This course will provide measures and tools used to guard both the data and analytics processes from attacks, theft, or other malicious activities that could harm or negatively affect them from both online and offline aspects. It includes protection of data in rest, data in transit, data in processing, big data analytical models, and machine learning techniques.

*The syllabus/schedule are subject to change.*

Prerequisites: CSCI 310 and CSCI 340. Corequisites: CSCI 360.

## **Student Learning Outcomes**

1. To understand various types and properties of digital data
2. To learn and implement data security solutions
3. To learn and implement data privacy controls
4. To learn to protect data models and analytics
5. To understand legal and compliance measures for data protection

## **COURSE REQUIREMENTS**

### **Minimum Technical Skills Needed**

Students should be able to study independently and have strong implementation skills. Students should be also familiar with basic Linux shell commands and system skills. Students are expected to have strong background in both mathematics and computer systems.

### **Instructional Methods**

Face-to-face lectures and lab will be given every week in the classroom. All material related content will be posted on D2L. Assignments will be posted online on D2L, and student should work on them and submit their solution on time. Students are also encouraged to utilize discussion boards for Q&A.

## **GRADING**

*The syllabus/schedule are subject to change.*

**Quizzes:**

Quizzes are brief assessments conducted during lecture time to gauge your understanding and retention of the material. They may be either spontaneous or pre-announced.

**Assignments:**

There will be four assignments throughout the semester. Some of these assignments may involve researching a topic and writing a brief report on it, while others may be practical tasks based on the material covered in the course

**Exams:**

These will be closed-book, closed-note exams designed to measure your understanding of the theoretical material. The midterm exam will cover the material completed before the exam announcement and will take place during the 8<sup>th</sup> or 9<sup>th</sup> week. It will be announced at least one week before the exam date, with further details included in the announcement. The final exam will cover the material studied after the midterm and will be held during the final week.

**Project:**

Project details will be announced during the 7<sup>th</sup> or 8<sup>th</sup> week.

**Attendance:**

Class attendance is mandatory, and students are responsible for all discussions and announcements made during classes. There will be no makeup for quizzes and only in extreme cases for exams.

**Use of AI generative tools:**

East Texas A&M University acknowledges that there are legitimate uses of Artificial Intelligence, chatbots, or other software that has the capacity to generate code, and textual answers. Any unreferenced and undocumented use of such software is not allowed and constitutes an instance of academic dishonesty (plagiarism).

# **COURSE AND UNIVERSITY PROCEDURES/POLICIES**

## **Course Specific Procedures/Policies**

You should do your own work on exams and for programming assignments. Copying another student's work is not acceptable. Any indication of cheating or plagiarism on an exam/assignment will result in an automatic 0 (zero) for the exam/assignment for all students involved. Yet, based on cheating and plagiarism activity in any section of class, instructor holds the right to give F grade to the identified student(s). Regarding codes in assignments, you may be required to explain the code you submitted. In case of discursive explanation, the instructor holds the right to lower your grade. No makeup exams or assignments unless documents explaining emergency are provided.

### **Syllabus Change Policy**

The syllabus is a guide. Circumstances and events, such as student progress, may make it necessary for the instructor to modify the syllabus during the semester. Any changes made to the syllabus will be announced in advance.

## **University Specific Procedures**

### **Student Conduct**

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. The Code of Student Conduct is described in detail in the [Student Guidebook](http://www.tamuc.edu/Admissions/oneStopShop/undergraduateAdmissions/studentGuidebook.aspx).
