Welcome to class, and this excellent spring semester of learning. The primary focus of this class is LEARNING. It is the most important consideration of our work together.

Toward that end, content above is summarized by the following:

1. Prepare for class.
 - Outline each chapter.
 - Read each chapter after outlining.
 - Attempt to reconstruct the key concepts of each chapter.
2. Attend and actively participate in class.
 - This class utilizes experiential learning, and therefore one must be active to participate. Actively participating means applying the content you have learned and prepared before class. Assessing main content for the chapter/discussion. Making your hypothesis. And then being brave enough, to explore your thoughts, knowledge, opinions, learning... out loud with you peers!
