Course Description and Assessment Outcome

This course is designed for students to continue to develop a professional conducting approach with emphasis on techniques appropriate to instrumental conducting beyond the second semester of conducting and Instrumental Organization II. Upon completion of the course the student will demonstrate acquired scholarship in intermediate and advanced conducting techniques, score analysis and preparation, visual/aural discrimination skills and rehearsal techniques.

The applied instructor selects literature and plans lessons in a logical sequence specifically designed to prepare each student to meet the stated student learning outcomes. Thus, the literature and skills addressed in each lesson will vary according to each student's experience in performance repertoire and technical strengths and weaknesses. In practice, after assessing a student's skills and needs in the early lessons, the applied instructor often provides a more detailed overview of the semester's activities; however, this overview is specific to that student and the sequential activities are contingent upon that student's continued progress.

Objectives of Instrumental Conducting

Since the art of conducting demands a spontaneous physical and mental response from the conductor, the ultimate objective of instrumental conducting will be the development of each student's ability to critically evaluate technical and musical criteria of the ensemble rehearsal/performance and to clearly demonstrate musical intentions through physical and oral communication. This course may use non-ensemble modalities in terms of verbally and gesturally introducing repertoire to the instructor.

Because the development of conducting skills and rehearsal techniques are, in fact, directly related to:

1. the innate and learned musical skills of the individual student
2. the ability to apply listening skills in an analytical manner
3. the student's pedagogical knowledge of all instruments (winds, strings, percussion)
4. the ability to associate music history and style to performance practices

5. the personality and confidence of each student to communicate these skills to the performers in the ensemble, each undergraduate conducting student will ultimately be faced with the challenge of developing individual weaknesses, the same as in the study of his/her applied instrument.

It is assumed that all students have achieved competence in solfeggio, melodic/harmonic dictation, and a conversant knowledge of the performance fundamentals and practices of all instruments as taught in instrumental techniques and music education classes. Should any of these areas be deficient, the student will be expected to initiate individual practice and/or assistance to improve these essential skills.
