COURSE INFORMATION

Materials – Textbooks, Readings, Supplementary Readings:

No text required: All materials will be provided.

Course Description

Provide hands-on practical exercises that illustrate plant growth and development phases including seed germination, vegetative and reproductive morphology evaluation. Techniques and instruments used to evaluate plant metabolic processes, including photosynthesis, respiration, and water stress are evaluated. Basic calculation related to fertilizer application, pesticide and sprayer calibration will be demonstrated.

This course is designed to complement the lecture material from PLS 1307.

Prerequisites: None.

Student Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Recognize the genus, species, variety, cultivar, and hybrid in the scientific name of a plant.
2. Identify and describe the various parts and functions of seed, leaves, stems, flower, fruits, and roots.
3. Propagate plant materials from seeds and know how temperature, light, moisture affect seed germination and seedling growth.
4. Calculate fertilizer requirements for applying fertilizer rates and concentrations.
5. Explain the processes of photosynthesis and respiration and know how to measure them.
6. Apply the knowledge of plant science to grow a number of crops from seed to seed.

COURSE REQUIREMENTS

Minimal Technical Skills Needed

Basic knowledge of Microsoft office (Word, Excel, and PowerPoint) and familiarity with D2L. Students will need reliable internet access to retrieve course materials and complete online quizzes and exams if needed.

Instructional Methods

Lectures: The lecture materials (PowerPoint slides, video recording, and additional reading materials) will be made available on the course D2L page for students to download.

Student Responsibilities

Expectation of Students

1. Students are expected to attend all lab activities unless ill;
2. Be on time to lab;
3. Completion of homework assignments, and quizzes by the due dates;
4. Late submission of assignments or make-up of quizzes, and other work in this course will only be allowed for legitimate, pre-excused absences.

ASSESSMENTS and GRADING

Course Evaluation

Student's final grade will be based on 500 points total from quizzes, lab reports, class presentation, and plant collection

Items	Points
Quizzes	200
Lab reports	100
Class presentation	100
Plant collection	100

Quizzes: (Multiple choice): 5 weekly 20 point quizzes and one final quiz.

Lab reports: You will be required to submit an individual report on each lab activity. 20 points each report.

Presentation: Students will give group presentation on the research projects conducted during the lab.

Plant Collection: Student will collect and prepare a digital herbarium of 50 plant specimens.

Grade Assignment

Letter grades for the course will be assigned according to the chart below:

A = 90%-100%

B = 80%-89%

C = 70%-79%

D = 60%-69%

F = 59% or Below

TECHNOLOGY REQUIREMENTS

LMS

All course sections offered by Texas A&M University-Commerce have a corresponding course shell in the myLeo Online Learning Management System (LMS). Below are technical requirements

AI use in course

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.
