The course has a practical element requiring students to draft documents such as a petition and motion for summary judgment, in addition to briefing cases. Students will become familiar with computer applications used in torts practice.

Course Objectives

The goal of this course is to enable the student to:

- Distinguish type of torts (i.e., negligence, intentional, strict liability, and hybrid) and solve hypothetical problems in the context of tort law;
- List the elements for causes of action in various torts, defenses, and immunities, including special duties owed;
- Identify the types of evidence to satisfy the elements of various torts and whether a viable cause of action exists;
- Determine the extent of damages for negligent acts.

Attendance/Participation Policy

You are expected to know how to navigate and use the D2L platform by utilizing the trainings made available to you by the University. You are expected to attend and participate in the online live lectures each week. Live lectures will be conducted using Zoom.

In addition, you are required to participate in the discussion each week you have assigned readings. You must prepare for the discussion by reading ALL of the material assigned. Questions will be posted related to each topic the week readings are assigned. You must thoughtfully respond to the posted questions. Short posts unsupported by information in the readings may be given ZERO points.

Grading Policy

Lectures and Discussion: This class will be taught using the Socratic Method as well as lecture. You may be called on at any time and are expected to be fully prepared to discuss the assigned reading material during the live lectures and in the online discussions. This is a cumulative grade over the course of the semester.

Assignments: You are also responsible for completing the assignments listed in this syllabus. The assignments may be found within the chapters of the textbook and in handouts I will provide to you. If the assignment is a group assignment, you will be responsible for choosing your group members. A group may consist of 2 to 3 people. Your assignments will be reviewed, graded and returned to you.

All assignments must have a cover page indicating the following: your name, class, chapter and name of the assignment (as it appears in the syllabus), and date the assignment is due. A deduction of 10 points will be assessed to all assignments turned in without a cover page. You will submit your assignments in the dropbox provided to you in the D2L platform.

Case briefs, take-home exams, homework assignments, and any other written work must be submitted before the deadline provided to you. All written work will be graded not only on content, but also on writing style, **including punctuation and grammar**. You are expected to submit case briefs, homework, and take home exams on time. Exceptions will be granted only under the most EXTREME, verifiable circumstances.

Exams: The examinations may consist of multiple choice, true/false, definition, and short answer questions and essay. Any collaboration with other students with regards to the substance of the exams will result in a failing grade.

Your grade will be calculated according to the following formula:

Participation/Discussion	15 points
Weekly Assignments	25 points
Midterm	30 points
Final	30 points

Grade Distribution is as follows:

A = 90-99

B = 80-89

C = 70-79

D = 65-69

F = 64 and below

(No extra credit work will be allowed unless assigned as a bonus to the entire class.)

Plagiarism Statement

“What is Plagiarism?”

Many people think of plagiarism as copying another's work, or borrowing someone else's original ideas. But terms like "copying" and "borrowing" can disguise the seriousness of the offense:

According to the Merriam-Webster Online Dictionary, to "plagiarize" means

1. to steal and pass off (the ideas or words of another) as one's own
2. to use (another's production) without crediting the source
3. to commit literary theft
4. to present as new and original an idea or product derived from an existing source.

In other words, plagiarism is an act of fraud. It involves both stealing someone else's work and lying about it afterward.

But can words and ideas really be stolen?

According to U.S. law, the answer is yes. The expression of original ideas is considered intellectual property, and is protected by copyright laws, just like original inventions. Almost all forms of expression fall under copyright protection as long as they are recorded in some way (such as a book or a computer file).

All of the following are considered plagiarism:

- turning in someone else's work as your own
- copying words or ideas from someone else without giving credit
- failing to put a quotation in quotation marks
- giving incorrect information about the source of a quotation
- changing words but copying the sentence structure of a source without giving credit
- copying so many words or ideas from a source that it makes up the majority of your work, whether you give credit or not (see our section on "fair use" rules)

Most cases of plagiarism can be avoided, however, by citing sources. Simply acknowledging that certain material has been borrowed, and providing your audience with the information necessary to find that source, is usually enough to prevent plagiarism. If you have retained the essential idea of an original source, and have not cited it, then no matter how drastically you may have altered its context or presentation, you have still plagiarized.” (www.plagiarism.org)

If you plagiarize, you will receive a ZERO for the assignment in question. I also reserve the right to give you an F in the course. The matter will be referred to the Office of the Dean of the College of Humanities Social Science and Arts and the Office of the Provost.

As Instructor, I reserve the right to amend, modify, or alter this syllabus as the situation may require.
