Course Description (3 Semester Credit Hours)

This course focuses on the philosophical and theoretical bases underlying concepts and operations inherent to nursing. Synthesis of theories from behavioral, natural, social, and applied sciences is emphasized as it relates to nursing and practice. There is an investigation of the intersections between system science and organizational science. Nursing, ethical, and scientific theories are used in the analysis of clinical problems, illness prevention, and health promotion.

Student Learning Outcomes

Upon completion of the course, the student will have been given the opportunity to:

1. Analyze nursing history to expand thinking and provide a sense of professional heritage and identity (AACN Advanced-Level Domain 1.1)
2. Integrate theory, evidence, clinical judgment, research, and interprofessional perspectives using translational processes to improve practice and associated health outcomes for diverse patient populations (AACN Advanced-Level Domain 1.2)
3. Articulate to a variety of audiences the evidence base for practice decisions, including the credibility of sources of information and the relevance to the practice problem confronted (AACN Advanced-Level Domain 2.2)
4. Perform rigorous critique of evidence derived from databases to generate meaningful evidence for nursing practice (AACN Advanced-Level Domains 4.1, 4.2)
5. Utilize current and emerging technologies in the care environment to support lifelong learning for self and others (AACN Advanced-Level Domains 8.1, 8.2, 10.2)
6. Advocate for the value and role of the professional nurse as member and leader of interprofessional healthcare teams (AACN Advanced-Level Domains 6.1, 6.2, 6.3, 6.4, 9.4, 9.5)
7. Utilize effective communication strategies to develop, participate, and lead interprofessional teams and partnerships (AACN Advanced-Level Domains 6.1, 6.2, 6.3, 6.4)
8. Function as an effective group leader or member based on an in-depth understanding of team dynamics and group processes (AACN Advanced-Level Domains 6.1, 6.2, 6.3, 6.4, 10.3)
9. Apply theories and evidence-based knowledge in leading, as appropriate, the healthcare team to design, coordinate, and evaluate the delivery of care (AACN Advanced-Level Domains 4.2, 7.3, 10.3)
10. Integrate an evolving personal philosophy of nursing and healthcare into one's nursing practice (AACN Advanced-Level Domains 1.1, 1.2, 9.1, 9.5, 9.6)

Course Requirements

Minimal Technical Skills Needed:

Using the learning management system; using Microsoft Word and PowerPoint.

Instructional Methods:

This is an online course without lecture requiring students to complete online activities and independent study to be successful. Course objectives may be met through individual study using

suggested resources, active involvement in course activities, formal, and informal exchange of ideas with classmates and colleagues regarding specific topics as well as utilizing critical thinking skills. Teaching methods include discussion, independent study of texts and library resources, computer-assisted instruction, audio-visual aids, and the assignments listed. While the professor will provide guidance and consultation, the student is responsible for identification of learning needs, self-direction, seeking consultation and demonstration of course objectives.

Student Responsibilities for Success in this Course:

- Logging into the course website daily during the week
- **Checking emails at least daily**
- Updating semester calendar with communicated changes
- Completing multiple hours of weekly study
- Attendance at all course events
- Utilizing appropriate online etiquette

GRADING

Final grades in this course will be based on the following scale:

- A = 90%-100%
- B = 80%-89%
- C = 75%-79%
- D = 60%-74%
- F = Below 60

Grades will be determined as follows:

Evaluation Methods	
Discussion Board Forums (8 forums at 5% each)	40%
Annotated Bibliography	10%
Nursing Theory Presentation	25%
Nursing Theory Application Paper	25%
Total	100%

A minimum grade of 75 is required to pass the course.

Successful completion of the examinations and other required assignments will enable the student to meet the student learning outcomes.

Paper Submissions:

All documents submitted online are to be in .docx, .rtf or .pdf format. No other formats will be accepted (JPEG, GIF, etc.). Assignments need to be submitted in a maximum of one document per assignment. Failure to follow these guidelines will result in a grade of “0” on the assignment.

Late Submissions:

It is expected that students will submit all assignments on time. If an extension is needed, it should be requested before the due date and may or may not be approved at the discretion of the course coordinator. Unexcused late assignments (with the exception of Discussion Forums) will be penalized 10% per day for each of the first two days overdue; on the 3rd day, the grade will be assigned as 0%. Penalties for late posting for Discussion Forums will follow the guidelines described under the Assessment section. Communication on these matters is the student's responsibility.

