Lecture:

This course is designed to introduce students to basic laboratory procedures and veterinary parasitology. This course will include, but not be limited to, the following: basics of parasitism, life cycles, pathogenesis, identification, and control of common internal (nematodes, tapeworms, flukes, and protozoa) and external (insects, mites, lice, fleas and ticks) parasites of veterinary and zoonotic importance in domestic animals.

The syllabus/schedule are subject to change.

Lab:

Hands-on laboratory course regarding the study of parasitology principles and procedures commonly utilized in veterinary medicine. This course is also an introduction to laboratory procedures and will include microscope care and use, sample collection, basic diagnostic analysis of fecal and other specimens and identification of parasites.

NOTE: This is the laboratory component of VETN 325 and must be taken in conjunction with it for all veterinary nursing students but is not required for non veterinary technology majors

Student Learning Outcomes

1. Students will demonstrate the ability to understand the hosts, life cycles, pathogenesis, and diseases caused by common parasites that affect most domestic animal species.
2. Students will effectively be able to identify common internal and external parasites (genus and species) that affect domestic animals.
3. Students will recognize common treatments and protocols used to control common parasites of domestic animal species.
4. Students will be able to perform common laboratory diagnostic procedures to examine specimens.
5. Student will be able to properly collect, process and ship specimens to a referral laboratory for analysis.
6. Demonstrate the understanding of how to prepare, handle and submit appropriate samples for diagnostic analysis in order to ensure accuracy of results.
7. Students will learn their role as a veterinary technician, team member, and client educator in a laboratory, clinical, and diagnostic setting.

COURSE REQUIREMENTS

Minimal Technical Skills Needed

Examples include: Using the learning management system, using Microsoft Word and PowerPoint, using presentation and graphics programs, etc.

Instructional Methods

This section describes how the learning process will be conducted (delivery modalities, course structure, Getting Started and types of learning activities and assessments).

Student Responsibilities or Tips for Success in the Course

Regularly logging into the course website, approximately 2 hours of weekly study and 2 hours of participation time expected. These anticipated times are an estimation and may require more or less.

GRADING

1. Attendance and Participation

- You are expected to come to class every day.
- Excused absences must be discussed with the professor within 24 hours of a missed class, preferably before.
- You are expected to be prepared for lab and ready to engage constructively with the assignment and classmates to increase learning and retention of the material.

2. Professionalism

The syllabus/schedule are subject to change.

- Ethics: If you are caught cheating on anything, this will automatically cut this category in half (and you will receive a zero for that assignment/quiz/exam).
- Attitude is evaluated each time you communicate with course instructors.
 - Are you sending professional emails?
 - Are you working as a team to resolve conflict and improve processes?
 - Are you looking for resources or answers first before asking for help?
 - Are you contributing in a positive manner to the culture and environment of your workplace?

3. Assignments

- **Late homework:** Homework will be due at a specific date and time. Unless discussed in advance, no late work is accepted.

4. Journal Club and Rounds:

- Occasionally, you may be asked to find and present articles or cases that are related to topics of study within the class.
- These assignments will be discussed in advance and in most cases, rubrics for grading will be provided.

5. Parasite Management Project:

- Students will choose one large animal parasite species to create a management plan for. There will be an online sign-up sheet for topics and will require instructor approval. You will create a 1 page handout/ brochure for clients/owners on your specific animal, including specific instructions for its care, husbandry, diet and health. You will present your management plan to the class.

6. Quizzes/Exams and Final Exam:

- Quizzes will be held periodically throughout the class and may be unannounced
- The final exam will be comprehensive/cumulative
- The final Lab Practical Exam will be comprehensive/cumulative
- The final exam format may include T/F, matching, multiple choice, and short answer.

The final grade in the course will be based on your accumulated total points during the semester according to the following distribution:

Attendance and Participation	100
Professionalism	50
Assignments	100
Journal Club/Rounds	200
Quizzes/Exams	250
Project	100
Final Exam	100
Other	100
Total	1000

Final grades in this course will be based on the following scale:

The syllabus/schedule are subject to change.

A = 90%-100%
B = 80%-89%
C = 70%-79%
D = 60%-69%
F = 59% or Below

Assessments

As part of an accredited program, we are to track the students progress in the listed skills and knowledge required by AVMA. The VBMT program students are required to register with the skills tracking program Trajecsys at the full cost based on the coordinators payment plan due to the students graduation date. This is a one time registration fee for the duration of the students participation of the VBMT program up to graduation.

The instructor will register the student but the student is financially responsible. Payment can be completed directly through Trajecsys or campus bookstore. If the student purchases the subscription via bookstore, the cost will differ.

AI use policy [Draft 2, May 25, 2023]

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course. Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism). Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed. In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.
