

**AEC 380.01W – AGRICULTURAL STATISTICS  
COLLEGE OF AGRICULTURAL SCIENCES AND NATURAL RESOURCES  
SUMMER 1, 2024**

## **COURSE SYLLABUS**

### **Instructor**

Name: Dr. Jose Lopez, Professor of Agribusiness  
Office location: Agricultural Science Building, Room 231  
Office phone: (903) 886-5623  
Office fax: (903) 886-5990  
University email address: Jose.Lopez@tamuc.edu

### **Class Time**

Web Based Course ([myleonline.tamuc.edu](http://myleonline.tamuc.edu))

### **Office Hours**

You can contact me via email at [Jose.Lopez@tamuc.edu](mailto:Jose.Lopez@tamuc.edu). Alternatively, you can email me from D2L ([myleonline.tamuc.edu](http://myleonline.tamuc.edu)). I generally answer emails within 48 hours. Students who email me after 5:00 PM can expect to receive a reply within 48 hours starting at 8:00 a.m. of the next business day (M-F). Students who email me during holidays or over the weekend should expect a reply within 48 hours from 8:00 a.m. of the next regularly scheduled business day.

## **COURSE INFORMATION**

### **Recommended Text**

*Statistics: Informed Decisions Using Data*, by Michael Sullivan, Prentice-Hall, Inc., New York, 5th Edition, 2016. (ISBN-13: 9780134133539 or ISBN-10: 0134133536)

Note: Older editions of the textbook such as 4<sup>th</sup> or 3<sup>rd</sup> edition are also acceptable; however, the section numbering may not match. Students who decide to purchase older editions of the textbook are responsible for matching the section numbering provided in the course calendar (refer to Course Calendar at the end of this syllabus) with the section numbering in their textbook.

### **Required Software**

Microsoft Excel 2010 or newer version. Note: Older versions will work fine but procedures may not be the same as in Excel 2010 or in a newer version. The student will be responsible for figuring out the steps and procedures if using an older version than Excel 2010. Microsoft Excel is available in the computers at the Library and our Computer Lab (Room AGIT 148) in the Agriculture Building on campus.

Our university also provides access to **online only** versions of Microsoft Word, PowerPoint, and Excel.

Additional information available at:

<https://inside.tamuc.edu/facultystaffservices/academictechnology/student-resources.aspx>

The instructions on how to create a student account with your Leomail address are available at:

[https://inside.tamuc.edu/facultystaffservices/academictechnology/\\_documents/Office-365-Students.pdf](https://inside.tamuc.edu/facultystaffservices/academictechnology/_documents/Office-365-Students.pdf)

If you have technical questions, you can contact our Center for Information Technology Excellence (CITE). Their contact information is available at:

<http://inside.tamuc.edu/campuslife/campusServices/CITESupportCenter/contactus.aspx>

### **Prerequisites**

Math 1314 (MATH 141) or MATH 1324 (MATH 175) or Higher Math.

### **Teaching Philosophy**

1. A course must deliver information, concepts and methods that will be useful in the student's professional life. However, learning analytical reasoning skills and improving the ability to process and use information efficiently is more important than memorizing facts and formulas and performing procedures repeatedly.
2. Students learn best when theories, concepts and procedures are explained in plain language as well as formally, and are complemented with examples or applications that are relevant to the students.

### **Character Formation**

It is important during your graduate education to learn the values and rewards of hard work, responsibility, and honesty. The professor will promote character formation while teaching the course.

### **Course Description**

Principles and estimation techniques used in the analysis of agricultural data including measures of central tendency and dispersion, probability, sampling, hypothesis testing, analysis of variance, correlation coefficient, and regression.

### **Student Learning Outcomes**

Upon satisfactory completion of the course the students will be able to:

- Compute measures of central tendency and dispersion, and use them to analyze datasets.
- Summarize datasets using measures of central tendency and dispersion, diagrams and boxplots.
- Compute linear relationships among variables and use them for prediction.
- Measure the correlation between two agricultural variables and explain the difference between correlation and causation.
- Explain how linear regression is used to make predictions.
- Conduct hypothesis tests ( $t$  tests, and  $z$  tests) using one sample.
  - Determine null and alternative hypotheses, explain Type I and Type II errors, and state conclusions to hypothesis tests for population mean with known or unknown population standard deviation and for a population proportion.
- Conduct hypothesis tests ( $t$  tests, and  $z$  tests) using two samples.

