**Course Description**

This course will explore current breakthrough technologies and disruptive innovations that have emerged over the past few years. A close examination will be conducted to understand the importance of management strategy in navigating the rapid climate of changing technology to ensure a company's success. Prerequisite: Senior Standing. Instructor approval.

*The syllabus/schedule are subject to change.*

**Student Learning Outcomes** (Should be measurable; observable; use action verbs)

1. The learner will demonstrate through written class assignments the ability to read course materials and textbook, analytically comprehend the content, and organize and summarize the major points to others in an effective and concise manner consistent with a senior-level university student.
2. The learner will demonstrate through written class assignments the ability to research course related literature and understand and compose comprehensive and concise definitions/descriptions of specific terminology and management principles, theories, and practices directly related to the course of study.
3. The learner will demonstrate through class participation and required writings a working knowledge of and an advanced understanding of the discipline that constitutes *emerging technologies*.
4. The learner will demonstrate through discussion boards and written assignments the ability to effectively apply the principles and practices of *emerging technologies* to a real-world environment/enterprise.
