Course Description

This course shall examine traditional and contemporary philosophies associated with the pedagogy of education. Best research-based practices shall be emphasized as well as how these pedagogical practices are grounded in theories and philosophies for classroom and school settings. Specific and explicit theoretical and philosophical applications will be made to the growth and development of the learner. Progressive approaches to curriculum and instruction will be explored.

This course will engage students in critical conversations over the definition of philosophy of education and explore selected classical and contemporary theories of education that challenge established educational practices which impact schooling as it is practiced today. During the semester, students will read and analyze a variety of texts, view films, and engage in activities and discussions dealing with various philosophical topics regarding educational perspectives, policies, practices, culture, and society. Students will examine their own implicit perspectives about education, engage in reflexive conversation, raise questions, pose arguments, and study current issues about philosophical principles of justice, equality, ethics, aesthetics, and democracy as related to philosophy of education, the aims and purpose of education, and the educational process. Prerequisites: Doctoral level standing or consent of the instructor.

Student Learning Outcomes

1. Define philosophy and its related terms, such as: epistemology, metaphysics, and axiology.
2. Discuss the contributions of prominent philosophers and characteristics of respective philosophies in relation to teaching methods, curricular strategies, and the aims of education.
3. Understand and discuss the relationship between theory, education politics, policies, standards, educational practice, philosophy of education, and the role of education in a democratic society.
4. Understand, articulate, and apply tenets of classical and contemporary philosophies of education to think critically about power relations and controversial topics in schooling and society.

The syllabus/schedule are subject to change.

5. Analyze, interpret, evaluate, and describe the historical context of various theories and philosophies, and contemplate how ideas influence culture, expression, beliefs, perceptions of reality, and the development and adherence to social norms.

COURSE REQUIREMENTS

Minimal Technical Skills Needed

Using the learning management system (D2L Brightspace), using Microsoft Office software, using presentation and graphics programs, using chat programs such as Adobe Connect and Zoom, and using VoiceThread.

Instructional Methods

This is a hybrid course with classes meeting in-person and in D2L on alternating weeks throughout the semester. It includes research papers and presentations, inquiry-based discussions, arts-based response projects, and individual assignments.

Student Responsibilities or Tips for Success in the Course

Success in the course is largely based on keeping up with reading, active participation in discussions in class and online, doctoral level work on assignments and staying up to date on course related information which requires regularly logging into the course website, checking University MyLeo Email daily.

GRADING

Final grades in this course will be based on the following scale:

A = 90%-100%

B = 80%-89%

C = 70%-79%

D = 60%-69%

F = 59% or Below

Assessments

Please note that ONE letter grade will be deducted for each day assignments are submitted late. Another letter grade will be deducted for each day the assignment is late thereafter. For example, if your assignment is submitted at 12:00 a.m., instead of 11:59 p.m. on the date the assignment is due, the highest grade you can earn is a "B". If it is turned in two days late, the highest grade you can earn is a "C" and so on. Discussions that are posted late will not be evaluated and the student will receive a "zero" for that discussion.

The syllabus/schedule are subject to change.