- Determine null and alternative hypotheses, explain Type I and Type II errors, and state conclusions to hypothesis tests for two means when samples are dependent, two means when samples are independent, and two population proportions.
- Conduct hypothesis tests regarding a probability distribution, hypothesis tests regarding two categorical variables from one population (chi-square test for independence), and hypothesis tests regarding two or more populations for one categorical variable (chi-square test for homogeneity of proportions).
- Conduct hypothesis tests for three or more means using one-way analysis of variance (one-way ANOVA).
  - Determine null and alternative hypotheses, explain Type I and Type II errors, and state conclusions to hypothesis tests for three or more means
- Conduct post hoc tests on one-way ANOVA using Tukey test.
- Summarize the conclusions of Tukey test.

### **Enhanced Student Learning Outcomes for Graduate Students**

In addition to the learning outcomes above, Graduate Students will have greater emphasis on how to handle large data sets for agricultural research with the use of technology. Upon satisfactory completion of the course the students will be able to:

- Prepare, organize, and manipulate large data sets using technology
- Summarize and graphically analyze large data sets using technology
- Conduct regression analysis using technology, including model specification, parameter estimation and interpretation, regression statistics, and measures of fit
- Understand different probability distributions, including their relationships and characteristics
- Design and analyze experiments using ANOVA

### **Topics**

#### **Part I: Getting the Information You Need**

##### **Chapter 1: Data Collection**

###### **Section 1.1: Introduction to the Practice of Statistics**

- Concept and process of statistics; concepts of population, sample, individual, descriptive statistics, inferential statistics, parameter, statistic, qualitative variables, and quantitative variables (discrete and continues); levels of measurement of variable (nominal, ordinal, interval, and ratio).

#### **Part II: Descriptive Statistics**

##### **Chapter 3: Numerically Summarizing Data**

###### **Section 3.1: Measures of Central Tendency**

- Discussion, computation, and interpretation of measures of central tendency (mean, media, and mode) and the relationships between them; explanation of resistance.

###### **Section 3.2: Measures of Dispersion**

- Discussion, computation, and interpretation of measures of dispersion (range, variance, and standard deviation) and the relationships between them; use of the empirical rule to describe data that are bell shaped (percent of observations lying within one two, and three standard deviation from the mean); use of Chebyshev's Inequality to determine the minimum percentage of the observations that fall within k standard deviations of the mean (for k values greater than 1).

###### **Section 3.3: Measures of Central Tendency and Dispersion from Grouped Data**

- Approximation of the mean, variance, and standard deviation of a variable from data that summarized in frequency distributions; calculation of a weighted mean

#### Section 3.4: Measures of Position and Outliers

- Explanation of measures of positions (the z-score, the percentile, the interquartile, the interquartile range, and outliers); computation and interpretation z-scores, percentiles, quartiles, and interquartile range; checks for outliers.

#### Section 3.5: The Five-Number Summary and Boxplots

- The five-number summary; boxplots and their use to describe the shapes of distributions.

### Chapter 4: Describing the Relation between Two Variables

#### Section 4.1: Scatter Diagrams and Correlation

- Explanation of response and a predictor variables; drawing and interpretation of scatter diagrams; relationships between two variables (linear and non-linear, and positively and negatively associated; properties, computation, and interpretation of the linear correlation coefficient; discussion of confounding and lurking variables.

#### Section 4.2: Least-Squares Regression

- Computation of equations of the lines with emphasis on the least-squares regression line; predictions made by using equation of lines; calculation and interpretation of slopes and vertical and horizontal intercepts; assumptions of the least-squares regression line; parameter estimates, significance, and confidence intervals; properties of the least-squares regression line; computation and use of the sum of squared residuals to comment on the fit of a line.

#### Section 4.3: The Coefficient of Determination

- Use of the coefficient of determination ( $R^2$ ) to measure the linear relation that exists between two quantitative variables; computation and interpretation of the  $R^2$  and its properties; distinction, graphical interpretation, and interpretation of total deviation, explained deviation, and unexplained deviation.

