Course Description

The course explores current organization development policies and practices in today's organizations. The focus will be on work engagement, an increasing area of interest that has implications for organizational culture, performance, work-life balance, and a host of employees' well-being and behaviors.

Student Learning Outcomes

1. Define work engagement and explain related terms, concepts, and issues
2. Discuss current research on work engagement
3. Synthesize research and apply to training and development policy and practices

Course Grade

The syllabus/schedule are subject to change.

Weekly discussion (6 at 100 points each): Online discussions will serve as a comprehension check on selected topics.

Reflection paper/Article abstract (1 at 100 points each): Each student will prepare a reflection paper of an abstract of a research article that is related to the focus of this class.

Organization analysis (800 points): The purpose of this assignment is to provide you with the opportunity to conduct an in-depth investigation of an organization and apply the knowledge learned in this course.

COURSE REQUIREMENTS

Minimal Technical Skills Needed

This is a fully online course. Assignments will be delivered via a Learning/Course Management System. Knowledge of the substantive material covered in the course is of central importance. Grading will include consideration of content as well as grammar, spelling, organization, and explicit use of readings. A serious commitment to mastery of the content and contribution to everyone's learning is expected. An online course inherently requires students to be active, reflective, and contributive learners.

Assigned readings are noted within the module overview as well as on the course schedule. Required module readings will serve as a basis for online discussion. Late submissions, one week past the due date **WILL NOT** be accepted, and each day late will incur 10% score deduction. I do understand that sometimes there are circumstances outside one's control that may impact timely submission of assignments, such as jury duty, hospitalization, or death of a family member. In these instances, a student is expected to notify the instructor **BEFORE** the assignment deadline.

Course Grade

Discussion Boards (2 at 100 points each and 2 at 200 points each = 800 points total): Each discussion thread topic will require a "post" and two "replies" to fellow classmate's posts.

Weekly Reflection (2 at 100 points each = 200 points total): Each student is to post a journal entry for each module's reading assignment.

Cumulative Project (1000 points): The major project for the class is an individual project report that will be a synthesis and application of the book content as it applies OD practices. More details can be found in the course shell.

AI use policy [Draft 2, May 25, 2023]

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.