Assessments

1. Discussion Board Forums 8 at 5% each 40% due date varies

Students can find the following discussion forums on the online course site (Course Outcomes #1-10):

Introduction Forum 1 (Ice Breaker): The purpose of this Forum is to introduce you to the use of the discussion board. Please see the requirements listed in Unit #1: Orientation under Course Content on D2L. This Forum is a required and expected activity with credit given for participation. It is due by the end of the first week of class by **2359, 9/2**.

Discussion Board Forums:

The purpose of these Forums is for students to critically examine various content provided in course assigned readings. Students will be expected to make initial posts to discussion questions/prompts, then read other's responses, rigorously analyzing them and making substantive comments or asking questions. At least one subsequent response to a peer is required on each Discussion Forum posting according to the deadlines described below. The grading criteria (rubric) for the Forums is located within this Course Syllabus.

Before writing Discussion Forum posts, read the assigned works and complete learning assignments for the week. Your posts should indicate that you have read the material, understand it, and are able to apply the content, so omitting this step is a crucial mistake.

Initial Posts:

The initial Discussion Forum posting is the first post of the week. All initial discussion postings are due by Tuesdays at 2359. Late initial discussion board postings made after Tuesdays at 2359 but before Wednesdays at 2359 pm will reduce the grade by 10%. Due to the nature of discussion forums, initial postings made after Wednesdays at 2359, will receive a 0. Your initial post in response to the question/prompt should be between 250 - 300 words and should include citations according to the grading criteria. Note that you can omit citations; however, doing so will be reflected in your grade.

Subsequent (Response) Posts:

Response postings are those made to the initial postings of peers. Response postings to peers are due by Thursdays at 2359. Response postings made after Thursday at 2359 will reduce the grade by 10%. Due to the nature of discussion forums, late response postings posted after Fridays at 2359 will receive a 0. At least one response posting will be

required in all discussion boards. Response posts should be about 1-2 paragraphs and a minimum of 150 words. Again, refer to the grading criteria for requirements.

Develop your responses to your peers before reading other peer responses, to avoid having your thinking influenced by others.

A few ideas are listed below as to how you might construct a response posting:

- Suggest why you might see things differently (reference the literature)
- Ask a probing or clarifying question
- Share an insight from having read the colleague's posting
- Offer and support an informed opinion with evidence from the literature
- Validate an idea with your own experience
- Make a suggestion supported with evidence from the literature (cite a reference)
- Expand on the colleague's posting
- Ask for evidence that supports the posting

2. Annotated Bibliography **10%** **due 2359, 10/7**

The purpose of this assignment is for students to gain an understanding of the format and purpose of an annotated bibliography. An annotated bibliography is a written document that contains a citation followed by a summary describing and evaluating the content of the particular article referenced by the citation. Generally, these bibliographies contain more than one citation and summary. For this course, however, students will select only one article for the bibliography. Students should select the article from the "Selected Readings" tab posted within Unit 1 under Course Content. Many of these articles are available online and all will be available in the library.

Articles chosen will need to be approved by faculty to avoid duplication. Selection is on a first come, first serve basis. Students should email their choice via course email to the instructor by **2359, September 16th** and they will be notified, if approved. Other articles not on the "Selected Readings" list may be selected with the approval of the instructor.

The Annotated Bibliography must be no more than three pages long, including a title page. It should be typed and in APA format. Please refer to the guidelines available in the APA Manual or on the Purdue Owl website in formatting the bibliography. The grading criteria (rubric) for the Annotated Bibliography is located within this Course Syllabus (Course outcomes #3 & #4).

3. Nursing Theory Presentation **25%** **due by 2359, 11/4**

The purpose of this assignment is for students to thoroughly explore and evaluate a nursing theory through the presentation of content to peers. Students will develop a 20 minute (minimum) to 30 minute (maximum) online Power point presentation with audio on the nursing theory of their choice from one of the following areas: Education & Learning Theories (Ch. 10), Quality Improvement Theories (Ch. 15) or Theories Focused on Health Equity (Ch. 17). The selection of the nursing theory must be approved by the instructor and will be done on a first come, first serve basis so as to prevent duplication of theories for presentation. The deadline for faculty approval of the selected theory is **2359, October 14th**. Presentations will be posted in two places: (1) under the appropriate Assignment tab for grading, and (2) to the Nursing Theory Presentation Discussion

Forum available on D2L. The rubric for the Nursing Theory Presentation is located within this Course Syllabus (Course outcomes #1-3, 5-7, 9-10).