#### Section 14.3: Multiple Regression

- The multiple regression model; assumptions; estimation, interpretation, significance, and confidence intervals of parameter estimates; measures of goodness of fit, the standard error of the regression, the coefficient of determination, and the adjusted coefficient of determination.

### Part III: Inference

#### Chapter 10: Hypothesis Tests Regarding a Parameter

##### Section 10.1: The Language of Hypothesis Testing

- Determination of the null and alternative hypothesis; explanation of Type I and Type II errors; and stating conclusions to hypothesis testing.

##### Section 10.3: Hypothesis Tests for a Population Mean

###### Population Standard Deviation Known

- Hypothesis testing about a population mean with standard deviation known using the classical approach, using P-values, and using confidence intervals with small and large samples; consideration one and two tail tests; discussion of statistical significance and practical significance.

###### Population Standard Deviation unknown

- Hypothesis testing about a population mean with standard deviation unknown using the classical approach, using P-values, and using confidence intervals with small and large samples; consideration of one and two tail tests.

##### Section 10.2: Hypothesis Tests for a Population Proportion

- Hypothesis testing about a population proportion with small and large samples; consideration of one and two tail tests; construction of confidence intervals

#### Section 10.5: Putting It Together: Which Method Do I Use?

- Determination of the appropriate hypothesis test to perform.

### Chapter 11: Inferences on Two Samples

#### Section 11.2: Inferences about Two Means: Dependent Samples

- Hypothesis testing regarding the difference of two dependent means using the classical approach, using P-values, and using confidence intervals. Discussion of matched-pairs data and hypothesis test requirements.

#### Section 11.3: Inferences about Two Means: Independent Samples

- Hypothesis testing regarding the difference of two independent means using the classical approach, using P-values, and using confidence intervals. Discussion of completely randomized designs, hypothesis test requirements, equal and unequal population standard deviations, Welch's approximate  $t$ , and pooled two-sample  $t$ -tests.

#### Section 11.1: Inference about Two Population Proportions

- Hypothesis testing regarding the two population proportions from independent samples using the classical approach, using P-values, and using confidence intervals. Discussion of completely randomized designs, hypothesis test requirements, the pooled estimate of  $p$ , sample size necessary for estimating the difference between two population proportions.
- Hypothesis testing regarding the two population proportions from dependent samples using the classical approach, using P-values, and using confidence intervals. Discussion of matched-pairs data, hypothesis test requirements, McNemar's test, contingency tables, sample size necessary for estimating the difference between two population proportions.

### Chapter 12: Inference on Categorical Data

#### Section 12.1: Goodness-of-Fit-Test

- Hypothesis tests regarding a probability distribution. Discussion of the chi-square distribution, mutually exclusive outcomes, expected counts, hypothesis test requirements, chi-square test statistic, chi-square critical values, and stating conclusions.

#### Section 12.2: Tests for Independence and the Homogeneity of Proportions

- Hypothesis tests regarding two categorical variables from one population (chi-square test for independence). Discussion of expected counts, hypothesis test requirements, contingency tables, chi-square test statistic, chi-square critical values, calculation of p-values, and stating conclusions.
- Hypothesis tests regarding two or more populations for one categorical variable (chi-square test for homogeneity of proportions). Discussion of expected counts, hypothesis test requirements, contingency tables, chi-square test statistic, chi-square critical values, calculation of p-values, and stating conclusions.

### Chapter 13: Comparing Three or More Means

#### Section 13.1: Comparing Three or More Means (One-Way Analysis of Variance)

- Hypothesis testing regarding three or more means using one-way ANOVA. Discussion of hypothesis test requirements, between-sample variability versus within sample variability, mean square due to treatments, mean square due to error, F-test statistic, ANOVA tables, F-critical values, calculation of p-values, and stating conclusions.

## Section 13.2: Post Hoc Test on One-Way ANOVA

- Perform the Tukey Test

### Enhanced Topics for Graduate Students

Graduate students are expected to have a better understanding of the process of statistics, including identifying research objectives; collecting information needed to answer the researchable questions; organizing, summarizing, and presenting relevant information; and drawing conclusions relevant to the researchable topic. To accomplish this, there will be (a) additional reading requirements, (b) additional writing assignments based on the additional readings, and (c) research projects as part of their exams.

