Course Description

VETT 430 Emergency and Critical Care for Veterinary Technicians

Presentation of content emphasizing the theoretical and practical aspects of management of emergent and intensive care cases presented to the veterinary clinic for care by the veterinary technician. Content to include physical exam, triage, clinical pathology, monitoring of shock, body system specific emergencies, common intoxications, and RECOVER guidelines.

Student Learning Outcomes

1. Students will demonstrate the ability to describe physical examination and triage in an emergency medicine context.
2. Students will effectively be able to describe and recognize cardiopulmonary arrest and discuss current treatment protocols including CPR (Cardiopulmonary Resuscitation) in association with RECOVER principles (will include drug and fluid calculations)
3. Students will be able to describe typical emergency patient care as would be required to be functional member of a treatment team and effective client communication
4. Students will be able to identify the physiologic mechanisms and effects of the different classifications of shock and discuss the rationale of current treatment protocols
5. Students will be able to describe the recognition and treatment of common emergencies on a system basis including gastrointestinal, ophthalmologic, neurologic, metabolic, reproductive, and hematologic emergencies and toxicities.
6. Students will be able to discuss and follow the Kirby's Rule of 20 for daily care of the critical patient.
7. Students will be able to construct nursing care plans and perform common calculations associated with critical care nursing care.
8. Students will be able to perform and understand commonly performed clinical pathology procedures in emergent and critical care patients.
9. Students will be able to discuss the care of and perform common procedures completed by the veterinary technician in an ECC role such as venous access, urinary access, and oxygen supplementation

The syllabus/schedule are subject to change.

10. Students will learn their role as a veterinary technician, team member, and client educator in a laboratory, clinical, and diagnostic setting.

COURSE REQUIREMENTS

Minimal Technical Skills Needed

Examples include: Using the learning management system, using Microsoft Word and PowerPoint, using presentation and graphics programs, etc

Instructional Methods

This section describes how the learning process will be conducted (delivery modalities, course structure, Getting Started and types of learning activities and assessments). The lecture portion will be only. The lab portion will be delivered face to face on campus with lab report submissions being completed online and the exams will be on campus.

Student Responsibilities or Tips for Success in the Course

. Examples include: Regularly logging into the course website, approximately 2 hours of weekly study and 2 hours of participation time expected. These anticipated times are an estimation and may require more or less.

GRADING

The final grade in the course will be based on your accumulated total points during the semester according to the following distribution:

Lecture	Lab
A = 675 - 750 points	A = 315 – 350 points
B = 600 - 674 points	B = 280 – 314 points
C = 525 - 599 points	C = 245 – 279 points
D = 450 – 524 points	D = 210 – 244 points
F = 449 and below	F = 209 and below

Course grades come from:

Lecture grades:	
5 Lecture unit exams @ 100 points each	500 points
1 Lecture final exam @ 150 points	150 points
5 Lecture assignments @ 20 points each	100 points
Lecture total	750 points

The syllabus/schedule are subject to change.

Lab grades:	
Lab Midterm	100 points
Lab Final	150 points
10 lab assignments @ 10 points each	100 points
Lab total	350 points

1. Attendance

- You are expected to come to class every meeting.
- If absences are excessive, points will be deducted from overall course points.
- Excused absences must be discussed with the professor within 48 hours of a missed class, preferably before.

2. Assignments/ Worksheets

- Late submissions: Submissions will be due at a specified date and time. Any time after the due date, the homework is considered late and will receive an automatic 15% reduction in the final score and a 5% reduction each day beyond the due date.

Assessments

Lab Exams will consist of a midterm and final, both with written and practical portions. The final will be comprehensive/cumulative and will be given during lab time on: Time and Location TBA

Lecture exams, unit and final, will include T/F, matching, multiple choice, multiple answer, identification, and short answer. These are to be completed and submitted online by the designated due date. The exams are timed and you will have only one attempt.

Assignments

Lecture and Lab will have assignments that are to be completed and submitted by the specified due date. The assignments will be related to material, enforcing the content being presented at the time.

Skill List

This lab contains a task/skill list that will guide our lab schedule and provide a means of evaluation. It should be completed to the best of your ability and submitted at the end of the course. All skills listed will be part of the weekly lab material.

The syllabus/schedule are subject to change.
