Syllabus/schedule subject to change

Course Description

This is an online class and requires the student to be more SELF-DIRECTED. You are responsible for all the material in the chapters assigned whether I discuss that material in the class live or NOT.

When we have a class live it is an opportunity to touch on a subject you should have already read over. Not a time to teach everything.

This course introduces the student to the basic concepts and tools of analysis in microeconomics. It is concerned with the specifics economic units or parts that make up an economic system and the relationships between those parts. The focus on understanding the behavior of individual firms, industries, and households and their interactions. A major concern is how prices of individual goods and services are determined and how prices influence decision making.

Student Learning Outcomes

Successful students will be able to accomplish these objectives toward understanding the economy:

1. Explain how choices and trade improve welfare.
2. Be able to use the supply and demand model to describe individual decision makers, an industry, and the economy as a whole.
3. Be able to calculate features of the economy given a simplified dataset.
4. Be able to discuss the limitations and benefits of using each construct to describe the economy.
5. Model the effects on society of the changes in macroeconomic variables.

Successful students will be able to accomplish these objectives as critical thinkers:

- A. Identify assumptions used in the models
- B. Identify information and data that are relevant to an economic problem.
- C. Be able to identify alternative solutions to an economic problem.
- D. Be able to relate and explain economic topics to economic models.
- E. Identify the societal and/or civic issues that are relevant to an economic problem or event.
- F. Use critical thinking skills (creative thinking, innovation, inquiry and analysis of information) to propose solutions to selected economic problems or events.

INSTRUCTIONAL METHODS

Instruction will include Class lives (Zoom), demonstrations and models, and some group and individual work, based on time available throughout the semester. Students will be expected to work on projects and activities that involve real-world applications of the material.

The course is structured so that students can learn in various different formats. The professor will use various learning tools to help students master the course learning objectives. Students are expected to read the assigned chapters in the textbook.

Finally, there will be 3 exams in the course and the 4th exam will be a comprehensive final exam. See the course schedule for more details on due dates. The professor may or may not offer extra credit assignments. All exams will be completed online throughout the semester.

The professor will not repeat questions that can be found within the syllabus. Furthermore, the professor will not answer questions regarding the Assignments or content that has been addressed in lectures and/or e-mails to the course.

COURSEWORK/GRADING

Absolutely no late work will be accepted. Students who miss a quiz or exam will receive a zero. The professor may give students extra credit.

Exams

All quizzes & exams will be administered in class or online for this course. Exams open on Fridays at 12PM and close at 11:59pm on Sunday night of the week assigned. Students are responsible for information from live/recorded lectures and required readings.

Homework Assignments

In order to help students test their understanding of course learning objectives, students will be assigned weekly homework assignments (quizzes) within MyLab Economics (accessible within D2L). Homework assignments are due on Sundays at 11:59PM of the week assigned. **The homework questions are taken directly from the chapters in the textbook.** Students have 2 attempts for each homework assignment. The highest grade will be used for grade

calculations. The homework assignments are very important as they help prepare you for exams.

**

Research Project:

Students will be assigned a chapter summarization project. For example, the paper should be in the following format:

Chapter 100; Title of the paper and Name of the student

14.1 Sub-title

1.

2.

3

14.2 sub-title

4.

5.

6.

And so, on

Bear in mind that you cannot miss an important

GRADING SCALE

Each student's grade will be comprised of three exams (20% each), week quizzes (20%), and attendance and participation (20%).

Grading Scale: A = 90%-100%

 B = 80%-89%

 C = 70%-79%

 D = 60%-69%

 F = 59% or Below

Late Assignment Policy:

Late assignments will accrue a penalty of 10 points per day if the assignment is late. An assignment is one day late if submitted past the identified due date/time. It is considered two days late. If it is submitted any more than 24 hours past the identified due date/time, and so forth. This includes weekends! Once an assignment is more than 10 days late, it will become a zero and will not be accepted for credit. If a student wants an extension for an assignment, this must be received no less than 48 hours before the assigned due date/time. Extensions are not guaranteed and are at the discretion of the instructor. Extensions may include a late penalty.

Weekly Homework Assignments (20% total):

Students will complete quizzes every week online, with the exception of final exam weeks. These will be due on Sundays at 11:59 pm.

CODE OF STUDENT CONDUCT

Texas A&M University-Commerce has established standards of conduct to create and foster an environment that facilitates student learning and development. Students and University student groups are expected to conduct themselves in a manner that demonstrates respect for the rights and property of others, and that is consistent with the educational goals and mission of the University. This Code of Student Conduct (“Code”) focuses on personal responsibility and accountability for students’ actions and the impact those actions may have on the greater community. The Student Code of Conduct can be found here:

<http://www.tamuc.edu/campuslife/campusservices/studentRights/documents/Code%20of%20conduct%20in%20english.pdf>

Students are expected to be professional, courteous, and respectful at all times.

TECHNOLOGY REQUIREMENTS

Browser support

D2L is committed to performing key application testing when new browser versions are released. New and updated functionality is also tested against the latest version of supported browsers. However, due to the frequency of some browser releases, D2L cannot guarantee that each browser version will perform as expected. If you encounter any issues with any of the browser versions listed in the tables below, contact D2L Support, who will determine the best course of action for resolution. Reported issues are prioritized by supported browsers and then maintenance browsers.

Supported browsers are the latest or most recent browser versions that are tested against new versions of D2L products. Customers can report problems and receive support for issues. For an optimal experience, D2L recommends using supported browsers with D2L products.

Maintenance browsers are older browser versions that are not tested extensively against new versions of D2L products. Customers can still report problems and receive support for critical issues; however, D2L does not guarantee all issues will be addressed. A maintenance browser becomes officially unsupported after one year. Note the following:

- Ensure that your browser has JavaScript and Cookies enabled.
- For desktop systems, you must have Adobe Flash Player 10.1

or greater.

- The Brightspace Support features are now optimized for production environments when using the Google Chrome browser, Apple Safari browser, Microsoft Edge browser, Microsoft Internet Explorer browser, and Mozilla Firefox browsers.