#### Additional Reading Requirements:

- Assessing Normality
  - Using statistics; using graphs/probability plots; using statistical tests
- Measures of Skewness and Kurtosis
  - Usefulness; acceptable ranges; assessing normality
- Probability Distributions
  - Continuous probability distributions such normal, standard normal, chi-square, t, and F; relationships and characteristics; linear transformations
  - Discrete probability distributions such as binomial, poisson, and hypergeometric distributions
- Desired Properties of Estimators
  - Biased vs. unbiased estimators; consistent vs. inconsistent estimators; and efficient vs. inefficient estimators
- Hypothesis Testing with Small Samples
- Determining Sample Size within Given Margin of Error
- Law of Large Numbers and Central Limit Theorem
- Sampling Methods
  - Convenience samples, simple random samples, systematic samples, cluster samples, complex/multistage samples
- Designing completely randomized designs

#### Additional Writing Assignments

- Graduate students will be required to research and provide summaries of their findings on the additional reading requirements as part of their Exercises.

## **GRADING**

### Grading

<u>Item</u>	<u>Percentage</u>
Exams 1-4	75.00%
Quizzes	15.00%
Labs	10.00%
	<hr/>
	100.00%

Note: There would be an optional final comprehensive exam (Exam 5). The optional final comprehensive exam will replace your lowest exam grade (if you decide to take it). All your

grades will be available in MyLeoOnline (D2L), the learning management system used by Texas A&M University-Commerce.

### **Grading Scale**

<u>Range</u>	<u>Grade</u>
90-100.00	A
80-89.99	B
70-79.99	C
60-69.99	D
Less than 60	F

### **Exams**

Make sure you take all the mandatory exams (see Course Calendar below). No makeup exams will be offered. A grade of zero will be assigned to any missed mandatory exams. Exams and quizzes will be administered through MyLeoOnline (D2L). Exams will be timed and are to be completed by 11:59 PM on the due date. Make sure you have internet access and that your laptop battery is fully charged (if using a laptop computer).

### **Enhanced Exams for Graduate Students**

Exams for graduate students will be two parts. Part I will assess understanding of theory, concepts, and calculations; while Part II will assess the student ability to handle data sets for agricultural research with the use of technology.

### **Quizzes**

Quizzes will be graded and should be considered very important course material for exam preparation. Students will be required to submit their individual answers to the Quizzes via MyLeoOnline according to the Course Calendar below. Quizzes are due at 11:59 PM on the date provided in the Course Calendar below. See also course website (MyLeoOnline) for dates.

### **Labs**

Computer lab assignments will be graded. Computer lab assignments will test your understanding of the applications of statistics to situations you may encounter in your professional career. In these computer labs, you will learn the use Microsoft Excel to solve practical problems and make informed decisions using data. Students will be required to submit their individual answers via MyLeoOnline according to the deadlines announced on MyLeoOnline.

### **Additional Exercises**

Additional exercises will NOT be graded. Students are encouraged to ask questions during office hours. Additional Exercises are designed to highlight important concepts and major differences among topics or sections covered. The students are NOT required to submit their answers to the Additional Exercises.

### **Review Questions**

Review questions will NOT be graded. Students are welcome to ask questions during office hours. Review Questions are designed to help you understand and/or highlight the material you should understand after you complete a module. The students are NOT required to submit their answers to the Review Questions.

## Practice Questions

Practice Questions will NOT be graded. Students are welcome to ask questions during office hours. Practice Questions will be selected from the textbook. Practice Questions are provided for those students who wish to practice additional questions than the ones provided in each of the section Exercises (refer to Exercises section above). The students are NOT required to submit their answers to the Practice Questions.

## Class Preparation

It is your responsibility to read and study the book chapters that will be covered, to read and study all handouts, to complete and submit all course assignments in-time, and to take all the mandatory exams before the deadline. Students are strongly encouraged to contact the instructor if they have any questions or comments. Email is the best way to contact me. I will be available for in-person consultation in my office by appointment only.

## **TECHNOLOGY REQUIREMENTS**

This course will be offered online using D2L, the learning management system used by Texas A&M University-Commerce. Students will be required to download PowerPoint presentations and other important class material from the D2L website for the course.

