### **Course Engagement**

*Final Evaluation and Grade Depends on both Classroom attendance and Participation:*  
Inadequate participation or lack of required time commitment in each class significantly affects students' grades. No matter the course venue, students must engage in a comparable amount of time. Expectations of both Face-to-Face classes and those with Online components include time spent reading and studying course material.

To earn a level of competency within a specific course, students must demonstrate both mastery of content and active engagement.

Mastery of content areas is evidenced by successful completion of course assignments such as written papers, group project deliverables, tests/quizzes, and other tangible products designed by instructors to evaluate knowledge and skills.

Additionally, the Social Work Profession is built upon human interactions and building human relationships – which is defined as engagement. Engagement is defined as meaningful involvement in interactions with the Instructor, peers, and outside stakeholders as appropriate (such as contacting a social worker to interview for a required assignment). Within the classroom setting, whether virtual or F2F, students must actively participate in 80% of engagement activities as outlined by individual instructors. These activities may include but are not limited to, participation in live, synchronous virtual classes, attending a Face-to-Face course when appropriate, interacting with peers in posted discussions, and collaborating in group interactive projects.

Students must meet standards for content mastery on tangible assignments and meet the threshold of active engagement of the time set during a semester by the Instructor.

Instructors are experts in each course content area and set the standards for students to meet to successfully complete the course.

### **Student Conduct**

Students preparing to become professional social workers must adhere to the *University Code of Conduct*, *Department Code of Conduct* and the *National Association of Social Workers (NASW) Code of Ethics*.

## **Department Code of Conduct**

The Academic and Professional Issues Committee (API) hearing is the formal path of due process for a student in regard to the concern being expressed. A student will be referred to the School of Social Work's API by faculty, field instructors, or faculty field liaisons when a concern arises regarding academic and student conduct and/or professional preparation. When "a student who fails to meet the professional expectation of the field for which he/she is preparing may be suspended from further study in that program by the department administering that program" as demonstrated through ethical and/or legal violations; aberrant disregard for School of Social Work Code of Conduct or other concerns as determined by the [Academic and Professional Issues Committee](#).

Graduate Students have the right to appeal to the Graduate Dean according to [University Procedure 13.99.99.R0.39](#).

Undergraduate Students have the right to appeal to the Dean of the College of Education and Human Services according to [University Procedure 13.99.99.R0.41](#).

## APPENDIX B GRADING RUBRIC DOCUMENTATION ACTIVITY

### General Professional Guidelines

- Consider case management record to be a legal and/or medical document
- Documentation follows the agency/organization/state or other governing body protocols, and these are followed in the charting. There may be differences in states; know state requirements.
- Documentation reflects any significant client, family or ancillary service provider contact
- Documentation is sufficiently detailed and organized to enable another social worker to assume work with the client at any time.
- Do not leave blanks; write N/A (or not applicable)
- Mark any error with a single line and initials – never use correction fluid or tape; on computer, add an addendum. You cannot just omit the error. Always explain to the client documentation process and any limits of confidentiality and share with client when possible/appropriate (consider cultural concerns and history in response to "secrecy" of documentation)

### Tips and Suggestions

- Highlight the client's strengths, supports and coping mechanisms
- Use a professional writing style avoiding jargon, using shorter words with precise meanings, writing short paragraphs focused on a single concept
- Do not just report facts as you have been told. Instead, specify where the information came from (*client reports/states, client is diagnosed with*)
- Remember to report negative (absent) as well as positive (present) observations/information/findings
- Each page should have client's name or identification and include a confidentiality notice
- Use *Clinician's Thesaurus* or other documentation resource. READ READ READ – read other professional's progress/case notes.

### What to avoid

- Never use your own or casual abbreviations (use medical abbreviations)
- Do not take shortcuts at the cost of clarity
- Do not use generalizations or over-interpretations
- SPELL CHECK! This is your integrity!
- Do not use jargon
- Do not diagnose if the client does not have a clinical diagnosis (*client is depressed*, rather say *client states that he is having feelings of sadness or depressed mood*). OR describe symptoms (*client describes seeing*

The syllabus/schedule is subject to change.

*hallucinations or is feeling sad daily)*

- Do not make recommendations without backing of facts and reason

### **Initial Intake or Assessment Note**

- Completed documentation within 48 hours of meeting depending on your agency
- Includes introduction of social work case manager/program role and purpose
- Includes client rights and responsibilities and grievance mechanism
- Includes, but is not limited to:
  - referral reasons/process
  - behavioral observations
  - current living situation
  - family history
  - support system
  - education/employment
  - financial/insurance
  - mental health/substance abuse
  - medications/medical concerns
  - coping behaviors
  - legal issues
  - advance directives
  - client/family goals
  - clinical assessment
  - psychosocial concerns/problem identification
  - violence/suicidality history
  - spiritual/cultural factors

### **Goal Planning/Care Plan**

- Both short- and long-term goals/care plan documented
- Signature of both client and social work case manager
- Priorities and consequences of achievement/non-achievement
- Achievements toward or changes in goals documented
- Signature (or other documentation of commitment of client and worker)

### **Progress Notes**

- Always dated by contact/intervention (If writing late state *late entry*. If adding information state *addendum to note dated XX/XX/XXXX*)
- Document type or place of contact using:
  - *Home visit, face-to-face, clinic/agency visit, hospital, telephone, mail, collateral contact, community contact, etc.*
- Document outcome of contact using: Missed by client, completed, rescheduled, etc.
- Outline reason for contact (client called requesting..., CM conducted scheduled home visit...)
- Write in third person and refer to all individuals by title (client, case manager, sister of client, nurse, housing manager)

The syllabus/schedule is subject to change.

- Write in present tense and identify source for material that is controversial/potentially untrue/client perception. For example, The client describes her parents as severe alcoholics rather than the client's parents were alcoholics.
- Describe client mood, affect, symptoms using client words first, then professional impression
- Always end notes with plan (CM will send referral, client will meet with housing CM...)
- Sign using credentials (e.g. Sally Social-worker, BSW student)

### ***SOAP Case Note Template:***

Some social workers use the SOAP framework to organize their case notes. The SOAP process starts with documenting the client's **subjective** thoughts and feelings. Then, the caseworker will notate their **objective** observations about the client's circumstances. The social worker will provide an **assessment** of the goals and any challenges they will need to address first, as well as an action **plan** to meet those goals.

The SOAP framework can be conducive for unexpected encounters or encounters without clear guidelines to follow regarding documentation. Check out one of our social work case note templates with example information below to see the SOAP framework in action.

- **Subjective:** "I am feeling jittery, sad, and unable to work these days. I'm not sleeping and I was fired."
- **Objective:** The client is a 26-year-old male and has a history of anxiety, depression, and panic attacks. PHQ-9 score was 22 for severe depression, and GAD-7 score was 14 for moderate anxiety.
- **Assessment:** The client's mental health needs to be addressed through therapy first. Then employment can be secured.
- **Plan:** Client was referred to behavioral health for follow-up and will be seen by a licensed clinical social worker this week to begin an intensive short-term therapy plan. Client provided with groceries, food stamps, and 30-day bus pass. Client was referred to employment assistance.
