Software Required: Wireshark, Python/Java
Optional Texts and/or Materials: None

Course Description

This course provides a self-contained overview of computer networking by introducing many key concepts and terminology. In particular, we will study the concepts of computer networks and communication including layered architecture, network application services and domain name resolution, transport layer services and TCP/UDP protocols, network layer forwarding and routing functions and subnet/NAT configurations, and link layer functions with the focus of Ethernet standards.

Student Learning Outcomes (Should be measurable; observable; use action verbs)

1. Define and understand basic data communications, networking topologies, and layered architecture

The syllabus/schedule are subject to change.

The Counseling Center at A&M-Commerce, located in the Halladay Building, Room 203, offers counseling services, educational programming, and connection to community resources for students. Students have 24/7 access to the Counseling Center's crisis assessment services by calling 903-886-5145. For more information regarding Counseling Center events and confidential services, please visit www.tamuc.edu/counsel

2. Observe and gain experience with networking platforms from the TCP/IP environment
3. Understand the fundamentals of datagram network, IP addresses, and routing algorithms and protocols
4. Integration of the basic networking concepts into an understanding of modern computer networking

COURSE REQUIREMENTS

Prerequisites

None

Minimal Technical Skills Needed

- Basic knowledge of computer systems and operating systems
- Basic knowledge of data structure, algorithms, and statistics/probability
- Basic knowledge of Python (or Java) programming

Instructional Methods

- Textbook reading assignments
- Recorded (summary) lectures and (full) slides
- Exams

Student Responsibilities or Tips for Success in the Course

- Reading textbook is essential!
- Should be well (fully) prepared for exams
- This is a 5-week (asynchronous) Web-based course. The students must read announcements and access course materials on a daily basis posted on the course page or through email. Also, the students must respond if the instructor asks to do so within 24 hours.

The syllabus/schedule are subject to change.

GRADING (Tentative)

Final grades in this course will be based on the following scale:

A = 90%-100%

B = 80%-89%

C = 70%-79%

D = 60%-69%

F = 59% or Below

Weights of the assessments in the calculation of the final letter grade (TENTATIVE):

Components	Weight	Remarks
Midterm exam	50%	Two exams and the higher score will be taken
Final exam	50%	Cumulative exam

Attendance Policy:

This is an asynchronous, Web-based section and there will be no synchronous meetings (as it is not allowed by the university). For successful communications, the students are required for reading announcements with no significant delay (within 48 hours), disseminated through the course page and email messages.

Makeup Policy (Exams):

Makeup exams will not be given for any reason. However, students will have two midterm exams, and the higher score will only be considered toward the final grade. If a student is unable to take the final exam for any emergency reason, the student may receive an 'X' (incomplete), which is defined as follows:

"When an "X" is given for a grade in a course, the credit hours and grade point averages are not included until a grade is received which can be up to one year. If the "X" is not removed by that time, the grade becomes an F, and the hours are included in the number of hours attempted."

Artificial Intelligence and ChatBots

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.