### **LMS**

All course sections offered by Texas A&M University-Commerce have a corresponding course shell in the myLeo Online Learning Management System (LMS). Below are technical requirements

LMS Requirements:

<https://community.brightspace.com/s/article/Brightspace-Platform-Requirements>

LMS Browser Support:

[https://documentation.brightspace.com/EN/brightspace/requirements/all/browser\\_support.htm](https://documentation.brightspace.com/EN/brightspace/requirements/all/browser_support.htm)

YouSeeU Virtual Classroom Requirements:

<https://support.youseeu.com/hc/en-us/articles/115007031107-Basic-System-Requirements>

## **ACCESS AND NAVIGATION**

This course will be offered online using D2L, the learning management system used by Texas A&M University-Commerce. To log into the course, go to: [myleonline.tamuc.edu](http://myleonline.tamuc.edu)

You will need your campus-wide ID (CWID) and password to log into the course. If you do not know your CWID or have forgotten your password, contact the Center for IT Excellence (CITE) at 903.468.6000 or [helpdesk@tamuc.edu](mailto:helpdesk@tamuc.edu).

**Note:** Personal computer and internet connection problems do not excuse the requirement to complete all course work in a timely and satisfactory manner. Each student needs to have a backup method to deal with these inevitable problems. These methods might include the

availability of a backup PC at home or work, the temporary use of a computer at a friend's home, the local library, office service companies, Starbucks, a TAMUC campus open computer lab, etc.

## **COMMUNICATION AND SUPPORT**

### **Student Support**

If you have any questions or are having difficulties with the course material, please contact your Instructor.

### **Technical Support**

If you are having technical difficulty with any part of Brightspace, please contact Brightspace Technical Support at 1-877-325-7778. Other support options can be found here:

<https://community.brightspace.com/support/s/contactsupport>

### **Interaction with Instructor Statement**

The primary form of communication with the class will be through course Announcements and emails. Any changes to the syllabus or other important information critical to the class will be disseminated to students via class Announcements and/or via email through your official university email address available to you through MyLeo. It will be your responsibility to check the course Announcements and your university email regularly.

I generally answer emails within 48 hours. Students who email me after 5:00 PM can expect to receive a reply within 48 hours starting at 8:00 am of the next business day (M-F). Students who email me during holidays or over the weekend should expect a reply within 48 hours from 8:00 AM of the next regularly scheduled business day.

## **COURSE AND UNIVERSITY PROCEDURES/POLICIES**

### **Course Specific Procedures**

#### **Academic Honesty**

Students who violate University rules on scholastic dishonesty are subject to disciplinary penalties, including (but not limited to) receiving a failing grade on the assignment, the possibility of failure in the course and dismissal from the University. Since dishonesty harms the individual, all students, and the integrity of the University, policies on scholastic dishonesty will be strictly enforced. In **ALL** instances, incidents of academic dishonesty will be reported to the Department Head. Please be aware that academic dishonesty includes (but is not limited to) cheating, plagiarism, and collusion.

*Cheating* is defined as:

- Copying another's test or assignment
- Communication with another during an exam or assignment (i.e. written, oral or otherwise)
- Giving or seeking aid from another when not permitted by the instructor

- Possessing or using unauthorized materials during the test
- Buying, using, stealing, transporting, or soliciting a test, draft of a test, or answer key

*Plagiarism* is defined as:

- Using someone else's work in your assignment without appropriate acknowledgement
- Making slight variations in the language and then failing to give credit to the source

*Collusion* is defined as:

- Collaborating with another, without authorization, when preparing an assignment

If you have any questions regarding academic dishonesty, ask. Otherwise, I will assume that you have full knowledge of the academic dishonesty policy and agree to the conditions as set forth in this syllabus.

### **Attendance Policy**

Students are expected to attend class and actively participate. Student participation/activity will be monitored by the professor. Students should plan to dedicate approximately 15-20 hours/week of time to this course.

### **APA Citation Format Policy**

It is very important that you learn how to cite properly. In some ways, citations are more important than the actual text of your paper/assignment. Therefore, you should take this task seriously and devote some time to understanding how to cite properly. If you take the time to understand this process up front, it will save you a significant amount of time in the long run (not to mention significant deductions in points).

