COURSE INFORMATION

No textbook purchase necessary. All required reading materials will be made available electronically through D2L.

Course Description

ECE 561 - This course is a study of the principles and theories of child growth and development in early childhood education. Course content centers on the physical, cognitive, affective, and social development domains. Students will be required to observe the development of a young child outside of the classroom in order to complete a comprehensive child study project. (Hours: 3)

Student Learning Outcomes

1. Analyze and synthesize major child development theories (cognitive, psychosocial, behavioral, ecological systems) and evaluate their application to contemporary early childhood education practices, demonstrating understanding of theoretical strengths, limitations, and cultural considerations.
2. Examine and assess the interconnected nature of physical, cognitive, social-emotional, and language development in young children (birth through age 8), conduct systematic developmental observations, and create comprehensive developmental profiles that inform instructional planning.
3. Critically evaluate current research in child development, distinguishing between high-quality empirical studies and other sources, and apply research findings to inform evidence-based decision-making in early childhood educational settings.
4. Analyze how cultural, socioeconomic, family structure, and community contexts shape children's developmental trajectories, and design culturally responsive

approaches that honor diverse developmental pathways while supporting optimal growth across all domains.

5. Synthesize developmental knowledge to create and justify developmentally appropriate learning experiences and intervention strategies, while developing effective communication strategies for collaborating with families and other professionals in supporting children's developmental progress.

COURSE REQUIREMENTS

Minimal Technical Skills Needed. Taking an online course requires general computer literacy. All work in this course must be completed and submitted through myLeo Online (D2L), our campus Learning Management System. You must have consistent and reliable access to a computer and the Internet. You must be able to use Leomail, organize and save electronic files, download and upload documents, locate information with a browser, and generate content using general word processing programs.

Instructional Methods

This course consists of a series of activities and assessments to assist you in achieving the outcomes/objectives for the course and instructional units/modules. Each week you will work on various combinations of assignments, discussions, readings, research, quizzes, and/or exams.

Quizzes are designed as a study guide for each chapter. Post-quiz may be retaken to achieve

the grade desired by the students.

Application exercises are designed for you to apply the information that has been mastered

in the quizzes. Students are encouraged to review the application exercises at the beginning of

the semester. Several exercises require observations in the community

Student Responsibilities or Tips for Success in the Course

The ABCs of Student Responsibility:

- Actively participate in class and the learning process.
- Be organized and prepared.
- Communicate with me about questions or concerns.

GRADING

All assignments and examinations are due as indicated on the course calendar.

Written work should follow the guidelines published in the APA Manual (7th ed.) for citations, references, and manuscript style using 1" margins, double spaced, and 12-point font.

Work submitted late will be subject to a **10% deduction per day**. Ten days after the due date a grade of '0' will be entered in the Grade Center.
