COURSE DESCRIPTION

Catalogue Description of the Course

545. *Developmental Issues/Strategies for Counseling*. Three semester hours.

This course provides an overview of theory and research related to human growth and development over the lifespan. In addition to meeting the core curricula objectives required for accreditation, the course provides specific developmentally appropriate interventions and culturally sensitive developmental assessments supported by research that are designed to enhance the growth and development of clients who seek counseling services. Students also will engage in experiential activities designed to enhance their own growth and development.

General Course Information

This course includes studies that provide an understanding of the nature and needs of individuals at all developmental levels. Building upon this understanding, the course includes strategies that counselors can use to facilitate optimal human development and assess development across the lifespan. Activities to enhance student self-awareness are also incorporated.

Student Learning Outcomes (SLOs):

Measurement 1 (Knowledge):

I. Attachment Assignment. Students will demonstrate understanding of attachment and the impact it can have on client development and interpersonal difficulties.

The syllabus/schedule are subject to change.

Measurement 2 (Skills):

I. Developmental Assessment Paper. Students will apply knowledge on development to two separate case studies. Students will include discussion of the impact of development on emotional regulation, interpersonal interactions, and the implications of client development on clinical interventions.

*All SLOs address the respective CACREP Standards evident in the syllabus.

COURSE REQUIREMENTS

Minimal Technical Skills Needed

In this class, you will utilize the Learning Management System (LMS) entitled D2L for portions of instructional and learning methods, submitting assignments, participating in online discussions, and completing quizzes. You will need to utilize other technologies such as Microsoft Word, PowerPoint, etc. If you have issues with this system, it is your responsibility to contact the help desk immediately.

Instructional Methods

This course consists of lecture and didactic learning methods, small group discussions, and in-class assignments, coupled with experiential learning and practical application. When we are not meeting face to face, you will be expected to participate and complete all online tasks via D2L. In addition to this, small lecture, discussion, activities, and workshops may be utilized during this course.

Student Responsibilities or Tips for Success in the Course

As a student in this course, you are responsible for the active learning process. Expectations of this course include the following:

1. You are expected to display professionalism at all times. Be respectful of your professor and peers. Be open to feedback, as you will receive this throughout the program.
2. Prepare for classes. Complete any and all readings prior to class time.
3. Complete all assignments by the deadline.
4. Adhere to the university student code of conduct.
5. Participate. During face-to-face classes, you are expected to actively participate in all activities and discussion. In the online format, you are expected to participate in all online discussions/activities. This is crucial to your learning.
6. All writing assignments must be done according to APA 6th edition.
7. Regularly check your university email. My suggestion is to check this at least once a day as your instructors and others from the department and University may contact you.
8. Begin your readings ASAP. Sometimes it may take more than one attempt to digest the material.
9. Deadlines are the last possible moment something is due—not the first moment to start. Work ahead. I realize this may not always be possible; however, when you can, do so.
10. Be open to the process. This degree takes time, work, effort, and growth.

The syllabus/schedule are subject to change.

Assignments/Assessments

1. Classroom participation and online discussions (25 points for each online discussion in D2L, 25X5=125).

You will have a total of 5 Discussion and Response Posts (5 initial postings and 3 response postings) during the semester. You are expected to give a thorough and thoughtful response to each prompt utilizing scholarly resources (i.e., textbook, journal publications, credible websites, etc.). In addition to the initial discussion, you will also respond to two of your classmate's discussion posts. Your responses to classmate must advance the initial discussion, that is, the response adds to and strengthens the original post, contracts the original post and provides an explanation as to why, provides further clarification to the original post, and so forth. Response posts that state "nice post," "good job," "I agree/disagree," or something similar without advancing the conversation will not be grade and result in zero (0) points for the response portion of that particular discussion and response post. Thus, it is possible to receive partial credit for completing the discussion but not the response post and vice versa.

The goal of the discussion post is to stimulate conversation surrounding research and program evaluation concepts, challenge any preconceived notions relevant to research and the counseling profession, and expand your thoughts on counselors' role in research and program evaluation. The rubrics for both discussion and response posts are below. For the weeks with discussion posts, they are released the day of class and are due in the following order: (a) **initial discussion post** (b) **the response post**. **The due dates will be posted in a separate document.** Please note that no late postings will be accepted for equity reasons.

Online Discussion Rubric

3 – *Exceeds Expectations* (22-25 points)

Post presents all elements of the question(s) discussed thoroughly and clearly. Responses present all elements required thoroughly and clearly. Provided thoughtful feedback to peer.

2 – *Meets Expectations* (13-21 points)

Post presents most elements of the question OR all elements discussed in a brief manner. Responses to classmates present most elements in a brief manner.

1 – *Does Not Meet Expectations* (0-12 points)

Post is not complete, not written in a clear manner OR post is missing critical components of the question. Responses to

The syllabus/schedule are subject to change.

classmates are not complete, missing critical components OR feedback is not thoughtful.

2. **Attachment Assignment (KPI 30 points):** This assignment has two parts: responding to questions about the Perry (2001) article and responding to a video of a mother interacting with a baby.

a. After reading the Perry article, respond to the following questions.

What is attachment? Why is it important? What is bonding? What factors in the infant or caregiver influence bonding and attachment? How does an insecure attachment impact children, adolescents and adults long term? How might attachment issues be affecting children and adolescents who are struggling to belong and fit in at school and with their peers?

b. You will watch the following YouTube video in which a mother and baby interact. The researcher, Tronick, illustrates a secure and insecure attachment in the video. The purpose of this assignment is for you to experience the impact of a secure and insecure attachment in a way that is unlikely from reading about it. Before you do the required writing, you will watch the 3 minute video. After watching the video, you will complete a short, written assignment. This assignment has two parts: a summary of what you observed and what you think it means about attachment and your personal reaction to watching the mother-baby interaction.

This assignment is not an APA paper. You will write two to three pages, double-spaced and 12 point Times New Roman Font, but there is no title page and no references. Here is the link to the YouTube video.

Attachment Assignment Rubric

3 – *Exceeds Expectations* (18-20 points)

Student had an insightful understanding of secure and insecure attachment and was able to communicate the importance of the non-verbal cues and parental responsiveness in the interaction between mother and baby. Personal reaction indicated an clear understanding of the importance of attachment.

2 – *Meets Expectations* (16-17.9 points)

Student had adequate understanding of secure and insecure attachment and was able to observe important non-verbal cues and interaction between mother and baby. Personal reaction indicated an understanding of interaction.

1 – *Does Not Meet Expectations* (0-15.9 points)

Student did not appear to understand the difference between a secure and insecure attachment. Observation of child was either

The syllabus/schedule are subject to change.

inaccurate or missed essential elements. Personal reaction to video lacked insight.

3. Developmental Assessment Assignment (KPI 30 points)

In order to complete this assignment you will watch a second YouTube video and read part of a chapter in Playground Politics (1993).

Video: This video shows Stanley Greenspan talking about emotional development in babies, doing a developmental assessment on a baby and recommending an intervention to the mother of the baby. To access Greenspan's assessment of the baby, click on the following link and begin at the 10:30 mark of the video. You can stop at 14:00 mark.

<https://vimeo.com/44930499>

After watching the video, answer the following questions.

- What were Greenspan's findings about this baby boy?
- What made it harder for this baby to calm down?
- What intervention did Greenspan recommend to the mother?
- How did the intervention change the relationship between mother and child?

Playground Politics Reading: Chapter 2, Joey's Story

The reading also is from Greenspan and describes his assessment of a 9-year-old boy who is extremely aggressive at school. After you complete the reading, respond to the following questions.

- How would you describe the problems Joey was having?
- How did Greenspan assess Joey's development?
- After doing his assessment, what was Greenspan's conclusion about Joey's aggression and other facets of his development?
- Like he did with the baby in the video, Greenspan recommended an intervention for the mother to use with Joey called floor time (a detailed description of the intervention is in chapter 8). Write a paragraph or two explaining what floor time is.
- How did Joey change in this chapter?

Developmental Assessment Rubric

	1 – Does Not Meet Expectation (0-3.9 points)	2 – Meets Expectation (4-4.4 points)	3 – Exceeds Expectation (4.5-5 points)
Infant Assessment (5 points)	Inaccurate and/or inadequate explanation of Greenspan assessment of baby	Accurate and/or adequate explanation of Greenspan assessment of baby	Insightful and perceptive explanation of Greenspan assessment and understanding of importance of early assessment
Intervention (5 points)	Inadequate description	Adequate description	Insightful and

Child Assessment (5 points)	Inaccurate and/or inadequate explanation of Greenspan assessment of child	Accurate and/or adequate explanation of Greenspan assessment of child	Insightful and perceptive explanation of Greenspan assessment and understanding of importance of emotional assessment
Child Intervention (5 points)	Inadequate description of intervention Limited understanding of floor time	Adequate description of intervention Adequate grasp of how floor time was helpful	Insightful and perceptive explanation of intervention and clear understanding of floor time and the value of the intervention impacted relationship

GRADING

Final grades in this course will be based on the following scale:

270-300 points = 90%-100%	A
240-269 points = 80%-89%	B
210-239 points = 70%-79%	C
180-209 points = 60%-69%	D
< 180 points =	F

Assignment/Assessment	Point Value
Discussions	125
Attachment assignment	30
Developmental assessment	30

Your Final Grade is determined by adding the point values earned from each assignment and then dividing by 185. The resulting value is multiplied by 100 to yield a percentage. For example: $(155 \text{ [points earned]} / 185) \times 100 = 83.78\%$

Late assignments are not be accepted.

Browser support

D2L is committed to performing key application testing when new browser versions are released. New and updated functionality is also tested against the latest version of supported browsers. However, due to the frequency of some browser releases, D2L cannot guarantee that each browser version will perform as expected. If you encounter any issues with any of the browser versions listed in the tables below, contact D2L Support, who will determine the best course of action for resolution. Reported issues are prioritized by supported browsers and then maintenance browsers.

Supported browsers are the latest or most recent browser versions that are tested against new versions of D2L products. Customers can report problems and receive support for issues. For an optimal experience, D2L recommends using supported browsers with D2L products.

Maintenance browsers are older browser versions that are not tested extensively against new versions of D2L products. Customers can still report problems and receive support for critical issues; however, D2L does not guarantee all issues will be addressed. A maintenance browser becomes officially unsupported after one year.

Note the following:

- Ensure that your browser has JavaScript and Cookies enabled.
- For desktop systems, you must have Adobe Flash Player 10.1 or greater.
- The Brightspace Support features are now optimized for production environments when using the Google Chrome browser, Apple Safari browser, Microsoft Edge browser, Microsoft Internet Explorer browser, and Mozilla Firefox browsers.

Microsoft Word is the standard word processing software, Microsoft Excel is the standard spreadsheet software, and Microsoft PowerPoint is the standard presentation software. Copying and pasting, along with attaching/uploading documents for assignment submission, will also be required. If you do not have Microsoft Office, you can check with the bookstore to see if they have any student copies.

ACCESS AND NAVIGATION

You will need your campus-wide ID (CWID) and password to log into the course. If you do not know your CWID or have forgotten your password, contact the Center for IT Excellence (CITE) at 903.468.6000 or helpdesk@tamuc.edu.

Note: Personal computer and internet connection problems do not excuse the requirement to complete all course work in a timely and satisfactory manner. Each student needs to have a backup method to deal with these inevitable problems. These methods might include the availability of a backup PC at home or work, the temporary use of a computer at a friend's home, the local library, office service companies, Starbucks, a ETAMU campus open computer lab, etc.

Students with Disabilities

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:

AI use policy [Draft 2, May 25, 2023]

East Texas A&M University acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.