In the social and behavioral sciences, we generally follow the APA (American Psychological Association) formatting style. As a rule of thumb, one cites whenever they are paraphrasing other people's words or when they quote other's words directly. You may learn to cite from a variety of different sources including the APA Tutorial and the sources listed below and in the Getting Started section of your course.

[www.apastyle.org](http://www.apastyle.org)

<http://owl.english.purdue.edu/owl/resource/560/02/>

[www.library.cornell.edu/resrch/citmanage/apa](http://www.library.cornell.edu/resrch/citmanage/apa)

It is the student's responsibility to understand how to cite properly. If you have questions, feel free to ask.

### **Late Work**

It is the student's responsibility to plan accordingly and submit their assignments in a timely manner. Class assignments will be announced. The instructor reserves the right to assign a grade of zero to any late assignment.

### **Drop Course Policy**

Students should take responsibility for dropping themselves from the course according to University policy should this become necessary.

## **Syllabus Change Policy**

The syllabus is a guide. Circumstances and events, such as student progress, may make it necessary for the instructor to modify the syllabus during the semester. Any changes made to the syllabus will be announced in advance

### **University Specific Procedures**

#### **TAMUC Attendance**

For more information about the attendance policy please visit the [Attendance](#) webpage and [Procedure 13.99.99.R0.01](#).

<http://www.tamuc.edu/admissions/registrar/generalInformation/attendance.aspx>

<http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/13students/academic/13.99.99.R0.01.pdf>

#### **Academic Integrity**

Students at Texas A&M University-Commerce are expected to maintain high standards of integrity and honesty in all of their scholastic work. For more details and the definition of academic dishonesty see the following procedures:

[Undergraduate Academic Dishonesty 13.99.99.R0.03](#)

<http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/13students/undergraduates/13.99.99.R0.03UndergraduateAcademicDishonesty.pdf>

[Graduate Student Academic Dishonesty 13.99.99.R0.10](#)

<http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/13students/graduate/13.99.99.R0.10GraduateStudentAcademicDishonesty.pdf>

#### **Counseling Center**

A student that faces a crisis or a serious and unforeseeable event that affects his/her class performance must contact the Counseling Center, Halladay Student Services Building, Room 203, Phone (903) 886-5145. If important class material or course assignments are missed because of such crisis or event, the student must contact the instructor as soon as possible.

Website: <http://www.tamuc.edu/campusLife/campusServices/counselingCenter/>

The Counseling Center at A&M-Commerce, located in the Halladay Building, Room 203, offers counseling services, educational programming, and connection to community resources for students. Students have 24/7 access to the Counseling Center's crisis assessment services by calling 903-886-5145. For more information regarding Counseling Center events and confidential services, please visit the following website.

Website: [www.tamuc.edu/counsel](http://www.tamuc.edu/counsel)

## **Students with Disabilities-- ADA Statement**

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:

Office of Student Disability Resources and Services

Texas A&M University-Commerce

Gee Library- Room 162

Phone (903) 886-5150 or (903) 886-5835

Fax (903) 468-8148

Email: [studentdisabilityservices@tamuc.edu](mailto:studentdisabilityservices@tamuc.edu)

Website: [Office of Student Disability Resources and Services](#)

<http://www.tamuc.edu/campusLife/campusServices/studentDisabilityResourcesAndServices/>

## **Nondiscrimination Notice**

Texas A&M University-Commerce will comply in the classroom, and in online courses, with all federal and state laws prohibiting discrimination and related retaliation on the basis of race, color, religion, sex, national origin, disability, age, genetic information or veteran status. Further, an environment free from discrimination on the basis of sexual orientation, gender identity, or gender expression will be maintained.

## **Campus Concealed Carry Statement**

Texas Senate Bill - 11 (Government Code 411.2031, et al.) authorizes the carrying of a concealed handgun in Texas A&M University-Commerce buildings only by persons who have been issued and are in possession of a Texas License to Carry a Handgun. Qualified law enforcement officers or those who are otherwise authorized to carry a concealed handgun in the State of Texas are also permitted to do so. Pursuant to Penal Code (PC) 46.035 and A&M-Commerce Rule 34.06.02.R1, license holders may not carry a concealed handgun in restricted locations.

