Course Description

Prerequisites: ANS 1319 Introduction to Animal Science
BSC 1407: Introductory Biology II
Chem 1311: General Chemistry

The syllabus/schedule are subject to change.

Comparative anatomy and physiology of the male and female reproductive systems of domestic animals, endocrinology of reproduction, gestation and parturition.

This is a 3-semester hour course (2-hour lecture; 2-hour lab) that covers anatomy, physiology, and endocrinology pertaining to reproduction in cattle, pigs, small ruminants, horses, and poultry. This course will cover basic concepts and principles that will be expanded to include reproductive management decisions and proper use of reproductive technologies.

Student Learning Outcomes

Students successfully completing the course should be able to:

1. Identify both male and female structures of the reproductive system and describe their function.
2. Describe how reproduction is controlled including the role and regulation of hormones.
3. Describe the events, structures, and hormones involved in the estrous cycle leading up to both ovulation and luteolysis.
4. Understand the events surrounding both oogenesis and spermatogenesis
5. Know how pregnancy is established and maintained in the different farm animal species followed by the events leading to parturition.
6. Understand how to use current applied reproductive technologies including estrous synchronization, artificial insemination, and embryo transfer and make good reproductive management decisions.

COURSE OVERVIEW

Course material

The material for this course will be primarily given by PowerPoint lectures. PDF copies of those lectures will be made available to students either before or after the lecture.

COURSE SPECIFIC PROCEDURES/POLICIES

Syllabus Change Policy

The syllabus is a guide. Circumstances and events, such as student progress, may make it necessary for the instructor to modify the syllabus during the semester. Any changes made to the syllabus will be announced in advance.

Use of Artificial Intelligence

East Texas A&M University acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources

Students with Disabilities-- ADA Statement

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities.
