COURSE INFORMATION

Textbook(s): No textbook required (see an optional textbook below)

Software Required: Weka

Optional Texts and/or Materials: Data Mining: Practical Machine Learning Tools and Techniques, 4th Edition. ISBN-13: 978-0128042915, ISBN-10: 0128042915 (Optional)

Course Description

Big scientific data sets are growing exponentially both in size and complexity. Extracting meaningful information from these data requires not only programming skills, but also understanding the analysis work-flows, mathematical models and visualization tools that help to condense large amounts of information into a comprehensible story. We will introduce standard statistical data analysis and modeling methods such as correlation functions, linear regression, clustering, pattern extraction, classification, data mining, as well as Monte Carlo methods which are commonly used in creating simulations in the computational sciences. Different analysis and visualization packages popular in scientific modeling, analysis, and visualization will be introduced.

The syllabus/schedule are subject to change.

Student Learning Outcomes (Should be measurable; observable; use action verbs)

1. The student will gain detailed knowledge about the goal and techniques of the data analysis and visualization process.
2. The student will understand the steps in characterizing and understanding data.
3. The student will be able to build effective predictive models.
4. The student will be able to build models that rely on memorizing training data.
5. The student will be able to build models that have an explicit additive structure.
6. The student will be able to build models for data that has no labeled training data available: Unsupervised learning
7. The student will be able to use software applications for data analysis.

COURSE REQUIREMENTS

Prerequisites

None

Minimal Technical Skills Needed

- Basic knowledge of computer and operating systems
- Basic knowledge of data structure, algorithms, and statistics/probability

Instructional Methods

- Online lecture for data analysis & visualization concepts
- Will learn how to utilize an open source data analysis and visualization tool: WEKA (<http://old-www.cms.waikato.ac.nz/~ml/weka/>)

Student Responsibilities or Tips for Success in the Course

- On-time submission of assignments
- Should well be well (fully) prepared for exams
- IMPORTANT: This is an online-formatted course, and it is mandatorily required that the student reads announcements from the course page frequently (at least three times a week) and email messages from the instructor without any significant delay (less than 24 hours).

The syllabus/schedule are subject to change.

GRADING (Tentative)

Final grades in this course will be based on the following scale:

A = 90%-100%

B = 80%-89%

C = 70%-79%

D = 60%-69%

F = 59% or Below

Weights of the assessments in the calculation of the final letter grade:

Components	Weight	Remarks
Assignments	40%	Homework assignments
Midterm exam	30%	Two exams and the highest score will be chosen
Final exam	30%	Cumulative

Late Policy (Assignments):

The deadline for the assignment can be extended with a 15% penalty per day, up to two days. No submission will be accepted 48 hours after the deadline.

Makeup Policy (Exams):

Makeup chances may be given to students under extreme circumstances only, such as hospitalization, serious injury, death in the family, etc, with prior consent and the supporting document (officially issued).