For a list of locations, please refer to the [Carrying Concealed Handguns On Campus](#) document and/or consult your event organizer.

Website:

<http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/34SafetyOfEmployeesAndStudents/34.06.02.R1.pdf>

Pursuant to PC 46.035, the open carrying of handguns is prohibited on all A&M-Commerce campuses. Report violations to the University Police Department at 903-886-5868 or 9-1-1.

## IMPORTANT DATES

Data	Description
June 3, Monday	First day of classes
July 3, Wednesday	Last day of classes
July 3, Wednesday	Final Exam

## COURSE CALENDAR

Every effort will be made to adhere to the course calendar below. However, unforeseen circumstances may require changes to the course calendar. In that case, changes will be announced via University Email and in Announcements. The professor reserves the right to change the course calendar if necessary and depending on the progress of the class. I highly recommend that you follow the calendar outlined below **VERY CAREFULLY** so that you are sure to complete readings as assigned and turn your assignments in on time.

**AEC 380.01W - AGRICULTURAL STATISTICS**  
**Course Calendar, Summer 1, 2024**  
**Web-Based Class**

<b>Day</b>	<b>Date</b>	<b>Subject/Material Covered</b>	<b>Assignment Due By 11:59 PM on Date Provided</b>
<b>Week 1</b>			
Mon.	June 3	Syllabus, D2L Tutorial (MyLeo Online Student Resource Course) Sec. 1.1: Intro. to the Practice of Statistics	D2L Tutorial
Tue.	June 4	Sec. 1.1 (Cont.)	Quiz
Wed.	June 5	Sec. 3.1 + 3.2: Measures of Central Tendency and Dispersion	
Th.	June 6	Sec. 3.1 + 3.2 (Cont.)	Quiz Lab
<b>Su.</b>	<b>June 9</b>	<b>Exam 1 (Sec. 1.1 + 3.1 + 3.2)</b>	<b>Exam 1</b>
<b>Week 2</b>			
Mon.	June 10	Sec. 3.4 + 3.5: Measures of Position, Outliers, and Boxplots	
Tue.	June 11	Sec. 3.4 + 3.5 (Cont.)	Quiz Lab
Wed.	June 12	Sec. 4.1 + 4.2 + 4.3: Scatter Diagrams, Correlation, and Least-Squares Regression	
Th.	June 13	Sec. 4.1 + 4.2 + 4.3 (Cont.)	Quiz Lab
<b>Su.</b>	<b>June 16</b>	<b>Exam 2 (CH03 + CH04)</b>	<b>Exam 2</b>
<b>Week 3</b>			
Mon.	June 17	Sec. 10.1 + 10.3: Hypothesis Tests for a Population Mean	

Tue.	June 18	Sec. 10.1 + 10.3 (Cont.)	Quiz
Wed.	June 19	Sec. 10.2: Hypothesis Tests for a Population Proportion	
Th.	June 20	Sec. 10.2 (Cont.)	Quiz
<b>Su.</b>	<b>June 23</b>	<b>Exam 3 (CH03 + CH10)</b>	<b>Exam 3</b>
<b>Week 4</b>			
Mon.	June 24	Sec. 11.1 + 11.2 + 11.3: Inferences on Two Samples	
Tue.	June 25	Sec. 11.1 + 11.2 + 11.3 (Cont.)	Quiz
Wed.	June 26	Sec. 12.1 + 12.2: Inference on Categorical Data	
Th.	June 27	Sec. 12.1 + 12.2 (Cont.)	Quiz
<b>Su.</b>	<b>June 30</b>	<b>Exam 4 (CH11 + CH12 )</b>	<b>Exam 4</b>
<b>Week 5</b>			
Mon.	July 1	Sec. 13.1 + 13.2: Comparing Three or More Means	
Tue.	July 2	Sec. 13.1 + 13.2 (Cont.)	Quiz
<b>Wed.</b>	<b>July 3</b>	<b>Optional Comprehensive Exam 5 (Sec. 1.1, CH03, CH04, CH10, CH11, CH12, CH13)</b>	<b>Optional Exam 5</b>
