Performance Assessment Description

The syllabus/schedule are subject to change.

Students will demonstrate knowledge of foundational concepts and factors that influence development by making connections between course content, chosen context for learning (prekindergarten-3rd grade), and observations of interactive/digital media produced for young children. Students will summarize, analyze, synthesize, and evaluate an interactive media produced for young children incorporating understandings of the characteristics, progressions, variations, and interrelationships between and among development in physical, cognitive, social, language, sensory, aesthetic, and emotional domains. Additionally, students will apply knowledge of how children construct meaning and acquire knowledge and skills to plan instruction using media that is responsive to developmental characteristics and needs and motivates students to learn by employing developmentally appropriate, research-based, and evidence-based practices to create environments that are healthy, respectful, supportive, and challenging. **Note: The children's media observed by candidates for this assessment does not constitute early field experience hours and is not included in the calculation of required FBE hours. It is an assignment which includes review of educational media designed for child consumers.**
