COURSE SYLLABUS: Spring 2024

Professor: Dr. Stephen Reysen
Class Location: Binnion 212
Class Hours: TBA
Office Location: Binnion 213
Office Hours: by appointment
Email Address: Stephen.Reysen@tamuc.edu (*email is the best way to reach me*)

COURSE INFORMATION

Course Description: The purpose of this class is to train you to conduct psychological research. This includes all aspects of the research process: development of research materials and/or experimental procedures, how to conduct studies/experiments, data analysis and interpretation, and empirical writing. The class is conducted through informal meetings with Dr. Reysen. During the semester (times to be announced) we will meet to discuss each other's research and examine experimental materials and procedures.

Beyond meeting to discuss research, you may be asked to conduct library research (google scholar is going to be your best friend), conduct research (e.g., run participants), track and maintain studies using the SONA system (participant sign-up system), enter data into the computer, organize and manage databases, and various other tasks.

All class members must complete human subjects training and provide a copy of the certificate of completion to Dr. Reysen. The training is online and takes about 10 hours to complete. The training can be found at the below website...

COURSE REQUIREMENTS

Grading: Attending scheduled class meetings, while behaving in a professional manner in running experiments, generally results in an 'A' grade. More specifically, this means: 1) do not fail to show up for, or arrive late for, an experiment, 2) conduct experiments in a respectful manner, especially the debriefing process. Failing to conduct an experiment at the appointed time, or not completing assigned class work, may result in a reduction of your grade. I suggest checking your email everyday during the semester.

TECHNOLOGY REQUIREMENTS

You will need access to a computer with internet.

COMMUNICATION AND SUPPORT

Interaction with Instructor:

Please feel welcome to contact me in person during office hours, before or after class, online through University email or schedule an appointment to meet with me. All email should receive a response within 48 hours. If you have not received a response then assume your email did not go through and please try again to make contact. All email should include student's last name, first name, course name and brief description of the reason for contact.

COURSE AND UNIVERSITY PROCEDURES/POLICIES

Student Behavior:

My expectations in this area should be very simple to fulfill. (1) Immaturity will NOT be tolerated! If a student's behavior is disrupting the class, he/she will be asked to stop. (2) Respect: Given the nature of this course, we may discuss issues that some of you may find embarrassing, uncomfortable, and/or even "inappropriate." To remain in this class, you must be respectful of others and maintain a mature and professional manner at all times. Failure to do so will result in your expulsion from the course. (3) The Student's Guidebook addresses the issues of academic cheating and plagiarism. These are a breach of conduct, and students are subject to disciplinary actions. It's simple. Do NOT cheat (to cheat is to act dishonestly or unfairly in order to gain an advantage) or plagiarize (to plagiarize is to take the work or idea of someone else and pass it off as one's own)!

Changes to Class:

Minor changes may be made to this schedule; modifications will be announced on myLeo Online.

Student Conduct:

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. The Code of Student Conduct is described in detail in the Student Guidebook.

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, Chatbots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.

Students with Disabilities—ADA Statement:

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:
