

## **WILDLIFE HABITAT ECOLOGY MANAGEMENT**

**BSC 435.01E / AG 435.01E**

COURSE SYLLABUS: FALL 2025

### **INSTRUCTOR INFORMATION**

Instructor: Dr. Walter Paulin Taponjou Nkonmeneck  
Course Location: Science Building 136  
Office Location: STC Room #208  
Office Hours: TR 1-2:30 PM (Zoom link or in person)  
University Email Address: Walter.Taponjou@etamu.edu  
Preferred Form of Communication: **Email**  
Communication Response Time: less than 48 hours

### **COURSE INFORMATION**

**Textbooks (Recommended, not mandatory):**

Title: The Wildlife Techniques Manual (volume 1&2)  
Author(s): Nova J. Silvy (Editor)  
Edition: and/or Publication Date: 7<sup>th</sup> Edition  
ISBN: 9781421401591  
Publisher: The Johns Hopkins University Press

**Additional Texts and/or Materials:**

Research papers will be shared by instructor either via email or in MyLeo online.

*The syllabus/schedule are subject to change.*

## **Course Description**

This class delves into the history and concepts of an animal's habitat, starting with the ideas of Aldo Leopold and progressing to contemporary notions of what constitutes a habitat. Students will gain insights into the principles and techniques of habitat management, applying them to forest, rangeland, wetland, and agricultural ecosystems. Additionally, they will explore current conservation biology concepts such as fragmentation, meta-population ecology, and corridor ecology. Enrollment in this course requires students to be willing to attend field trips when and where feasible to observe actual management practices in the field.

### **Student Learning Outcomes**

1. General concepts of wildlife-habitat relationships as they pertain to wildlife management and conservation biology.
2. Wildlife-habitat measurements useful in the manipulation and management of wildlife populations and their habitats.
3. Wildlife habitat modification techniques useful in the manipulation of succession on the landscape.
4. Evaluate and perform wildlife habitat assessments to develop a habitat management plan.

## **COURSE REQUIREMENTS**

### **Minimal Technical Skills Needed**

- Proficiency in using the D2L Brightspace Learning Management System through myLeo Online.
- Proficiency in the use of Microsoft Word, and PowerPoint.
- Other relevant skills in using GPS, and Google Maps.

### **Instructional Methods**

This course meets in-person in the traditional lecture format. You will be required to read the book chapters, supplemental reading material, and instructional PowerPoint slides. Quizzes and exams will cover the material presented to you via myLEO Online and information in the text. I will post announcements on the course homepage to remind students of important due dates, in addition to announcing them in class. Students can monitor their progress in the course on the course webpage in D2L Brightspace.

*The syllabus/schedule are subject to change.*

## Student Responsibilities or Tips for Success in the Course

- Dedicated study time each week to go over the materials covered in the class and the information in the relevant book chapter(s).
- Regularly checking both myLEO Online (D2L Brightspace) and emails for course-related announcements.
- Completing assignments on time. Late assignments will be penalized.

### GRADING

Final grades in this course will be based on the following scale:

A = 90%-100%, B = 80%-89%, C = 70%-79%, D = 60%-69%, F = 59% or Below

### Assessments

You will be assessed based on the grades from the 10 weekly quizzes (13%), Group project (13%), two exams (27%), Field trip notes (13%), Research paper and oral presentation (13%), and cumulative final exam (20%). Below is a breakdown of potential grades that can be earned in the class:

<i>Assignment</i>	<i>Max point</i>	<i>Times</i>	<i>Points</i>	<i>% of final grade</i>
<i>Exams</i>	100	2	200	27%
<i>Group projects (Management plans)</i>	100	1	100	13%
<i>Field trip notes</i>	50	2	100	13%
<i>Weekly quizzes</i>	10	10	100	13%
<i>Research paper and presentation</i>	100	1	100	13%
<i>Final Exam</i>	150	1	150	20%
<i>Total</i>			<b>750</b>	

#### **Wildlife management Field trips**

There will be at least two mandatory field trips near campus. Students must take notes on these trips and create a "Wildlife Management Plan" with recommendations based on the habitat conditions and conservation goals for target and/or non-target wildlife. These papers will be approximately 5 pages long and include a brief synopsis, detailed boundary maps, lists of species of interest, photo documentation, preliminary analysis, habitat recommendations, and a summary. Students must wear appropriate footwear and clothing for outdoor field travel.

#### **Weekly quizzes**

*The syllabus/schedule are subject to change.*

There will be 10 weekly quizzes worth 20 points apiece. Each quiz will consist of approximately 10 questions (e.g., true or false, multiple choice, matching, etc.) from modules, readings, videos and any other material assigned for that week and account for a maximum of 100 pts each week. Each quiz is comprehensive and could cover any material covered prior to that week's quiz. Quizzes will be made available on Tuesday mornings and need to be completed before 11:59 p.m. on Sunday night of that week. will cover the two previous weeks.

### ***Management plan***

Group project – Students will form groups and will be responsible for writing a wildlife habitat management plan for a property or species of their choice. Management plans can serve to guide landowners seeking an agricultural wildlife valuation for their properties (Texas House Bill 1358, Proposition 11) and will follow TPWD Comprehensive Wildlife Management Planning Guidelines. Students will be required to develop a management plan addressing 1 landowner objective and at least 1 qualifying management practice. Typically, official plans have 3 objectives and 3 qualifying practices; however, for the purpose of this assignment, I want the student to focus on 1 objective and at least 1 qualifying management practice. The written plan will be graded on application of qualifying practice, content, writing style/clarity, and grammar. The end of week 8, is the deadline to submit your group project management plan, via D2L or emailed to me ([walter.tapondjou@etamu.edu](mailto:walter.tapondjou@etamu.edu)).

### ***Research paper and oral presentation***

This will focus on the life history and habitat requirements for a wildlife species or guild in North America. Students will research their species, design a study to assess the species' feeding habits and preferences in the fall, and develop a short PowerPoint presenting the results of their research project. The posters will be presented to your classmates. The research project and oral presentation will contribute 70% and 30% of the final grade, respectively.

### ***Midterm and Final Exams***

There will be two three exams: two midterm exams, and a final exam (**TBA**) during the Fall 2025 final week (Dec. 6th-12th). Like the Weekly Quizzes, exams will be a combination of multiple choice and short answer and designed to simultaneously assess your knowledge and critical analytical skills. Thus, Weekly quizzes will be good practice for the exams. The final exam will be cumulative.

### ***Makeup Policy***

The student is responsible for requesting a makeup exam when they are unable to attend the regularly scheduled examination and must schedule the makeup exam within 2 days of the absence. Makeup exams will be scheduled only in the event of an

*The syllabus/schedule are subject to change.*

EXCUSED absence (as defined in the Student's Guidebook). If the test is not made up, the student will receive a zero for that exam.

***Extra credit***

Class participation is the most effective way to earn extra credit. To simplify the process, students can submit their questions before class in D2L or by email to the instructor. The question will be answered during the lecture.

### **AI use policy [Draft 2, May 25, 2023]**

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.