4. Nursing Theory Application Paper **25%** **due by 2359, 11/23**
(Wednesday)

The purpose of this assignment is for students to explore another selected nursing theory through the application of the theory to advanced practice from one of the following areas: Nursing Goals & Functions Theories (Ch. 18), Systems Approach Theories (Ch. 19), Competencies & Skills Theories (Ch. 21), or Health Behavior Theories (Ch. 11). The selection of the nursing theory must be approved by the instructor and will be done on a first come, first serve basis so as to prevent duplication of theories. The deadline for faculty approval of the selected theory is **2359, November 4th**. Students will describe a patient scenario and apply the selected nursing theory to this patient, including assessment, diagnoses, planning, intervention and evaluation of the plan of care. The rubric for the Nursing Theory Application Paper is located within this Course Syllabus (Course outcomes #1-3, 5-6, 9-10).

TECHNOLOGY REQUIREMENTS

LMS

All course sections offered by Texas A&M University-Commerce have a corresponding course shell in the myLeo Online Learning Management System (LMS). Below are technical requirements

LMS Requirements:

ACCESS AND NAVIGATION

You will need your campus-wide ID (CWID) and password to log into the course. If you do not know your CWID or have forgotten your password, contact the Center for IT Excellence (CITE) at 903.468.6000 or helpdesk@tamuc.edu.

Note: Personal computer and internet connection problems do not excuse the requirement to complete all course work in a timely and satisfactory manner. Each student needs to have a backup method to deal with these inevitable problems. These methods might include the availability of a backup PC at home or work, the temporary use of a computer at a friend's home, the local library, office service companies, Starbucks, a TAMUC campus open computer lab, etc.

COMMUNICATION AND SUPPORT

If you have any questions or are having difficulties with the course material, please contact your Instructor.

Technical Support

If you are having technical difficulty with any part of Brightspace, please contact Brightspace Technical Support at 1-877-325-7778. Other support options can be found here:

Interaction with Instructor Statement

It is expected that you will check your D2L course and email regularly for communication from the instructor(s). Be sure to check the night before class/clinical. A response to any email or message will occur within two (2) business days.

Communication between faculty and students is primary and taken seriously. Preferred communication methods are individualized office hours, email, or via cell-phone. If a phone call is not answered, please leave a message and send an e-mail using the direct e-mail link on the course home page. You will be treated with collegial respect and you are expected to communicate likewise in a professional manner.

Faculty will make every effort to return class assignments within two weeks of submission and feedback on clinical work before subsequent work is due.

Nursing Theory Presentation Grading Criteria

Criteria	Points Possible	Points Earned	Comments
Evaluation of Theory:			
<p>Significance</p> <p>Identify and describe the theorist’s metaparadigm conceptualizations of humans, environment, health, and nursing.</p> <p>Are the metaparadigm concepts and propositions addressed by the theory explicit? Describe.</p> <p>Does the theory address a topic that society currently regards as practically important? Explain.</p> <p>Does the theory offer new, compelling and nontrivial insights into the topic? Elaborate.</p>	20		
<p>Internal Consistency</p> <p>Are the theory concepts explicitly identified and clearly defined? Describe.</p> <p>Are the same terms used consistently for the same concepts? Explain.</p>	10		
<p>Parsimony</p> <p>Is the theory content stated clearly and concisely? Describe.</p>	5		
<p>Testability</p> <p>Is each concept of the theory empirically measurable? Explain.</p>	5		
<p>Empirical Adequacy</p> <p>1. Grand Theories: Are the findings from studies of descriptions of personal experiences congruent with the concepts and propositions of the grand theory? Explain.</p> <p>2. Middle-Range Theories: Are theoretical assertions congruent with empirical evidence? Describe.</p>	10		

<p>Pragmatic Adequacy:</p> <p>Discuss and evaluate the strengths and weaknesses of the theory for use in nursing practice, education, and research, addressing <u>each</u> of the following:</p> <ul style="list-style-type: none"> • Is education/special skill training required before application of the theory in nursing practice, education, or research? If so, specify. • Has the theory been applied in the real world nursing practice, education, and/or research? • Is it generally feasible to implement practice derived from this theory? • Does the practitioner have the legal ability to implement and measure the effectiveness of theory-based nursing actions? • Are the theory-based nursing actions compatible with expectations for nursing practice and do they lead to favorable outcomes? • Is the application of theory-based nursing actions designed so that comparisons can be made between outcomes of use of the theory and outcomes in the same situation when the theory was not used? 	30
