Course Description

COURSE DESCRIPTION: This online graduate course focuses on the student going through the process of developing a research proposal which results in a professionally constructed paper. The course allows the student to place into practice the information and knowledge gained from courses taken through the Sociology program, especially research methods (qualitative and quantitative) and applied data analysis. Students will write a formal research paper which will integrate the program coursework the student has accomplished. Developing this paper will permit each student to demonstrate her/his understanding of research methods and data analysis to culminate in the writing of a professional paper.

Students will write an independent research paper based upon primary or secondary data. Prerequisites: Sociology 572, 573, 575, 576 or permission of the Department Head.

Student Learning Outcomes (Should be measurable; observable; use action verbs)

Through readings and other materials, we will pursue the following course objectives.

1. Demonstrate ability to write a professional research paper proposal using information obtained from the course work within the master's program.
2. Demonstrate understanding of the American Sociological Association style of writing (particularly the citation format).
3. Demonstrate critical thinking while writing the professional research paper.

COURSE REQUIREMENTS

Minimal Technical Skills Needed

Using the learning management system, using Microsoft Word and PowerPoint, using presentation and graphics programs, etc.

Instructional Methods

This course will be conducted entirely via the web. All components of this class are online. We will not meet any time as a class. This course is primarily administered through D2L. If you need help using D2L, please see the technology services staff for help.

Student Responsibilities or Tips for Success in the Course

1. It will be very important that you all read regularly the syllabus and ALL Announcements posted at the home page of this course very carefully and follow all instructions about course objectives, grading procedures, etc. Ignorance about details given in the course syllabus and various announcements posted on the D2L web site cannot be

The syllabus/schedule are subject to change.

accepted as excuse in any manner. I urge that you FULLY understand course requirements and grading procedures. That will be the key to doing well in the course. Also, please feel free to ask me questions about the course requirements through e-mails as needed.

2. This is an online course. Read instructions given under each week carefully.

3. All of your exams will be based on your text book.

4. You can e-mail me whenever you have challenges or questions, particularly those that you don't want to share with your class mates.

Please specify the following in your e-mail: your full name and the course # you are enrolled in so that I check your record before responding to your need or question. You can also get an appointment to see me before and after each class or through an e-mail to me.

Read all announcements posted at the Home Page of the course and read all e-mails sent by me at your My Leo account in the eCollege. If you have problem with your email system, please contact the Instructional Technology office. Do follow university deadlines in schedules given at the university's website and in the undergraduate catalog.

Since this is an online only course, students will need to spend a significant amount of time reading and formulating ideas on their own. The layout of this course will serve to assist the student in moving from the initial idea, to selecting a topic, to going through the process of writing a master's level paper.

GRADING

Final grades in this course will be based on the final paper; while not a thesis, per se, it is the closest thing the student will produce to a thesis. The paper will be written in stages and each stage will have feedback. Students will have the opportunity to edit their paper stages before the submission of the final research paper. The grade will be based on the paper stages + the final product.

TECHNOLOGY REQUIREMENTS

LMS

All course sections offered by Texas A&M University-Commerce have a corresponding course shell in the myLeo Online Learning Management System (LMS). Below are technical requirements

Course Specific Procedures/Policies

Course Specific Procedures/Policies

Late Assignments

Students who need extra time may submit assignments (excluding discussion board postings) up to one week after the assignment due date.

The syllabus/schedule are subject to change.

Points are accumulated in this course instead of averaged. You will have a grade report on D2L keeping track of your points as this semester progresses. Your grade is not negotiable.

Syllabus Change Policy

The syllabus is a guide. Circumstances and events, such as student progress, may make it necessary for the instructor to modify the syllabus during the semester. Any changes made to the syllabus will be announced in advance.

University Specific Procedures

Student Conduct

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. The Code of Student Conduct is described in detail in the [Student Guidebook](http://www.tamuc.edu/Admissions/oneStopShop/undergraduateAdmissions/studentGuidebook.aspx).

<http://www.tamuc.edu/Admissions/oneStopShop/undergraduateAdmissions/studentGuidebook.aspx>

Students should also consult the Rules of Netiquette for more information regarding how to interact with students in an online forum: <https://www.britannica.com/topic/netiquette>

A Note about Citation/Style Guides

Please note that while you may be more familiar with APA or MLA citation styles, this is a **graduate-level sociology course**, and we will be using **ASA (American Sociological Association) style** for all written assignments.

A copy of the ASA Style Guide and examples are available in the **Information and Resources** tab of the course shell. If you have questions about formatting or citation, feel free to reach out.

Students with Disabilities-- ADA Statement

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. AI IN DR. FARRIS' CLASSROOM

The syllabus/schedule are subject to change.

You're welcome to use AI tools (like ChatGPT), Grammarly, or similar support services in this class—as long as you're using them the way you'd use me: as a resource to support your learning, not as a shortcut to avoid doing the work.

Think of it like this:

Would you ask me to write your discussion post for you?

Would you ask me to complete your final project or reflection?

Probably not—and if you did, I'd (kindly) say no!

But would you ask me to help brainstorm ideas, explain a sociological concept, give feedback on a rough draft, or suggest ways to structure your response?

Absolutely. That's using support in a way that still keeps the work (and the learning) yours.

If you do use any AI tools (including Grammarly or ChatGPT), you must note it at the bottom of your assignment.

Just a short line is fine—for example:

- “I used Grammarly to check grammar and clarity.”
- “ChatGPT helped me outline my initial ideas for this post.”
- “I asked ChatGPT to explain symbolic interactionism in simpler terms.”

Being transparent helps build trust and keeps our academic work ethical and clear.

If you're ever unsure whether you're using AI appropriately, just ask yourself: *Is this something I would ask my professor to do for me?*

If the answer is yes, you're probably on the right track.

AI use policy [Draft 2, May 25, 2023]

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.
