Course Information

Class time and location: Meets M-F, 6/5/2023 through 7/6/2023; Science building #306

Course Description

The course will provide students with the knowledge and skills needed to conduct laboratory research and design experiments. Data analysis and report writing skills will also be developed which are needed to interpret laboratory research and produce technical scientific reports. Over the course we will cover a range of organic and organometallic research experiments and their results analysis. You will become familiar with asymmetric chemistry and its data analysis. You will also be required to develop critical reading skills of research papers and develop your technical writing skills. The class will be assessed by weekly written reports and research presentations.

Student learning outcomes: Students will gain the necessary skills involved in conducting organic and organometallic scientific research. The skills will include conducting experiments by the procedures, monitoring the reaction progress, purification of products by flash chromatography, identification of products' structure by instruments, such as NMR and HPLC. During the course you will develop the skills and material needed for a technical research report. The database searching portion of the course will familiarize you with the software tools of Web of Science and Endnote. The instrumental analysis portion of the course will cover proton and carbon nuclear magnetic resonance (NMR), high performance liquid chromatography (HPLC), infrared spectroscopy (IR), polarimeter. Students will be required to complete weekly assignments, present their research results to the group and develop weekly research progress reports.

Course requirements, assignments and grading:

Research assignments:

Weekly research assignments: introduction to a scientific problem, literature review report, and weekly research report with next week's research plan. (60%) Midterm research report: based on research results, literature review (15%) Final research report: based on research results and literature review (25%)

A: >90; B: 80-89; C: 70 -79; D: 60-69; F: <60. **The last drop date for the course, please check the university website:**

Student Conduct Policy:

In order to create a “learning environment” free of disruption, you **MUST TURN OFF** your cell phones, MP3 players, PDA’s, Pagers, and any other electronic devices before entering the class. Students are expected to comply with the student code of conduct as stated Student’s Guidebook, Policies and Procedures, Conduct. If the student is failed to comply with the code of conduct and being disrespectful, disruptive to the instructor or the students of the class, the instructor reserves the right to dismiss the student from the class on the first offense. A second offense may constitute dismissal from the course with a failing grade. A and M-Commerce will comply in the classroom, and in online courses, with all federal and state laws prohibiting discrimination and related retaliation on the basis of race, color, religion, sex, national origin, disability, age, genetic information or veteran status. Further, an environment free from discrimination on the basis of sexual orientation, gender identity expression will be maintained.
