Course Description

We are born male or female. We become masculine or feminine. This course will explore the social and cultural construction of gender differences, focusing on contemporary issues. This course will provide an in-depth focus on sexuality, intersexuality, and transgendered people. The course begins with a description of the

The syllabus/schedule are subject to change.

sociological approach to the study of men and women and how it differs from other perspectives. We will examine the ways that boys/men and girls/women are socialized differently. Next we will

explore gender differences in social institutions including the family and the workplace.

By the end of this course you should be able to understand and apply:

- (1) a sociological approach to the study of men and women, which includes attention to women and men of different cultures, race and ethnicities, sexual orientations, and social classes;
- (2) the social construction of gender in social institutions;
- (3) the social construction of gender in relationships and in interactions;
- (4) sociological methods and theories; and,
- (5) sociological concepts and theories to your personal experiences and to your observations of others.

You should also be able to engage in critical thinking. Critical thinkers are able to

-understand many sides to an issue, even if they disagree with the arguments presented;

-analyze course material actively; and

-set aside their personal beliefs and values in order to understand issues from a scientific perspective.

Student Learning Outcomes (Should be measurable; observable; use action verbs)

1. Students will be able to sufficiently analyze and synthesize theoretical knowledge in Sociology of Gender. Assessed Through: Final Grades
2. Students will be able to critically think about complex gender related concepts/knowledge. Assessed through: discussion posts.
3. Students will be able to communicate, express, and discuss complex gender related concepts sufficiently. Assessed through: discussions, assignment

COURSE REQUIREMENTS

Minimal Technical Skills Needed

Ability to navigate the learning management system and a general knowledge of computers and the internet.

Instructional Methods

This course will be conducted entirely via the web. All components of this class are online. We will not meet any time as a class. This course is only administered through D2L. If you need help using D2L, please see the technology services staff for help.

Read all announcements posted at the Home Page of the course and read all e-mails sent by me at your My Leo account in the eCollege. If you have problem with your email system, please contact the Instructional Technology office. Do follow university deadlines in schedules given at the university's website and in the undergraduate catalog.

A Note on AI/ChatGPT Use

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their

instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.

13.99.99.R0.03 Undergraduate Academic Dishonesty

13.99.99.R0.10 Graduate Student Academic Dishonesty

For this course, the use of AI is NOT allowed. The use of AI will result in a grade of 0 for the assignment for the first offense. The second offense will result in a grade of F for the course and submission to the academic dishonesty committee.

COURSE AND UNIVERSITY PROCEDURES/POLICIES

Course Specific Procedures/Policies

READINGS: *You are expected to complete all readings on time and be prepared to discuss them in class. There is a lot of reading in this course, none of which is optional. If you get behind, it will be difficult to catch up. You need to complete the readings prior to the class session in which they will be discussed. You will learn more if you do so. I highly recommend that you take careful notes on the assigned readings so that you can learn more, retain information, and prepare for assignments.*

Late Assignments:

Students who need extra time may submit assignments (excluding discussion board postings) up to one week after the assignment due date. Discussion board submissions will not be accepted for credit after the deadline except in extenuating circumstances.

A penalty of 10 percent of the total value of the assignment will be applied to the grade achieved on the late assignment regardless of the day of the week on which the work is submitted.

Students who submit assignments more than one week late will receive a grade of zero on the assignment unless they have made prior arrangements with the instructor.

Weekly Discussions: A handout with the requirements for the weekly discussions and the grading rubric will be available on the course webpage. NOTE: Online discussions should not be viewed as similar to a discussion around the dinner table with friends or family where everybody expresses their views, opinions, and beliefs on some topic which they know absolutely nothing about. Online discussions should reflect critical thinking and contain complete sentences that are grammatically correct. This is an academic course and your discussion topics will be linked directly to reading assignments. Your posts, as such, should reflect a certain amount of knowledge on the topic based on research, facts, and data. Cite your sources where appropriate. It is fine to critique, interpret, and occasionally interject an opinion or two, but for the most part, this should be an academic and intellectual discussion of the topic at hand. Always be polite and courteous when responding to someone else's comments or questions. The use of AI/Chat GPT is prohibited.

Reading Responses: There will be 5 book critiques worth 100 points each. These should be 3-4 pages in length (typed, double spaced) and submitted to the appropriate Folder. See guidelines for writing reviews and see the course schedule for due dates of each review. The use of AI/Chat GPT is prohibited.

The syllabus/schedule are subject to change.

Syllabus Change Policy

The syllabus is a guide. Circumstances and events, such as student progress, may make it necessary for the instructor to modify the syllabus during the semester. Any changes made to the syllabus will be announced in advance.

University Specific Procedures

Student Conduct

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. The Code of Student Conduct is described in detail in the Student Guidebook.

Department or Accrediting Agency Required Content

Some important information about the sociology of gender that you should understand

in order to master the objectives of this course:

1)The scientific objectives of sociological research

Sociologists conduct research in a

scientific, objective, and value-free way. Sociologists focus on describing prevalent

behaviors or attitudes in societies and explaining these attitudes and behaviors

The syllabus/schedule are subject to change.

theoretically. The studies you will read about are not personal opinions or political ideologies. Sociologists, like other social scientists, keep their own values and personal biases out of their studies of human behavior. As an example: When sociologists study attitudes about abortion, they do not state whether abortion is 'right' or 'wrong.' Rather, these researchers describe prevalent attitudes about abortion and explain why these attitudes exist.

2)

The goals of sociology when studying men and women.

There are different

approaches to studying men and women (biology, sociology, psychology, etc.). Each discipline is going to ask different questions and interpret similar facts differently.

Consider this example: If a police officer, firefighter, and architect examine a house, they are going to ask different, but equally important questions ("You need a bolt on your front door." "You need to remove that fire hazard." "You need to work on the foundation of your house.") Each person has the same set of "facts," but ask different yet equally important questions about that same set of facts. In contrast to some scientific disciplines, sociologists look for patterns, not exceptions. A major goal of the sociological study of men and women is to examine the most common or most typical values, behaviors and attitudes (even though exceptions are important).

3)

Sociological studies vs. personal/individual experiences.

Students read about some

findings from sociological studies and think, "That doesn't apply to me. It can't be true."

Just because you, personally, have not experienced something does not detract from the sociological insight. Some studies might not apply to your personal experience but

The syllabus/schedule are subject to change.

these studies do indicate social facts about patterns in behavior or attitudes.

**4)
Some people will feel threatened by or antagonistic
towards the course material**

because sociologists examine gender inequality and behaviors and attitudes that we take for granted. People have very strong feelings about relationships between and among men and women. Many people feel threatened or hostile when they hear about certain gender issues. It makes sense: gender is a part of our core identity. Biology has something to do with who we are as men and women but sociologists do not focus on the biological aspects. Sociologists focus on environment, group membership, social structure, and interactions (all of these terms will be explained during the course).

**5)
Sociologists do not blame or judge any groups .** Sociologists do not judge groups, even when studying issues such as domestic violence or rape. As an example, instead of judging men who engage in violence towards women, sociologists will ask, “What are rates of domestic violence? How do these rates vary by region or culture? Why do women or men who have been abused feel ashamed of it? How do laws about domestic violence influence our attitudes about it? What do beliefs about masculinity have to do with domestic violence?”
