Course Description

A course designed to prepare math, computer science, and engineering majors for a background in abstraction, notation, and critical thinking for the mathematics most directly related to computer science. Topics include: logic, relations, functions, basic set theory, countability and counting arguments, proof techniques, mathematical induction, combinatorics, discrete probability,

The syllabus/schedule are subject to change.

recursion, sequence and recurrence, elementary number theory, graph theory, and mathematical proof techniques Prerequisites: **MATH 2413** Calculus I with a minimum grade of C.

Student Assessment Outcomes

1. Critical Thinking: Will be measured in homework, quiz, and test questions.
2. Written, Oral, & Visual Communication: Students will be assessed on written, oral, and visual communication skills during assignments and sagemath projects
3. Empirical and quantitative reasoning: All assessments in this course will contain a quantitative reasoning component.

Student Learning Outcomes Upon completion of the course, students will be able to:

1. Construct mathematical arguments using logical connectives and quantifiers.
2. Verify the correctness of an argument using propositional and predicate logic and truth tables.
3. Demonstrate the ability to solve problems using counting techniques and combinatorics in the context of discrete probability.
4. Solve problems involving recurrence relations and generating functions.
5. Use graphs and trees as tools to visualize and simplify situations.
6. Perform operations on discrete structures such as sets, functions, relations, and sequences.
7. Construct proofs using direct proof, proof by contraposition, proof by contradiction, proof by cases, and mathematical induction.
8. Apply algorithms and use definitions to solve problems to prove statements in elementary number theory.
