# **COURSE INFORMATION**

Textbook: BIOLOGY(MCGRAW Hill) by Brooker, ISBN: 9781266683633 CONNECT ACCESS CARD 6<sup>TH</sup>, see Bookstore

# **Course Description**

This class will cover the anatomy, physiology, classification and evolution of animals. This course will employ lecture and discussion.

 Students will demonstrate an understanding of the mechanism of natural selection.

CT #8 Students will be able to analyze, evaluate, or solve problems when given a set of circumstances or data.

Students will demonstrate a knowledge of homeostasis.

EQS #4 Students will be able to interpret, test and demonstrate principles revealed in empirical data.

 Students will give a group presentation on the results of one of their lab assignments and explain the methods, results and conclusions of their experiment.

# **COURSE REQUIREMENTS**

Course Goals: To give the beginning biology student a conceptual and practical understanding necessary for mastery of the life science curriculum. In addition, the student will learn thinking skills necessary for understanding and interpreting scientific information. This class is difficult. Do not make it more so by failing to study an appropriate amount of time. Fifteen to twenty hours a week is a good estimate of the time you need to be successful. Don't Cram. It does not work.

Learnsmart(Connect) Assignments; Learnsmart assignments will be completed for each chapter covered. This will be delivered through Connect.

Tests: Tests will consist of objective questions. Tests will not be made up unless the absence is excused according to university policy. If the test is not made-up the student will receive no (0) points. The makeup must be completed within one week of the original test date unless there are extenuating circumstances (i.e. extended hospital stay).
