Text: *Calculus*, by James Stewart, 9th Edition, published by Thompson Learning Inc. Portions of Chapters 5, 6, 7, 8, 10, and 11 in the textbook will be discussed.

Course Description: Differentiation and integration of transcendental functions; parametric equations and polar coordinates; techniques of integration; sequences and series; improper integrals.

Prerequisite: Math 2413 with a minimum grade of C.

Learning Outcomes: Upon successful completion of this course, the students will be able to:

1. Understand the concept of inverse functions and use the properties of inverse trigonometric functions and hyperbolic functions;
2. Recognize the indeterminate forms and use the L'Hospital's rule;
3. Use integration techniques including integration by parts, trigonometric substitution, and partial fractions decomposition to evaluate integrals;
4. Use the idea and techniques of integration to solve problems involving arc lengths, areas and volumes;
5. Evaluate derivatives and integrals using parametric equations and polar coordinates;
6. Understand the convergence of sequences and infinite series and use Integral Test, Comparison, Ratio, and Root Tests.

Instruction: Instruction will include lectures, demonstration and discussions.

Calculator & supplies: A graphing calculator is needed for this course. A TI 84 calculator is recommended.

Attendance: Attendance will be checked and it is your responsibility to sign the daily roll sheet. It is your benefit to attend the class.

Tests: There will be three midterm and a final exams for the course. The tentative schedules for the exams are:

Test 1: Feb. 2, Friday 10:00-10:50am.

Test 2: Mar. 1, Friday 10:00-10:50am.

Test 3: Apr. 5, Friday 10:00-10:50am.

Final exam: The Final exam will be a comprehensive exam and is scheduled on **May 6, Monday, 10:30am–12:30pm.**

No makeup will be given for the tests. If you miss one test with evidence showing that you have an acceptable reason for that, the average of your other two test grades will be used as the grade of your missing test. This provision will only be applied to ONE exam, so students should make every effort to be present and well-prepared for all exams.

Homework & Projects: Homework assignments and their due dates are given on page 5 of this syllabus. You are strongly recommended to work out homework assignments on a weekly basis since **No one can learn mathematics without doing it!** Some homework problems or the similars will be used as test questions.

Course grades: The course grade consists of

Homework & Quizzes:	15%
Three tests :	60%
Final exam:	25%.

The letter grades will be assigned using the following scale:

A: 90-100% B: 80-89% C: 70-79% D: 60-69% F: 0-59%

Tutoring & Help : A better way to learn math is to keep progress and leave no gaps in one's study. So please get help as soon as you need it and do not wait until it is too late. You are welcome to come to me or go to Math Skills Center located in **Bin 328** where you can find free tutors for help. The tutoring hours of Math Skills Center for the current semester are:

MTWR 10am – 6pm, and F 10am – 2pm

- Possession or access to test items before the test is given.
- Deception in getting an excused absence to obtain the undeserved opportunity to make-up work.
- Use of cell phones or text messaging technology during exams or quizzes. You may not use the calculator on your cell phones.
- Improper citations in written works, or using another person's ideas and words as your own without giving proper credit.
- **Any** method, no matter how well rationalized or accepted, which improves a person's grade by any means other than study and skillful performances on exams and/or other assignments.

Students found guilty of an act of academic dishonesty in this course will be subject to receiving an "F" in this course.
