Course Information

Required Text: *No Textbook required. Lecture notes provided by the Professor. HW and Tests are based on Professor's lecture notes.*

Course Basics:

This course introduces the student to the workings and interrelationships of the U.S. and world economics. Principles of economic analysis including measurement of aggregate economic activity, national income determination, money and banking, monetary and fiscal policy, and business fluctuation. Emphasis is given to analyzing real world problems such as poverty, inflation, unemployment, and economic instability. The course is designed as an overview of the essential elements of Macroeconomics as an intellectual, decision-making discipline. Economics is normally treated as two distinct, though interrelated, broad sub-disciplines: Microeconomics and Macroeconomics. At the decision-making level, however, those dividing lines tend to be blurred. This course will focus less on pure theory (theory for the sake of theory) and more on theory as an aid to aggregate economic decision-making.

Student Learning Outcomes

Successful students will be able to accomplish these objectives toward understanding the economy:

1. Explain how choices and trade improve welfare.
2. Be able to use the supply and demand model to describe individual

decision makers, an industry, and the economy as a whole.

3. Be able to calculate features of the economy given a simplified dataset.

Be able to discuss the limitations and benefits of using each construct to describe the economy.

4. Model the effects on society for changes in macroeconomic variables.

Successful students will be able to accomplish these objectives as critical thinkers:

A. Identify assumptions used in models

B. Identify information and data that is relevant to an economic problem.

C. Be able to identify alternative solutions to an economic problem.

D. Be able to relate and explain economic topics to economic models.

E. Identify the societal and/or civic issues that are relevant to an economic problem or event.

F. Use critical thinking skills (creative thinking, innovation, inquiry and analysis of information) to propose solutions to selected economic problems or events.

Instructional Methods: The professor will provide topical lecture notes and videos (if available) through D2L Brightspace Content and/or emails. Questions can be asked through email (kishor.guru-gharana@tamuc.edu) 24/7 throughout the semester.

Student Responsibilities/Tips for Success in the Course

1. Students are expected to:

a. Read Lecture notes provided by the Professor.

b. Watch/learn from videos if provided by the Professor in D2L.

c. Read the regular announcements in the Announcement section of the D2L Brightspace and download the posted materials with download links.

2. This syllabus is tentative for the semester. It is meant to be a guide. Certain topics may be stressed more or less than indicated in the textbook depending on class progress, and certain topics may be omitted.

3. Homework problems are assigned and graded every week. Solutions to Assignment problems will be provided after the grading.

4. Feel free to ask questions through email. I am accessible 24/7 through these channels even during weekends or holidays. You can ask any question related to the course topics and I try to answer them usually within 24 hours.

5. Demeanor: "All students enrolled at the university shall follow tenets of common decency and acceptable behavior conducive to a positive learning environment". See Students Guide Book.

6. Attendance Policy: This is fully Web based class. If Zoom classes are scheduled, it is strongly advised to attend the Zoom class.
