COURSE INFORMATION

Course Description: This course is designed to cover principles and research related to social and cultural bases of behavior, motivation, attitude, value, leadership, propaganda, groups, morale, industrial conflict, roles, ethnic attitudes, and status.

In this course we will cover the fundamental theories and research conducted in social psychology. We will cover both classic and modern social psychological research. There is no textbook for this class. Instead we will read journal articles and book chapters each week. These readings will be available on myLeo Online. Additionally, there are no lectures. Instead, we will discuss these readings through reaction papers posted on a discussion board each week. The purpose of these readings is to give you an understanding of (1) the beginnings of social psychology, (2) major areas within social psychology, and (3) how social psychological research is conducted. Due to the breadth of the research that has been conducted in social psychology it is impossible to cover every theoretical contribution. Therefore, these readings are considered to be key for the field.

COURSE REQUIREMENTS

Grading:

Grades will be based on reaction papers/discussion posts (1/4 page each/per covered topic/section) and a final research proposal paper. Reaction papers/discussion posts are due by the Friday (by 11:59pm) of each week, and two replies to your peers are due by the Sunday (by 11:59pm) of that week. However, you are welcome to work ahead in this course! The final research proposal is a serious proposal of research. This paper should not exceed 15 pages (double spaced, times new roman, 12-point font, in Microsoft Word, using APA formatting). In the proposal, you will review relevant literature, state a hypothesis, and then propose a study that directly tests your hypothesis. Make sure to email me with your paper proposal before beginning.

Assessment:

Reaction papers (via discussion board): 100 points

Research proposal: 100 points

A = 90%-100%

B = 80%-89%

C = 70%-79%

D = 60%-69%

F = 59% or Below

TECHNOLOGY REQUIREMENTS

You will need access to a computer with internet to access myLeo Online.

COMMUNICATION AND SUPPORT

Interaction with Instructor:

Please feel welcome to contact me at any time via University email. I would be happy to set up an appointment to meet via Zoom or by phone. All email should receive a response within 48 hours. If you have not received a response then assume your email did not go through and please re-send the email. All email should include student's last name, first name, course name and brief description of the reason for contact.

COURSE AND UNIVERSITY PROCEDURES/POLICIES

Student Behavior:

My expectations in this area should be very simple to meet. Please be respectful of different opinions and approach our discussions with professionalism, which will require all of you to be mature in responses to one another. Given the nature of this course, we may discuss issues that some of you may find embarrassing, uncomfortable, and/or even "inappropriate." The Student's Guidebook addresses the issues of academic cheating and plagiarism. These are a breach of conduct, and students are subject to disciplinary actions. It is simple. Do NOT cheat (to cheat is to act dishonestly or unfairly in order to gain an advantage) or plagiarize (to plagiarize is to take the work or idea of someone else and pass it off as one's own)!

Changes to Class:

Minor changes may be made to this schedule; modifications will be announced on myLeo Online.

Student Conduct:

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. The Code of Student Conduct is described in detail in the Student Guidebook.

AI Use in Course

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.
