is known about the author(s)? What experience does he/she (they have)? What institution or organization is he/she (they) associated with? What else is known about the author(s)? (2.5 pts)

2. What is the purpose of the study? To inform? To sell? To persuade?/ Who is the intended audience? (3.5 pts)

3. Who/What is the sample population? How and why was the sample selected? How was participation solicited? (3 pts)

4. Are ethical concerns described and/or addressed? (3 pts)

5. What is the data collection method? Are the methods clearly described by the author? (3 pts)

6. Are the conclusions accurate based on the study's findings? (5 pts)

7. Are the conclusions clinically relevant to a particular population? Do the risks outweigh the benefits? (5 pts)

*Once completed, upload your paper and a copy of the article into the correct drop box.*

Grading Rubric: Quantitative Article Assignment

## Instructions and Grading Rubric for Single System Design Article Analysis

**Instructions:** *For this assignment, you must choose a journal article that describes a single system research study. The research can be on any topic but must report the collection of data from subjects using a single system design.*

*At the top of your paper, include the citation (in APA format) for the article you are using. When you submit your paper, also submit a copy of the article for me to have. Answer the following questions in a narrative form, referencing information from the article to support your answers.*

1. What is the identified problem being addressed in this research article?
2. What is the behavior(s) being targeted? Is it to reduce a behavior or increase a behavior?
3. What is the intervention? Is it observable and measureable? Is it something a client(s) could easily carry out? Why or Why not?
4. Is the research theory driven? If so what theory(ies) are driving the research?
5. What are the independent and dependent variables?
6. How are the variables operationalized?
7. Explain the findings within the context of single system designs i.e are graphs utilized, is there a trend noted, are the results presented in a clear and concise manner?
8. How might you use the reported single system design to further social work knowledge in your current social work setting (or future social work setting).  
*Focus on the research design when answering this question – not the results or findings. Do not write in first person – explain how the design utilized in the study could be utilized with other populations in social work practice.*
